Security and Defence Policy in the European Union Jolyon Howorth,2014-06-10 The Common Security and Defence Policy CSDP has come a long way since its inception as the European Security and Defence Identity under NATO Yet more than a decade after emerging as an autonomous entity with its own capacity for civilian crisis management and military action the European Union s CSDP is still very much a work in progress This fully revised and updated new edition provides the most comprehensive account available of the CSDP and the debates surrounding it Written by a leading authority in the field the second edition draws on the author s own extensive research in the area including hundreds of interviews with key actors and takes account of developments since the reforms of the Lisbon Treaty A brand new chapter assesses international relations theory and European integration theory as tools to understand the CSDP and critically engages with theoretical approaches that view security and defence policy as the exclusive domain of sovereign nation states The book concludes with an analysis of future hurdles for the European Union as it responds to new and often unpredictable crises across the globe

European Defence Decision-Making Antonio Calcara, 2020-03-02 This book comparatively examines the preferences of four key arms producing states towards European joint armaments programmes The European defence market is characterised by a mixture of inter state competition and European cooperation and this work assesses why countries sometimes decide to cooperate with their partners while in other instances they refrain from doing so In order to shed light on this empirical puzzle the book focuses on state defence industry relations in the four major European arms producers France Germany Italy and the UK The main argument is that the public or private governance of industrial suppliers and market size are the two decisive variables that explain the simultaneous presence of cooperation and competition in European defence procurement Specifically it argues that in public governance ecosystems arms industries are able to capture the state's decision making processes to their own advantage In private governance ecosystems the state is relatively autonomous from defence industry's influence and able to pursue larger macro economic and military benefits Moreover the strategy pursued by governments and defence firms is decisively shaped by market size because of its importance in determining the relative costs and benefits of collaborative arrangements This book will be of much interest to students of EU policy defence studies European politics and International Relations

Operation EUFOR

TCHAD/RCA and the European Union's Common Security and Defense Policy Bjoern H. Seibert, 2010 Addressing security challenges posed by weak and failed states will require increasingly demanding military interventions often over a great distance and prolonged periods of time As a result of several engagements over the last decade the U S military has gained valuable experience in undertaking stability operations However the United States should not be expected to fulfill such operations alone we must look to our partners and allies to share some of the global responsibility In this Europe is unquestionably the most capable and natural U S ally While most U S policymakers are familiar with the North Atlantic Treaty Organization developments in the field of security and defense within the European Union EU have thus far received little attention in the United States despite the EU's increasing importance One such operation in Africa Operation EUFOR TCHAD RCA provides a look inside the workings of an EU military operation highlights successes and failures and draws lessons learned

French Defence Policy Since the End of the Cold War Alice Pannier, Olivier Schmitt, 2020-12-27 This book describes the evolution of French defence policy since the end of the Cold War For the past thirty years there have been

significant changes to French defence policy as a result of several contextual evolutions. Changes include shifts in the global balance of power, new understandings of the notion of international security, economic downturns and developments in European integration. Yet despite these changes, the purpose of France's grand strategy and its main principles have remained remarkably stable over time. This book identifies the incentives, representations and objectives of French defence policy. The authors examine the general mechanisms that influence policy change and military transformation in democracies, the importance of status seeking in international relations, the processes of strategy making by a middle power and the dilemmas and challenges of security cooperation. By doing so, the book raises a number of questions related to the ways states adjust or not their security policies in a transformed international system. This book makes French language sources available to non-French speaking readers and contributes to a better understanding of a country that is at the forefront of Europe's external action. This book will be of great interest to students of defence studies, French politics, military studies, security studies and IR in general.

Theorising the European Union as an International Security Provider

Annemarie Peen Dodt, Richard Whitman, Stefan Wolff, 2018-02-02. The European Union has increasingly taken on a role as international security provider that extends beyond the geographical scope of its membership. This is clear from the wide range of military and civilian crisis management missions that the Union has undertaken but also identifiable through its other policies such as the European Neighbourhood Policy and development assistance which have also to some extent become security focused. Yet the role of the EU as an international security provider remains under-theorized and weakly understood. The proposed book analyses the Union's role as an international security provider in a comprehensive way, developing theoretical as well as empirical grounding for the understanding of the making and implementation of EU security policy. The contributions in this book cover actors involved in the policy making process, the dynamics of this process itself, its outcomes, strategies and policies and their impact on the ground. They examine the relevance of and apply existing theories of international relations, international security and foreign policy analysis to the specific case of the EU, investigate empirically how particular policies are formulated and implemented and study the impact and effectiveness of the Union as an international security provider in a variety of cases compared. This book was previously published as a special issue of *Global Society*.

European Security in NATO's Shadow Stephanie C. Hofmann, 2013-01-03. NATO has been a successful forum for managing European security policy. Yet European governments have repeatedly tried to build a new security institution in NATO's shadow. In this innovative book, Stephanie C. Hofmann asks why governments attempted to create an additional institution despite no obvious functional necessity and why some attempts failed while others succeeded. *European Security in NATO's Shadow* considers security cooperation through the lens of party ideologies to shed new light on these questions. She observes that political parties are motivated to propose new institutions by their multidimensional ideologies. Moreover, the success of efforts to create such institutions depends on the degree of ideological congruence among parties in power. In

particular the relationship between the values of multilateralism sovereignty and Europe informed the impetus and success rate of the attempts made during negotiations for the Maastricht Amsterdam and Nice treaties to create a European security institution

War and Intervention in the Transnational Public Sphere Cathleen Kantner, 2015-10-05 The post Cold War era saw an unexpected increase in intra state violence against ethnic and religious groups brutal civil wars and asymmetric conflicts Those crises posed fundamental questions for the European Union and its member states to which Europe has so far proven unable to develop satisfactory answers This book contends that public debates over wars and humanitarian military interventions after the Cold War represent an evolving process of comprehension and collective interpretation of new realities Employing innovative computer linguistic methods it examines the dynamics of this debate across Europe and compares it to that of the United States In doing so it argues that transnational political communication has shaped European identity formation in significant ways and that in trying to come to terms with important crises and institutional events shared understandings of Europe have emerged Looking at evidence from a wide range of countries including Austria France Germany Ireland the Netherlands and the United Kingdom and spanning a continuous period of 16 years this book empirically analyses these shared understandings of the EU as a problem solving and ethical community This book will be of interest to students and scholars of international relations EU politics security studies comparative politics political communication and European integration

The EU and Military Operations Katarina Engberg, 2013-10-30 This book is a comparative study which aims to answer the question under what circumstances does the EU undertake military operations Since 2003 the EU has carried out six military operations What accounts for this historic development The EU and Military Operations examines the dynamics behind the EU s collective use of force and situates the EU in the context of a global division of labour with regard to military crisis management It centres on the study of two main cases of EU military operations the non case when an operation was planned in the Lebanon war 2006 but did not occur and the positive case of EUFOR RD Congo that same year Drawing upon these findings the author creates an innovative analytical framework based upon the techniques of defence planning and applies this to the cases studies with the purpose of identifying the main driving and inhibiting factors behind the operations Key findings derived from this analysis include the growing importance of local actors in facilitating or impeding the EU s deployment of military force and the enhanced role of regional organisations as security providers The book will be of much interest to students of European security EU politics strategic studies humanitarian intervention security studies and IR in general

The European Union and the Use of Military Force Tommi Koivula, 2016-05-26 Koivula examines the discursive space related to the use of military force by the European Union EU By examining the EU s relationship to its use of military force during the course of its history and by demonstrating that the contemporary discursive space of the EU military dimension is incoherent in nature and contains inherent contradictions he seeks to answer the related question of whether extreme forms of military enforcement for example killing is appropriate for

the EU **Diplomacy and Security Community-Building** Niklas Bremberg, 2015-09-16 This book contributes to the ongoing debate in IR on the role of security communities and formulates a new mechanism based analytical framework It argues that the question we need to ask is how security communities work at a time when armed conflicts among states have become significantly less frequent compared to other non military threats and trans boundary risks e g terrorism and the adverse effects of climate change Drawing upon recent advances in practice theory the book suggests that the emergence and spread of cooperative security practices ranging from multilateral diplomacy to crisis management are as important for understanding how security communities work as more traditional confidence building measures Using the EU Spain and Morocco as an in depth case study this volume reveals that through the institutionalization of multilateral venues the EU has provided cooperative frameworks that otherwise would not have been available and that the de territorialized notion of security threats has created a new rationale for practical cooperation between Spanish and Moroccan diplomats armed forces and civilian authorities Within the broader context this book provides a mechanism based framework for studying regional organizations as security community building institutions and by utilizing that framework it shows how practice theory can be applied in empirical research to generate novel and thought provoking results of relevance for the broader field of IR This book will be of much interest to students of multilateral diplomacy European Politics foreign policy security studies and IR in general **The Oxford Handbook of the European Union** Erik Jones, Anand Menon, 2012-08-30 This is an authoritative one volume and independent treatment of the history functioning and nature of the European integration Written by a selection of leading scholars It covers the major institutions policies and events in the history of integration whilst also providing a guide to the major theoretical approaches that have been used to study it over time By bringing together such a distinguished cast covering such a wide array of themes the Handbook is intended as a one stop shop for all those interested in the European Union and its predecessors Written in an accessible style the volume is intended to shape the discipline of EU studies and to establish itself as the essential point of reference for all those interested in European integration both in universities and more broadly It represents a timely guide to an institution that is much discussed but often only imperfectly understood
