The Road to War in Iraq: Comparative Foreign Policy Analysis Chris Featherstone, 2025-04-09 This book combines three Foreign Policy Analysis (FPA) models to explain both how and why the US and UK decided to invade Iraq in 2003 These three FPA models each examine a different but closely related aspect of the individual level of decision making Firstly Groupthink examines how pathologies of small group decision making affected the processes in the US and UK decision to invade Iraq Secondly the Leadership Style framework examines how the individual leader's style of exercising their leadership affected the navigation of the decision making process Thirdly analogical reasoning examines how decision makers frame their actions both in their own decision making and in how they present their decision to the wider public By achieving these objectives The Road to War contributes to the field of FPA and to our understanding of how the decision to invade Iraq was taken The comparative use of these FPA models within a single framework means that this book responds to the calls for multifactorial research within FPA proposing and testing a framework that provides more complex answers through adopting a multifactorial framework These more nuanced complex answers then reveal more about the role of the individuals involved in the decision to invade Iraq and how their cognition affected the process that led to the decision to invade

Theorizing Foreign Policy in a Globalized World Knud Erik Jørgensen, 2015-04-29 In this collection of refreshing and provocative essays the contributors to Theorizing Foreign Policy in a Globalized World reflect on the game changing political impact of

globalization outlining the situation as it currently stands and suggesting strategies for analyzing foreign policy and global governance

Qatar's Foreign Policy Marwan Kabalan, 2024-11-14 This study offers an analysis of Qatar's foreign policy since its independence from Britain in 1971. Locked between two vying powers, Iran and Saudi Arabia, and lacking the traditional elements of influence in the regional and international state system such as land, human capital, and advanced industry, Qatar nevertheless wields a disproportionately large amount of regional influence with an assertive foreign policy approach. Here, Marwan Kabalan highlights the strategies pursued by the ruling Qatari elite, especially during the last two decades, and delves into the methods Qatar has used to deal with the structural challenges to its foreign policy. These strategies include financially leveraging its access to crucial resources such as natural gas and its manipulation of existing regional frictions. The book also addresses Qatar's soft power influence, positioning itself as an alternative cultural and intellectual hub in the Arab world, enabling it to take a leading role, particularly as a mediator in the region. By highlighting Qatar's foreign policy strategies and outcomes, Kabalan illustrates how the Qatari case challenges key assumptions of international relations theory, which assumes that wealthy small powers tend to pursue passive foreign policies and that structural forces minimize the role of ruling elites in foreign policymaking.

Ethics As Foreign Policy Dan

Bulley, 2009-05-07 Ethical foreign policy has often been considered utopian, unrealistic, and potentially very dangerous. Dan Bulley argues for a reconceptualisation of ethics as foreign policy, as both look to how we can and ought to relate to others. Inspired by the deconstructive thought of Jacques Derrida, Bulley studies the ethical claims of British 1997, 2007, and EU 1999, 2004 foreign policy. These claims are read against themselves to illustrate their deep ambiguity. A textual analysis of speeches, statements, and interviews given by foreign policy makers shows that a responsibility to save Africa, to protect Iraqis, and to hospitably welcome the Balkans into the EU are also irresponsible, inhospitable, and unethical. The author contends that foreign policies making a claim to morality are ethical and unethical in their own terms, suggesting that while a truly ethical foreign policy remains ultimately unachievable, it does not justify abandoning a responsible relation to others. Rather, a negotiation of ethics as foreign policy suggests potential individual context-bound decisions which remain open to contestation and permanent critique. Bulley argues that the goal of ethical foreign policy must be maintained as a productive hope of what is neither completely impossible nor entirely possible.

Explaining Foreign Policy in Post-Colonial Africa

Stephen M. Magu, 2021-01-02 This book explores foreign policy developments in post-colonial Africa. A continental foreign policy is a tenuous proposition yet new African states emerged out of armed resistance and advocacy from regional allies such as the Bandung Conference and the League of Arab States. Ghana was the first Sub-Saharan African country to gain independence in 1957. Fourteen more countries gained independence in 1960, alone, and by May 1963, when the Organisation of African Unity (OAU) was formed, 30 countries were independent. An early OAU committee was the African Liberation Committee (ALC), tasked to work in the Frontline States (FLS) to support independence in Southern Africa. Pan-Africanists in

alliance with Brazzaville Casablanca and Monrovia groups approached continental unity differently and regionalism continued to be a major feature Africa's challenges were often magnified by the capitalist democratic versus communist socialist bloc rivalry but through Africa's use and leveraging of IGOs the UN UNDP UNECA GATT NIEO and others to advance development the formation of the African Economic Community OAU's evolution into the AU and other alliances belied collective actions even as Africa implemented decisions that required cooperation *uti possidetis* maintaining colonial borders containing secession intra and inter state conflicts rebellions and building RECs and a united Africa as envisioned by Pan Africanists worked better collectively

Non-Western Global Theories of International Relations Samantha Cooke, 2022-01-28 This book seeks to reposition international relations IR theory by providing insights into non Western concepts and theories By engaging with understandings of power identity the state and the individual from a range of states outside of the Western hemisphere the contributors to this book introduce new methods for understanding aspects of IR in context considerate ways Engagements with Western theories and cases highlight how we need to reposition traditional understandings to allow non Western approaches to IR develop alongside and inform their Western counterparts Moreover the book reinforces the need to move beyond the traditionally used Western centric lenses without removing them completely instead it advocates a harmonisation between them to reduce generalisations across the local state and regional levels

Foreign Policy in Comparative Perspective Ryan K. Beasley, Juliet Kaarbo, Jeffrey S. Lantis, Michael T. Snarr, 2012-04-25 Widely regarded as the most comprehensive comparative foreign policy text *Foreign Policy in Comparative Perspective* has been completely updated in this much anticipated second edition Exploring the foreign policies of thirteen nations both major and emerging players and representing all regions of the world chapter authors link the study of international relations to domestic politics while treating each nation according to individual histories and contemporary dilemmas The book's accessible theoretical framework is designed to enable comparative analysis helping students discern patterns to understand why a state acts as it does in foreign affairs

Autonomy and Negotiation in Foreign Policy Andrés Villar Gertner, 2016-09-30 This book provides a unique view on the Beagle Channel crisis 1977-1984 between Argentina and Chile by examining it in a global political context The author explores the factors which led from imminent conflict to signing the Treaty of Peace and Friendship in just six years Regional and international dimensions of the Beagle crisis are given particular attention including international arbitration the participation of the Vatican as a third actor the role of the US the complicating effects of the Falkland war and the relations between each party and the UK The author highlights unequal effects on Argentine and Chilean foreign policies of domestic structures and international conditions The book seeks to determine the extent to which foreign policy provides opportunities for states to exercise political autonomy given the powerful constraints imposed by the multiple structures of the international system and how negotiation behaviour generated the path from conflict to cooperation between Argentina and Chile The author's focus on foreign policy aids the

understanding of processes and decisions within Argentina and Chile during the Beagle crisis while utilising new theoretical approaches in the field of negotiation behaviour in Latin America The Psychology of Foreign Policy Christer Pursiainen, Tuomas Forsberg, 2021-10-16 This book focuses on foreign policy decision making from the viewpoint of psychology Psychology is always present in human decision making constituted by its structural determinants but also playing its own agency level constitutive and causal roles and therefore it should be taken into account in any analysis of foreign policy decisions The book analyses a wide variety of prominent psychological approaches such as bounded rationality prospect theory belief systems cognitive biases emotions personality theories and trust to the study of foreign policy identifying their achievements and added value as well as their limitations from a comparative perspective Understanding how leaders in world politics act requires us to consider recent advances in neuroscience psychology and behavioral economics As a whole the book aims at better integrating various psychological theories into the study of international relations and foreign policy analysis as partial explanations themselves but also as facets of more comprehensive theories It also discusses practical lessons that the psychological approaches offer since ignoring psychology can be costly decision makers need to be able reflect on their own decision making process as well as the perspectives of the others Paying attention to the psychological factors in international relations is necessary for better understanding the microfoundations upon which such agency is based Non-State Actors and Foreign Policy Agency Marianna Charountaki, Christos Kourtellis, Daniela Irrera, 2024-03-19 This edited volume discusses non state actors as agents of foreign policy It questions whether non state actors can act as foreign policy makers and if the contemporary role of non state actors constitutes a theoretical challenge to foreign policy Chapters demonstrate the impact of non state entities through the lenses of their direct role as decision makers with examples drawn from the African continent the Middle East Europe and Asia Arguing for the necessity of approaching foreign policy in a broader frame beyond the scope of the state and the individual the book fills a gap in the literature and creates a closer nexus between area studies and foreign policy This volume will be of interest to both academics and practitioners across the fields of international relations foreign policy analysis and area studies
