 references from the book on a variety of devices [Bloody Lies](#) Thomas Mollett, 2014-05-09 This book daringly challenges
 one of the most controversial murder cases in recent South African history In 2007 Fred van der Vyver was acquitted of the
 2005 murder of his girlfriend Inge Lotz He then sued the police to the highest court for malicious prosecution and failed In
 spite of the defence s trashing of the prosecution s case at the trial brothers Thomas and Calvin Mollett provide a compelling
 argument of how every key element of the prosecuting evidence withstands the closest scrutiny They use models
 measurements forensic tests mathematical formulae and the views of experts both here and overseas The authors show how
 an ornamental hammer found in Van der Vyver s vehicle but thrown out as evidence could match Inge s head wounds
 Contrary to the claim accepted in court they convincingly argue that a disputed fingerprint was not lifted off a drinking glass
 found in Inge s flat a detail that could make all the difference They demonstrate how blood marks on a towel could have come

off the hammer how blood stains on the floor could have been shaped by a specific shoe and how a closer look at cell phone records reveals a different choreography of movements than what was accepted by the court **Spitz and Fisher's**
