Shuman, 2009-06-23 As many as one in four adults in the workforce will suffer from psychiatric illness in a given year Such illness can have serious consequences job loss lawsuits workplace violence yet the effects of mental health issues on job functioning are rarely covered in clinical training In addition clinicians are often asked to provide opinions on an employee's fitness for work or an evaluation for disability benefits only to find themselves embroiled in complex legal and administrative conflicts A unique collaboration between a renowned clinical professor of psychiatry and a noted legal expert Evaluating Mental Health Disability in the Workplace approaches the topic from two distinct areas the legal context and issues relevant to disability and disability related evaluations and the interplay of factors in the relationship between work and psychiatric illness From this dual perspective the authors advocate for higher professional standards ensuring that employers employees or third parties are provided with the most reliable information Key features of the book A robust assessment model of psychological disability in the workplace Practice guidelines for conducting workplace mental health disability evaluations Legal and ethical aspects of employment evaluations especially as they differ from clinical procedure Examination of the process of psychiatric disability development Issues specific to evaluations for Social Security Workers Compensation and other disability benefit programs Review of relevant administrative and case law As an introduction to these complex issues or for the further improvement of evaluation skills Evaluating Mental Health Disability in the Workplace is a timely reference for psychiatrists psychologists forensic mental health specialists and attorneys in this field Re-sizing Psychology in Public

Policy and the Private Imagination Mark Furlong, 2016-09-07 This book interrogates the current reputation of Psychology both as an industry and as part of the academy It disputes Psychology's claim to be a science questions its claims to effectiveness and examines relationships with other disciplines and fields Just as Psychology's role in the design of addictive gaming machines has been underplayed so too has the conservative aspect of its regulation of normality and pathology The discipline of Psychology affects our understanding of identity and subjectivity to position the self as amoral and disconnected This book questions this assumption and more generally the received status of Psychology A New Juvenile Justice System Nancy E. Dowd, 2015-05-15 A New Juvenile Justice System aims at nothing less than a complete reform of the existing system not minor change or even significant overhaul but the replacement of the existing system with a different vision The authors

in this volume academics activists researchers and those who serve in the existing system all respond in this collection to the question of what the system should be Uniformly they agree that an ideal system should be centered around the principle of child well being and the goal of helping kids to achieve productive lives as citizens and members of their communities Rather than the existing system with its punitive destructive undermining effect and uneven application by race and gender these authors envision a system responsive to the needs of youth as well as to the community s legitimate need for public safety How they ask can the ideals of equality freedom liberty and self determination transform the system How can we improve the odds that children who have been labeled as delinquent can make successful transitions to adulthood And how can we create a system that relies on proven family focused interventions and creates opportunities for positive youth development Drawing upon interdisciplinary work as well as on the ground programs and experience the authors sketch out the broad parameters of such a system Providing the principles goals and concrete means to achieve them this volume imagines using our resources wisely and well to invest in all children and their potential to contribute and thrive in our society

Clinical Guide to Mental Disability Evaluations Liza Gold, Donna L. Vanderpool, 2013-01-11 Disability evaluations are the most common clinical mental health evaluations conducted for nontreatment purposes They place mental health professionals in the role of communicating information that is typically confidential to administrative and legal systems Unfortunately mental health professionals receive little to no training in conducting assessments that focus on disability and disability management and often do not understand the implications and risks of providing this information especially without conducting what are often specialized evaluations Clinical Guide to Mental Health Disability Evaluations is geared for general mental health practitioners providing them with the basic information needed to competently provide the various types of disability evaluations It also provides enough information to inform forensic mental health providers in conducting more specialized evaluations

Civil Capacities in Clinical Neuropsychology George J. Demakis, 2012-10-15 Clinical neuropsychologists are increasingly involved in the evaluation of civil capacities and are in demand by other professionals particularly attorneys and judges to assist their decision making about these sometimes complex issues While there has been some neuropsychological research in this area this has not been assembled into a single volume nor have practice recommendations been provided This volume fills these gaps The first part of this volume reviews and synthesizes the research literature on neuropsychological aspects of civil capacities The specific capacities addressed include driving financial and healthcare decision making testamentary i e will making capacity and personal care and independence Each chapter addresses relevant background issues conceptual theoretical advances and empirical findings The chapters also include an illustrative case study that demonstrates how the authors each expert in the various areas evaluated and conceptualized the case Each chapter is written from an evidence based perspective and where appropriate uses research to inform practice recommendations The second part of this volume provides recommendations to practitioners on how to

conduct civil capacity evaluations that utilize neuropsychological assessment There are chapters on an evaluative framework for the assessment capacity test selection and psychometric issues working with other data sources besides testing e g collateral interviews best practices in report writing and testifying as well as common ethical issues in such cases Throughout these chapters provide practical how to advice to improve neuropsychological practice and consulting in civil capacity cases In addition to these chapters there is a chapter written by legal consumers of psychological reports This chapter offers a wealth of useful information and recommendations that if followed will further serve to advance psychological report writing and consultation in civil capacity evaluations
