Remember Lisa Genova, 2021-03-23 NEW YORK TIMES BESTSELLER A fascinating exploration of the intricacies of how we remember, why we forget, and what we can do to protect our memories from the Harvard-trained neuroscientist and bestselling author of *Still Alice*. Using her expertise as a neuroscientist and her gifts as a storyteller, Lisa Genova explains the nuances of human memory. Steven Pinker, Johnstone Professor of Psychology, Harvard University, author of *How the Mind Works*: Have you ever felt a crushing wave of panic when you can't for the life of you remember the name of that actor in the movie you saw last week, or you walk into a room only to forget why you went there in the first place? If you're over forty, you're probably not laughing. You might even be worried that these lapses in memory could be an early sign of Alzheimer's or dementia. In reality, for the vast majority of us, these examples of forgetting are completely normal. Why? Because while memory is amazing, it is far from perfect. Our brains aren't designed to remember every name we hear, plan we make, or day we experience. Just because your memory sometimes fails doesn't mean it's broken or succumbing to disease. Forgetting is actually part of being human. In *Remember*, neuroscientist and acclaimed novelist Lisa Genova delves into how memories are made and how we retrieve them. You'll learn whether forgotten memories are temporarily inaccessible or erased forever, and why some memories are built to exist for only a few seconds, like a passcode, while others can last a lifetime, like your wedding day. You'll come to appreciate the clear distinction between normal forgetting, where you parked your car, and forgetting due to Alzheimer's, that you own a car. And you'll see how memory is profoundly impacted by meaning, emotion, sleep, stress, and context. Once you understand the language of memory and how it functions, its incredible strengths and maddening weaknesses, its natural vulnerabilities and potential superpowers, you can both vastly improve your ability to remember and feel less rattled when you inevitably forget. You can set educated expectations for your memory and, in doing so, create a better relationship with it. You don't have to fear it anymore. And that can be life-changing.

Transformations of Memory and Forgetting in Sixteenth-Century France Nicolas Russell, 2011-04-29 This book proposes that in a number of French Renaissance texts, we observe a shift in thinking about memory and forgetting. Focusing on a corpus of texts by Marguerite de Navarre, Pierre de Ronsard, and Michel de Montaigne, it explores several parallel transformations of and challenges to classical and medieval discourses on memory.

The End of Memory

Miroslav Volf, 2006 Can one forget atrocities Should one forgive abusers Ought we not hope for the final reconciliation of all the wronged and all wrongdoers alike even if it means spending eternity with perpetrators of evil We live in an age when it is generally accepted that past wrongs genocides terrorist attacks bald personal injustices should be constantly remembered But Miroslav Volf here proposes the radical idea that letting go of such memories after a certain point and under certain conditions may actually be the appropriate course of action While agreeing with the claim that to remember a wrongdoing is to struggle against it Volf notes that there are too many ways to remember wrongly perpetuating the evil committed rather than guarding against it In this way the just sword of memory often severs the very good it seeks to defend He argues that remembering rightly has implications not only for the individual but also for the wrongdoer and for the larger community Volf's personal stories of persecution offer a compelling backdrop for his search for theological resources to make memories a wellspring of healing rather than a source of deepening pain and animosity Controversial thoughtful and incisively reasoned *The End of Memory* begins a conversation hard to ignore
