**Environment to 2050** Tim Dixon, John Connaughton, Stuart Green, 2018-01-09 Brings together leading thinking on issues of new professional practice and on the future of a sustainable built environment This book focuses on both construction and development issues and examines how we can transition to a sustainable future by the year 2050 bringing together leading research and practice at building neighbourhood and city levels It deftly analyses how emerging socio economic technological and environmental trends will influence the built environment of the future The book covers a broad spectrum

of interests across the scales of buildings communities and cities including how professional practice will need to adapt to these trends The broader context is provided by an analysis of emergent business models and the changing requirements for expert advice from clients Sustainable Futures in the Built Environment to 2050 A Foresight Approach to Construction and Development features chapters covering data and trends including historical data and UK and international case studies policies and practice related to the field current state of scientific understanding key challenges key technological advances including disruptive and systemic technological innovations change issues and critical uncertainties and future visions It provides A strong conceptual framework based on a Foresight approach Discussion of the key data and trends that underpin each chapter Coverage of both construction and property development Specially commissioned chapters by academics and practitioners A synthesis of the main findings in the book and key insights for the future to 2050 Sustainable Futures in the Built Environment to 2050 A Foresight Approach to Construction and Development is an important book for postgraduate students and researchers construction real estate and property development specialists engineers planners architects foresight and futures studies specialists and anyone involved in sustainable buildings Technoscience in Progress Simone Arnaldi,Andrea Lorenzet,Federica Russo,2009 Nanotechnology seems to escape boundaries and definitions The Rush to Nanoscale spreads throughout different sites and arenas involving a multiplicity of actors meanings and spaces in which they emerge The uncertainty of nanotechnology appears to be both a condition and a consequence of this situation This volume adds to the collective effort of charting the multiple and heterogeneous dimensions that characterize nanotechnology by analyzing the numerous modalities through which different stakeholders and actors provide definitions attribute meaning and sense to nano enabled innovations The chapters of the book attempt to highlight how nanotechnologies their discourse and their actual and potential implications cannot be isolated in laboratories factories markets and separate discussion arenas *Assessing the Societal Implications of Emerging Technologies* Evan Michelson,2016-05-12 A growing problem of interest in the field of science and technology policy is that the next generation of innovations is arriving at an accelerating rate and the governance system is struggling to catch up Current approaches and institutions for effective technology assessment are ill suited and poorly designed to proactively address the multidimensional interconnected societal impacts of science and technology advancements that are already taking place and expected to continue over the course of the 21st century This book offers tangible insights into the strategies deployed by well known high profile organizations involved in anticipating the various societal and policy implications of nanotechnology and synthetic biology It focuses predominantly on an examination of the practices adopted by the often cited and uniquely positioned Project on Emerging Nanotechnologies in the United States as well as being informed by comparisons with a range of institutions also interested in embedding forward looking perspectives in their respective area of innovation The book lays out one of the first actionable roadmaps that other interested stakeholders can follow when working toward institutionalizing anticipatory governance practices throughout the

policymaking process      **Making the Medieval Relevant** Chris Jones, Conor Kostick, Klaus Oschema, 2019-12-02 When scholars discuss the medieval past the temptation is to become immersed there to deepen our appreciation of the nuances of the medieval sources through debate about their meaning But the past informs the present in a myriad of ways and medievalists can and should use their research to address the concerns and interests of contemporary society This volume presents a number of carefully commissioned essays that demonstrate the fertility and originality of recent work in Medieval Studies Above all they have been selected for relevance Most contributors are in the earlier stages of their careers and their approaches clearly reflect how interdisciplinary methodologies applied to Medieval Studies have potential repercussions and value far beyond the boundaries of the Middle Ages These chapters are powerful demonstrations of the value of medieval research to our own times both in terms of providing answers to some of the specific questions facing humanity today and in terms of much broader considerations Taken together the research presented here also provides readers with confidence in the fact that Medieval Studies cannot be neglected without a great loss to the understanding of what it means to be human

**Additive Manufacturing** Steinar Westhrin Killi, 2017-09-07 Additive manufacturing has matured from rapid prototyping through the now popular and maker oriented 3D printing recently commercialized and marketed The terms describing this technology have changed over time from rapid prototyping to rapid manufacturing to additive manufacturing which reflects largely a focus on technology This book discusses the uptake use and impact of the additive manufacturing and digital fabrication technology It augments technical and business oriented trends with those in product design and design studies It includes a mix of disciplinary and transdisciplinary trends and is rich in case and design material The chapters cover a range of design centered views on additive manufacturing that are rarely addressed in the main conferences and publications which are still mostly and importantly concerned with tools technologies and technical development The chapters also reflect dialogues about transdisciplinarity and the inclusion of domains such as business and aesthetics narrative and technology critique This is a great textbook for graduate students of design engineering computer science marketing and technology and also for those who are not students but are curious about and interested in what 3D printing really can be used for in the near future      CIMA E3 Strategic Management BPP Learning Media, 2014-07-31 BPP Learning Media provides

comprehensive materials that highlight the areas to focus on for your exams and complement the syllabus to increase your understanding      *Foresight* Lawrence W. Sherman, David Allan Feller, 2016-10-13 Foresight is a process that is found in all areas of human endeavour and survival from politics to music to interplanetary events In this provocative volume eight distinguished scholars present eight different perspectives on the concept of foresight investigating its ability to both predict and change the future      **Planning Regional Futures** John Harrison, Daniel Galland, Mark Tewdwr-Jones, 2021-09-30

Planning Regional Futures is an intellectual call to engage planners to critically explore what planning is and should be in how cities and regions are planned This is in a context where planning is seen to face powerful challenges professionally

intellectually and practically in ways arguably not seen before planning is no longer solely the domain of professional planners but opened up to a diverse group of actors the link between the study of cities and regions which traditionally had a disciplinary home in planning schools and the like steadily eroded as research increasingly takes place in interdisciplinary research institutes the advent of real time modelling posing fundamental challenges for the type of long term perspective that planning has traditionally afforded regional planning and its mixed record of achievement and the link between region and planning becoming decoupled as alternative regional and other spatial approaches to planning have emerged This book takes up the intellectual and practical challenge of planning regional futures moving beyond the narrow confines of existing debate and providing a forum for debating what planning is and should be for in how we plan cities and regions The chapters in this book were originally published as a special issue of *Regional Studies*

**CIMA E3 BPP Learning Media**, 2012-08-01 CIMA offers a business qualification with a finance focus aiming to produce members with accounting prowess who are skilled in strategic decision making 98% of its members work in business the highest proportion of any worldwide accountancy body Paper E3 Enterprise Strategy is a wide ranging exam that includes aspects of strategic analysis choice and implementation To pass candidates need both technical knowledge and the ability to apply their knowledge to specific scenarios The syllabus is split into four areas Interacting with the Competitive Environment 20% Change Management 20% Evaluation of Strategic Options 30% Implementation of Strategic Plans 30% The first section explores the impact and influence of an organisation's environment on its strategy An organisation needs to take account of its environmental context as well as its own internal capabilities when assessing the strategic options available to it Having identified these options it then has to evaluate them to decide which is the most appropriate to pursue The E3 syllabus recognises that implementing strategic plans involves managing change and 20% of the syllabus is now devoted to issues involved in managing the change process Change Management has not previously been examined at Strategic Level in the CIMA exams The final section of the syllabus looks at the ways organisations control and measure the performance of the strategies they have implemented The E3 Study Text provides you with comprehensive coverage of the principles of business strategy and how they can be applied to design and implement enterprise strategies The Text also offers a range of short

case studies which illustrate how business strategy ideas are applied in the real world In the E3 exam your ability to apply knowledge to a scenario is as important as pure knowledge but it is still crucial to have a sound understanding of the key terms and ideas The key terms feature in the text will help you identify these key terms while the section summaries provide a convenient overview of each section of the text

*Territorial Impact Assessment* Eduardo Medeiros, 2020-11-19 This book presents a comprehensive debate and analysis of existing Territorial Impact Assessment TIA methodologies designed under the auspices of the ESPON programme since the mid 2000s This is intended to serve as a TIA handbook for the reader to better understand the main differences advantages and shortcomings of each presented TIA methodology It also serves as a manual for professors and students in the field of policy evaluation and territorial analysis as it presents concrete examples of the implementation of each TIA methodology their formulas and intrinsic evaluation elements The purpose of policy evaluation methodologies is to check the main effects of private and public investments in order to report back to policymakers and citizens on their efficiency and effectiveness Over the past decades both in Europe and worldwide there has been an increasingly awareness of the need to implement reinforce policy evaluation practices at all territorial levels At the same time it has become widely accepted that many policy interventions produce impacts in more than one dimensions of territorial development In this context the use of a holistic and territorial approach for policy impact assessment evaluation has rapidly been adopted by the European Commission as a mainstream policy evaluation procedure

*Designing Complexity: The Methodology and Practice of Systems Oriented Design* Birger Sevaldson, 2022-11-20 This book addresses one of the most pressing issues of our time How can we design for with and in service of the complex world we live in How can we be useful as designers in a rapidly changing world due to technological political and social processes as well as climate change and nature destruction Designers have some beneficial skills for planning with complex systems in mind yet some old habits need to be overcome Design's traditional purpose and role has been to solve problems find order organize and simplify Yet the concept of designing complexity goes against these established beliefs because complexity cannot be designed away So instead we present ways to live with influence and benefit from complex systems There is no one right way presented in this book Instead many experiences approaches and perspectives are collected and presented The process this book offers is a methodology called Systems Oriented Design SOD SOD is a design methodology and practice primarily geared toward understanding and working with complex systems Several systems theories influence it yet it remains true to its origin the core of designing SOD is a living and adaptable methodology Though it is based on design thinking and design methodology it is easily adapted and applied by anybody working with complex change processes

European Higher Education at the Crossroads Adrian Curaj, Peter Scott, Lazăr Vlasceanu, Lesley Wilson, 2012-03-18 Romania hosts the 2012 Bologna European Higher Education Area Ministerial Conference and the Third Bologna Policy Forum In preparation for these meetings The Executive Agency for Higher Education Research Development and Innovation Funding UEFISCDI

organised the Future of Higher Education Bologna Process Researchers Conference FOHE BPRC in Bucharest on 17-19 October 2011 with the support of the European University Association EUA and the Romanian National Committee for UNESCO. The conference brought the voices of researchers into international level policy making in higher education. The results of the conference are presented in this book. Until now, empirical evidence supporting policies and reforms in higher education has often been a matter of local or regional focus. The development of a pan-European process in higher education policy drives a need to explore wider research topics on which to base policies. This book offers an unprecedented opportunity for higher education researchers to interact and contribute to the political process shaping the European Higher Education Area (EHEA) and to national policy agendas in more than 100 participant countries for the 2012 ministerial events. The book collects more than 50 articles focusing on vital issues in European higher education. These are arranged in sections addressing the European Higher Education Area (EHEA) Principles, Teaching and Learning, Quality Assurance, Mobility, Higher Education Governance in the EHEA, Funding of Higher Education, Diversification of Higher Education, Missions, Higher Education Futures and Foresight.
