What is Feminism? Chris Beasley,1999-09-20 In this guide to western feminist theory Christine Beasley provides clear explanations of the many types of feminism ranging from liberal feminism to queer theory **Film and the Working Class** Peter Stead,2013-12-13 Taking the subject chronologically from the 1890s to when the book was initially published in 1989 this book analyses those films specifically concerned with working class conditions and struggle and discusses them within

the context of the debate on the social significance of the feature film It concentrates on films which depict labour organizations and political activists as well as life in working class communities and actors with working class identities such as James Cagney Reviews of the original edition fills a gap in film studies the study of social and labour history and the development of popular culture in Britain and the United States **The British National Bibliography Cumulated Subject Catalogue** ,1968 Stein Manifolds and Holomorphic Mappings Franc Forstnerič,2017-09-05 This book now in a carefully revised second edition provides an up to date account of Oka theory including the classical Oka Grauert theory and the wide array of applications to the geometry of Stein manifolds Oka theory is the field of complex analysis dealing with global problems on Stein manifolds which admit analytic solutions in the absence of topological obstructions The exposition in the present volume focuses on the notion of an Oka manifold introduced by the author in 2009 It explores connections with elliptic complex geometry initiated by Gromov in 1989 with the Anders n Lempert theory of holomorphic automorphisms of complex Euclidean spaces and of Stein manifolds with the density property and with topological methods such as homotopy theory and the Seiberg Witten theory Researchers and graduate students interested in the homotopy principle in complex analysis will find this book particularly useful It is currently the only work that offers a comprehensive introduction to both the Oka theory and the theory of holomorphic automorphisms of complex Euclidean spaces and of other complex manifolds with large automorphism groups *The Embers and the Stars* Erazim Kohák,1987-11-15 It is hard to put this profound book into a category Despite the author s criticisms of Thoreau it is more like Walden than any other book I have read The book makes great strides toward bringing the best insights from medieval philosophy and from contemporary environmental ethics together Anyone interested in both of these areas must read this book Daniel A Dombrowski The Thomist Those who share Koh k s concern to understand nature as other than a mere resource or matter in motion will find his temporally oriented interpretation of nature instructive It is here in particular that Koh k turns moments of experience to account philosophically turning what we habitually overlook or avoid into an opportunity and basis for self knowledge This is an impassioned attempt to see the vital order of nature and the moral order of our humanity as one Ethics **Continuum Encyclopedia of Popular Music of the World, Volume 2** John Shepherd,David Horn,Dave Laing,Paul Oliver,Peter Wicke,2003-05-08 The Bloomsbury Encyclopedia of Popular Music Volume 1 provides an overview of media industry and technology and its relationship to popular music In 500 entries by 130 contributors from around the world the volume explores the topic in two parts Part I Social and Cultural Dimensions covers the social phenomena of relevance to the practice of popular music and Part II The Industry covers all aspects of the popular music industry such as copyright instrumental manufacture management and marketing record corporations studios companies and labels Entries include bibliographies discographies and filmographies and an extensive index is provided Choral Music Avery T. The Critic Jeannette Leonard Gilder, Joseph Benson Gilder, 1897 To Walt Whitman, America Kenneth M. Price, 2005-10-12
Walt Whitman is America according to Ezra Pound More than a century after his death Whitman s name regularly appears in political speeches architectural inscriptions television programs and films and it adorns schools summer camps truck stops corporate centers and shopping malls In an analysis of Whitman as a quintessential American icon Kenneth Price shows how his ubiquity and his extraordinarily malleable identity have contributed to the ongoing process of shaping the character of the United States Price examines Whitman s own writings as well as those of writers who were influenced by him paying particular attention to Whitman s legacies for an ethnically and sexually diverse America He focuses on fictional works by Edith Wharton D H Lawrence John Dos Passos Ishmael Reed and Gloria Naylor among others In Price s study *Leaves of Grass* emerges as a living document accruing meanings that evolve with time and with new readers with Whitman and his words regularly pulled into debates over immigration politics sexuality and national identity As Price demonstrates Whitman is a recurring starting point a provocation and an irresistible rewritable text for those who reinvent the icon in their efforts to remake America itself *The Publisher* ,1915 **Living Ruins, Value Conflicts** Argyro Loukaki, 2016-12-05
Using monuments and ruins by way of illustration this fascinating book examines the symbolic ideological geographical and aesthetic importance of Greek classical iconography for the Western world It examines how classical Greek monuments are simultaneously perceived as sublime national symbols and as a mythological and archetypal reference against which Western modernism is measured The book investigates the dialogue this double identity leads to as well as frequent clashes between ancient but also later monuments and their modern urban or regional environment *Living Ruins Value Conflicts* examines the complex historical process of monument restoration and enhancement and analyses the nexus of changing perceptions aesthetic visions and formal principles over the past two centuries The book shows the ways in which archaeology and monumentality affect modern life the modern aesthetic our notions of nationhood of place of self and the limits to and possibilities for national development imposed by the need to ensure ruins are kept alive
