Formal Approaches To Dps In Old Romanian Brills Studies In Historical Linguistics:

Formal Approaches to DPs in Old Romanian Virginia Hill, 2015-04-21 Formal approaches to DPs in Old Romanian offers the first collection of papers on this topic published in English All the analyses adopt the conceptual tools of generative grammar to explain the syntactic peculiarities of Old Romanian nouns synchronically and diachronically Old Romanian noun syntax displays non trivial peculiarities both in the internal structure of the DP e g inflected possessive marker polydefinite agreement optional definite article on proper nouns and in the way the DP is used in clause derivation e g variable location of object pronouns reanalysis of the relative item from phrasal to head The analyses emphasize the relevance of the data for a finer grained typology of Romance Balkan languages as well as for the theory of grammar **Manual of Romance**

Morphosyntax and Syntax Andreas Dufter, Elisabeth Stark, 2017-09-25 This volume offers theoretically informed surveys of topics that have figured prominently in morphosyntactic and syntactic research into Romance languages and dialects We define syntax as being the linguistic component that assembles linguistic units such as roots or functional morphemes into grammatical sentences and morphosyntax as being an umbrella term for all morphological relations between these linguistic units which either trigger morphological marking e g explicit case morphemes or are related to ordering issues e g subjects precede finite verbs whenever there is number agreement between them All 24 chapters adopt a comparative perspective on these two fields of research highlighting cross linguistic grammatical similarities and differences within the Romance language family In addition many chapters address issues related to variation observable within individual Romance languages and grammatical change from Latin to Romance [The Diachrony of Differential Object Marking in Romanian](#)

Virginia Hill, Alexandru Mardale, 2021-06-15 This book provides a comprehensive investigation of the origins development and stabilization of differential object marking DOM in Romanian DOM a means by which a grammar distinguishes between objects based on semantic features such as animacy or definiteness has been a fruitful area of research in syntax historical linguistics and typology In this volume Virginia Hill and Alexandru Mardale demonstrate that Romanian DOM reflects a typological mix of Balkan and Romance patterns and is in fact composed of three distinct mechanisms Their analysis of these mechanisms reveals that DOM triggers in Romanian are located in the nominal domain in contrast to languages such as Spanish where they are located in the verbal domain The cross linguistic perspective adopted in the volume sheds light on existing typologies of DOM particularly in relation to the variation observed in the merging location of the DOM particle and of the doubling pronominal clitic **Biolinguistic Investigations on the Language Faculty** Anna Maria Di

Sciullo, 2016-11-24 The papers assembled in this volume aim to contribute to our understanding of the human capacity for language the generative procedure that relates sounds and meanings via syntax Different hypotheses about the properties of this generative procedure are under discussion and their connection with biology is open to important cross disciplinary work Advances have been made in human animal studies to differentiate human language from animal communication

Contributions from neurosciences point to the exclusive properties of the human brain for language Studies in genetically based language impairments also contribute to the understanding of the properties of the language organ This volume brings together contributions on theoretical and experimental investigations on the Language Faculty It will be of interest to scholars and students investigating the properties of the biological basis of language in terms the modeling of the language faculty as well as the properties of language variation language acquisition and language impairments

Grammaticalization Scenarios from Europe and Asia Walter Bisang, Andrej Malchukov, 2020-09-21 This volume intends to fill the gap in the grammaticalization studies setting as its goal the systematic description of grammaticalization processes in genealogically and structurally diverse languages To address the problem of the limitations of the secondary sources for grammaticalization studies the editors rely on sketches of grammaticalization phenomena from experts in individual languages guided by a typological questionnaire

The Syntax of Old Romanian Gabriela Pană Dindelegan, Martin Maiden, 2016 A comprehensive synchronic and diachronic overview of the syntax of old Romanian targeted at a non Romanian readership It draws on an extensive new corpus analysis of the period between the beginning of the 16th century and the end of the 18th century

Word Order and Parameter Change in Romanian Alexandru Nicolae, 2019-06-06 The book provides a comprehensive description and in depth analysis of the major word order changes that took place in the clausal and the nominal domains in the transition from old to modern Romanian The data are set in a comparative Romance perspective with attention also paid to the impact of the Balkan Sprachbund and the influence of Old Church Slavonic Alexandru Nicolae's analysis is based on a qualitative and quantitative examination of a large number of phenomena in a representative corpus of old Romanian texts Some of these phenomena such as scrambling interpolation discontinuous constituents and variation in the position and linearization of DP internal adjectival modifiers are found across Romance while others such as the low position for pronominal cliticization are relatively rare Still others are specific to old and modern Romanian such as the proclitic and enclitic realization of the same pronominal clitic the low definite article and the adjectival article construction From an empirical perspective the volume fills a gap in the Romance linguistics literature as several of the phenomena it explores have been largely neglected to date More broadly it offers a valuable contribution to research into word order typology and change the nature and content of syntactic parameters and the theory of grammaticalization and syntactic change

Diachronic Variation in Romanian Gabriela Pană Dindelegan, Adina Dragomirescu, Rodica Zafiu, 2014-11-19 This volume represents the first work published in English dealing with the historical grammar of Romanian from a modern theoretical perspective It consists of a selection of papers focusing on the historical grammar of Romanian bringing together diverse theoretical approaches in order to address a number of key morphological and syntactic issues in the history of the morphosyntactic development of Romanian The majority of papers in this volume deal with topics in Romanian historical syntax drawing on modern research methods and current linguistic theory with a clear preference for

parametric syntax The most significant areas of grammar namely the nominal domain and the verbal domain are well represented in this volume **The Diachrony of Differential Object Marking in Romanian** Virginia Hill,Alexandru Mardale,2021 This book provides a comprehensive investigation of the origins development and stabilization of differential object marking DOM in Romanian It shows that Romanian DOM is a combination of Balkan and Romance patterns and sheds light on existing typological approaches
