Adventures of a Church Historian Leonard J. Arrington,1998 Adventures of a Church Historian details how Leonard J Arrington opened up archival resources and presided for a time over an unprecedented era of enlightenment as he and those working under his aegis produced path breaking works of Mormon scholarship Arrington was the first professional historian and the first noncentral authority to serve as church historian of the Church of Jesus Christ of Latter day Saints a position he held from 1972 to 1982 Arrington s church appointment came at a crucial point in LDS history when the institution was being transformed from a regional church whose ecclesiastical hierarchy directly presided over its congregants into a modern worldwide church with an elaborate bureaucracy His description of conducting research in the LDS Church Archives in the days of Elder Joseph Fielding Smith and Brother A Will Lund provides a rare glimpse into the inner workings of the LDS First Presidency and Quorum of the Twelve Apostles Riveting chapters on the actions of the controversial Historical Department reveal details of Arrington s release and replacement as the old system gave way to the new

Attributing Authorship Harold Love,2002-06-20 Recent literary scholarship has seen a shift of interest away from questions of attribution Yet these questions remain urgent and important for any historical study of writing and have been

given a powerful new impetus by advances in statistical studies of language and the coming on line of large databases of texts in machine searchable form The present book is the first comprehensive survey of the field from a literary perspective to appear for forty years It covers both traditional and computer based approaches to attribution and evaluates each in respect of their potentialities and limitations It revisits a number of famous controversies including those concerning the authorship of the Homeric poems books from the Old and New Testaments and the plays of Shakespeare Written with wit as well as erudition Attributing Authorship will make this intriguing field accessible for students and scholars alike No Innocent Deposits Richard J. Cox,2004 The public increase of interest in the past has not necessarily brought with it a greater understanding about how archives are formed To this end Richard Cox takes a serious look at archival repositories and collections Cox suggests that archives do not just happen but are consciously shaped and sometimes distorted by archivists the creators of records and other individuals and institutions In this series of essays Cox offers archivists rare insight into the fundamentals of appraisal and historians and other users of archives the opportunity to appreciate the collections they all too often take for granted Real or Fake Joe Nickell,2009-07-17 The man who is the embodiment of the Mythbusters Sherlock Holmes and Richard Feynman weeds out the treasures from the shams in artifact investigations Michael Shermer founding publisher of Skeptic magazine Detailing how the pros determine whether an Abraham Lincoln signature is forged or if a photograph of Emily Dickinson is genuine Nickell a leader in forgery detection and forensic investigation provides the essential tools necessary to identify counterfeits In this general introduction to the principles of authentication Nickell provides readers with step by step explanations of the science used to detect falsified documents photographs and other objects illustrating methods used on hit shows such as Antiques Roadshow and History Detectives Including fascinating cases drawn from Nickell s illustrious career Real or Fake combines historical and scientific investigations to reveal reproductions and genuine objects Nickell explains the warning signs of forgery such as patching and unnatural pen lifts chronicles the evolution of writing instruments inks and papers shows readers how to date photographs papers and other materials and traces the development of photographic processes since the mid nineteenth century Lavishly illustrated with examples of replicas and authentic objects inspected by Nickell Real or Fake includes case studies of alleged artifacts including Jack the Ripper s diary a draft of the Gettysburg Address notes by Charles Dickens Jefferson Davis s musket and debris from the Titanic An expert on antique ink and paper and the forensic analysis of historic documents The New Yorker Nickell advocates a multifaceted approach that looks at provenance content material composition and scientific analysis Maine Antique Digest Authorship Contested Amy E. Robillard,Ron Fortune,2015-06-12 This volume explores a dimension of authorship not given its due in the critical discourse to this point authorship contested Much of the existing critical literature begins with a text and the proposition that the text has an author The debates move from here to questions about who the author is whether or not the author s identity is even relevant and what relationship she or he does and does

not have to the text The authors contributing to this collection however ask about circumstances surrounding efforts to prevent authors from even being allowed to have these questions asked of them from even being identified as authors They ask about the political cultural economic and social circumstances that motivate a prospective audience to resist an author's efforts to have a text published read and discussed Particularly noteworthy is the range of everyday rhetorical situations in which contesting authorship occurs from the production of a corporate document to the publication of fan fiction Each chapter also focuses on particular instances in which authorship has been contested demonstrating how theories about various forms of contested authorship play out in a range of events from the complex issues surrounding peer review to authorship in the age of intelligent machines *Abducting Writing Studies* Sidney I Dobrin, Kyle Jensen, 2016-11-28 This collection is organized around the concept of abduction a logical operation introduced by Charles Sanders Peirce that explains how new ideas are formed in response to an uncertain future Responding to this uncertain future with rigor and insight each essay imagines new methods concepts and perspectives that extend writing studies research into startling new terrain To appeal to a wide range of audiences the essays work within foundational areas in rhetoric and composition research such as space time archive networks inscription and life Some of the essays take familiar concepts such as historiography the writing subject and tone and use abduction to chart new paths forward Others use abduction to identify areas within writing studies such as futural writing the calling of place and risk that require more sustained attention Taken together these essays expose the manifold pathways that writing studies research may pursue Each of the twelve essays that comprise this collection sparks new insights about the phenomenon of writing A must read for rhetoric and composition scholars and students *Abducting Writing Studies* is sure to foster vibrant discussions about what is possible in writing research and instruction *The Papers of the Bibliographical Society of America* Bibliographical Society of America, 1996

Abducted: Can Cops Catch the Kidnapper? Archives and the Public Good Richard J. Cox, David A. Wallace, 2002-06-30 This volume widens the perspective of the roles that records play in society As opposed to most writings in the discipline of archives and records management which view records from cultural historical and economical efficiency dimensions this volume highlights that one of the most salient features of records is the role they play as sources of accountability a component that often brings them into daily headlines and into courtrooms Struggles over control access preservation destruction authenticity accuracy and other issues demonstrate time and again that records are not mute observers and recordings of activity Rather they are frequently struggled over as objects of memory formation and erasure The 14 powerful case studies focus around four closely related themes explanation secrecy memory and trust They demonstrate how records compel shape distort and recover social interactions across space and time The diverse range of case studies includes the ownership of the Martin Luther King Jr papers the destruction of records on Nazi war criminals in Canada the politics of documents in the Iran Contra affair the failure of records management in the U S Internal Revenue Service the publication of tobacco company documents on the World Wide Web access to records associated with the U S government's infamous Tuskegee syphilis study the role of the U S National Archives in identifying assets looted by the Nazis in the wake of the Holocaust the destruction of public records by the South African government during apartheid's final years the construction of foreign relations of the U S documentary histories the forgery corrupting recordkeeping systems and the collapse of foreign indigenous commercial banks

Rowe, Julian Rrushi, 2016-09-23 This book is an introduction to both offensive and defensive techniques of cyberdeception Unlike most books on cyberdeception this book focuses on methods rather than detection It treats cyberdeception techniques that are current novel and practical and that go well beyond traditional honeypots It contains features friendly for classroom use 1 minimal use of programming details and mathematics 2 modular chapters that can be covered in many orders 3 exercises with each chapter and 4 an extensive reference list Cyberattacks have grown serious enough that understanding and using deception is essential to safe operation in cyberspace The deception techniques covered are impersonation delays fakes camouflage false excuses and social engineering Special attention is devoted to cyberdeception in industrial control systems and within operating systems This material is supported by a detailed discussion of how to plan deceptions and calculate their detectability and effectiveness Some of the chapters provide further technical details of specific deception techniques and their application Cyberdeception can be conducted ethically and efficiently when necessary by following a few basic principles This book is intended for advanced undergraduate students and graduate students as well as computer professionals learning on their own It will be especially useful for anyone who helps run important and essential computer systems such as critical infrastructure and military systems *The Emperor's Mirror* Russell J. Barber, Frances Berdan, 1998-10 Russell J Barber and Frances F Berdan have created the ultimate guide for anyone doing cross cultural and or document driven research Presenting the essentials of primary source methodology The Emperor s Mirror includes nine chapters on paleography calendrics source and quantitative analysis and the visual interpretation of artifacts such as pictographs illustrations and maps As an introduction to ethnohistory this book clearly defines terminology and provides practical and accessible examples effectively integrating the concerns of historians and anthropologists as well as addressing the needs of anyone using primary sources for research in any academic field A leading theme throughout the book is the importance of a researcher s awareness of the inherent biases of documents while doing research on another culture Documents are the result of people interpreting reality through the filter of their own experience personality and culture Barber and Berdan s reality mediation model shows students how to analyze documents to detect the implicit biases or subtexts inherent in primary source materials Students and scholars working with primary sources will particularly appreciate the case studies that Barber and Berdan use to illustrate the practical implications of using each methodology These case studies not only apply method to actual research but also are fascinating in their own right they range from a discussion of the debate over Tupinamba cannibalism to the illustration of Nahuatl Spanish and hybrid place names of

Tlaxcala Mexico Counting Paul Benjamin L. White, 2025-04-15 Who wrote the Pauline Epistles For nearly 1 700 years the answer seemed fairly straightforward The New Testament canon set the boundary at thirteen or fourteen including Hebrews Pauline Epistles alongside an uncontroversial biographical framework within which to imagine them in Acts In the early nineteenth century the identification of the historical Paul with the canonical Paul was severed when theologian Ferdinand Christian Baur of the University of Tübingen laid the groundwork for the fundamental historiographical moves that still orient Pauline Studies as a critical discipline by both delimiting the number of authentic Pauline Epistles and highlighting the tendentious character of Acts portrayal of Paul Given the highly uncertain and subjective nature of so much of the argumentation over the authenticity of the Pauline Epistles as it developed in the nineteenth century the analysis of authorial style took on increasing weight as a way out of so many special decisions The linguistic features of texts were counted averaged and compared In measuring one text against another the Pauline stylome emerged as the incontrovertible standard for uncovering canonical forgeries in the Apostle's name Tracing the long history of the computational approach to the Pauline authorship problem Counting Paul exposes the ideological foundations and questionable science of much of the work and argues that Pauline biography ought not be written from fewer sources than what the New Testament has given us but rather more It advocates for a more expansive vision of what might count as Pauline by reorienting our focus away from internal criteria like appeals to style and toward external criteria like the reception of Paul in the generations after his death
