**Benchmarking Working**

Europe 2012 European Trade Union Institute, 2012 Since 2001 the ETUC and ETUI have produced Benchmarking Working Europe for the European Social Summit to draw attention to the state of working Europe This publication aims to provide a genuine benchmarking exercise applied to the world of labour and social affairs grounded in effective labour and social rights It establishes what progress or lack of it has taken place in selected areas of significance for social Europe and of importance to the trade unions This year's edition of Benchmarking Working Europe focuses on what we see as one of the root causes of the great recession namely the issue of inequalities going far beyond income inequality Growing inequalities lead to growing feelings of injustice and lack of social cohesion both within and across countries and at the same time to a loss of human potential in its broadest sense In this respect this publication raises serious concerns as to the current direction of social and labour rights in the European Union Four main messages which we would like to highlight are 1 Social inequality in its many forms is worsening in nearly all EU countries and not only on account of the succession of financial economic and debt crises 2 Between the EU member states the trend for the poorer economies to catch up with the richer ones leading to greater convergence has been halted and even reversed 3 The European discourse that new post crisis growth will solve the temporary phenomenon of rising inequalities is fundamentally flawed The link between growth and equality has snapped and the tide is no longer rising for all 4 The political remedies must in future focus on a redistribution and deconcentration of wealth

*Golden Growth* Indermit S. Gill,Martin Raiser,2012-04-25 The public debt crisis in Europe has shaken the confidence not just in the Euro but in the European model Aging and uneconomical Europeans are being squeezed between innovative Americans and efficient Asians it is said With debt and demographics dragging down them down one hears that European economies will not grow much unless radically new ways are discovered The end of complacency in Europe is a good thing but this loss of confidence could be dangerous The danger is that in a rush to rejuvenate growth the attractive attributes of the European development model could be abandoned along with the weak In fact the European growth model has many strong points and enviable accomplishments One can say without exaggeration that Europe had invented a convergence machine taking in poor countries and helping them become high income economies World Bank research has identified 27 countries that have grown from middle income to high income since 1987 a few thanks to the discovery and exploitation of massive natural resources e g oil in Oman and Trinidad and Tobago several others like Japan Hong Kong Singapore Taiwan and South Korea embracing aggressive export led strategies which involved working and saving a lot postponing political liberties and looking out only for themselves But half of the countries that have grown from middle income to high income Croatia Cyprus Czech Republic Estonia Greece Hungary Latvia Malta Poland Portugal Slovak Republic and Slovenia are actually in Europe This is why the European model was so attractive and unique and why with some well designed efforts it ought to be made right again

**The UK Regional-National Economic**

**Problem** Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government
