ways and judicious choices require a range of metrics Weighing the relatively low costs of targeting against the potential gains is important Implementing inclusive delivery systems is critical for reducing errors of exclusion and inclusion Selecting and customizing the appropriate targeting method depends on purpose and context there is no method preferred in all circumstances Leveraging advances in technology ICT big data artificial intelligence machine learning can improve targeting accuracy but they are not a panacea better data matters more than sophistication in inference Targeting social protection should be a dynamic process *Proceedings of the 6th International Conference on Industrial Engineering (ICIE 2020)*

Performance Funding for Higher Education Kevin J. Dougherty,Sosanya Jones,Hana Lahr,Rebecca S. Natow,Lara Pheatt,Vikash Reddy,2016-10-04 A rigorous analysis of the impact and implications of performance funding for higher education Seeking greater accountability in higher education many states have adopted performance funding tying state financial support of colleges and universities directly to institutional performance based on specific outcomes such as student retention progression and graduation Now in place in over thirty states performance funding for higher education has been endorsed by the US Department of Education and major funders like the Gates and Lumina foundations Focusing on three states that are regarded as leaders in the movement Indiana Ohio and Tennessee Performance Funding for Higher Education presents the findings of a three year research study on its implementation and impacts Written by leading authorities and drawing on extensive interviews with government officials and college and university staff members this book describes the policy instruments states use to implement performance funding explores the organizational processes colleges rely on to determine how to respond to performance funding analyzes the influence of performance funding on institutional policies and programs reviews the impacts of performance funding on student outcomes examines the obstacles institutions encounter in responding to performance funding demands investigates the unintended impacts of performance funding The authors conclude that while performance funding clearly grabs the attention of colleges and leads them to change their policies and practices it also encounters major obstacles and has unintended impacts Colleges subject to performance funding are hindered in posting good results by inappropriate performance measures insufficient organizational infrastructure and the commitment to enroll many students who are poorly prepared or not interested in degrees These obstacles help explain why multivariate statistical studies have failed to date to find a significant impact of performance funding on student outcomes and why colleges are tempted to resort to weakening academic quality and restricting the admission of less prepared and less advantaged students in order to improve their apparent performance These findings have wide ranging implications for policy and research Ultimately the authors recommend that states create new ways of helping colleges with many at risk

students define performance indicators and measures better tailored to institutional missions and improve the capacity of colleges to engage in organizational learning
