

# Vending Machines

## Purpose

To debate whether a school should install vending machines to raise money for new playground equipment.

## Background

Food contains nutrients that provide your body with energy to move, grow, and heal. Your body needs many kinds of nutrients to maintain good health.

Different kinds of foods have different nutrients. It is important to eat a wide variety of foods to get all the nutrients you need. To stay healthy, nutritionists suggest that you avoid fried foods and foods with too much fat in them. Avoiding candy and desserts helps you control the amount of simple carbohydrates you eat. Reading the ingredients on a food label can help you make healthful food choices that will help your body remain strong and healthy.

## Situation

The playground equipment at Eastwell School is falling apart and needs to be replaced. Students may get hurt. It is time for new equipment to be installed, but the school must first raise the money to pay for it.

The principal, Mrs. Graham, wants to have vending machines installed in the school cafeteria. The vending machine company has agreed to give the school part of the money they collect. The machines can carry a wide variety of snacks, including some healthy choices. But they also will include sugary, salty, or fatty choices that most people would consider "junk food."

## Proposal

Vending machines should be installed in the school cafeteria to help raise money for new playground equipment.
