New York Magazine, 1997-07-21 New York magazine was born in 1968 after a run as an insert of the New

York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea **Cincinnati Magazine** ,2001-08 Cincinnati Magazine taps into the DNA of the city exploring shopping dining living and culture and giving readers a ringside seat on the issues shaping the region **Participatory Budgeting in Global Perspective** Brian Wampler,Stephanie McNulty,Michael Touchton,2021-07-15 Participatory Budgeting continues to spread across the globe as government officials and citizens adopt this innovative democratic program in the hopes of strengthening accountability civil society and well being Governments often adapt PB s basic program design to meet local needs thus creating wide variation in how PB programs function Some programs retain features of radical democracy others focus on community mobilization and yet other programs seek to promote participatory development Participatory Budgeting in Global Perspective provides a theoretical and empirical explanation to account for widespread variation in PB s adoption adaptation and impacts This book develops six PB types to account for the wide variation in how PB programs function as well as the outcomes they produce To illustrate the similar patterns across the globe four empirical chapters present a rich set of case studies that illuminate the wide differences among these programs chapters are organized regionally with chapters on Latin America Asia Sub Saharan Africa Europe and North America By organizing the chapters regionally it becomes clear that there are temporal spatial economic and organizational factors that produce different programs across regions but similar programs within each region A key empirical finding is that the change in PB rules and design is now leading to significant differences in the outcomes these programs produce We find that some programs successfully promote accountability expand civil society and improve well being but too often researchers do not have any evidence tying PB to significant social or political change *Participatory Budgeting in the United States* Victoria Gordon,Jeffery L. Osgood, Jr.,Daniel Boden,2016-10-04 Although citizen engagement is a core public service value few public administrators receive training on how to share leadership with people outside the government Participatory Budgeting in the United States serves as a primer for those looking to understand a classic example of participatory governance engaging local citizens in examining budgetary constraints and priorities before making recommendations to local government Utilizing case studies and an original set of interviews with community members elected officials and city employees this book provides a rare window onto the participatory budgeting process through the words and experiences of the very individuals involved The central themes that emerge from these fascinating and detailed cases focus on three core areas creating the participatory budgeting infrastructure increasing citizen participation in participatory budgeting and assessing and increasing the impact of participatory budgeting This book provides students local government elected officials practitioners and citizens with a comprehensive understanding of participatory budgeting and straightforward guidelines to

enhance the process of civic engagement and democratic values in local communities

Participatory Budgeting Michiel S. De Vries, Juraj Nemec, David Špaček, 2022-11-28 This book analyses the participatory budgeting practice as it has evolved in evaluated countries focusing on what is substantially at stake concerning the budget and issues involved the actual participation the way such processes are organised and administered and the outcomes of such processes It concludes that participatory budgeting in selected European countries is far away from the level of best practice but that all experiences are not just trivial pursuits The information collected serves to check to what extent participatory budgeting as practiced in the countries involved presents a real attempt to change municipal budgets towards addressing the needs of marginalized groups and to improve decision making based on local democracy and participation or whether these processes as such are to be judged to be more important than any output and outcomes The practices can neither be seen as a process of policy diffusion nor as a process of policy mimesis The terminology of participatory budgeting remains but the tools to achieve the goals resulted only in marginal changes in the status quo in municipalities in European countries practicing participatory budgeting instead of resulting in radical changes to increase spending in favor of marginalized groups Chapter 15 Unraveled Practices of Participatory Budgeting in European Democracies is available open access under a CC BY 4.0 license

Real Money, Real Power? Daniel Williams, Don Waisanen, 2020-10-28 New York City has the largest council sponsored Participatory Budgeting PB processes in North America From its inception in Brazil PB was a process that empowered the least advantaged members of the community by providing a way to propose budget allocations through voting This book reports on a multi methodological study of New York City's participatory budgeting PB process from the perspective of a city resident over time A participatory budgeting slogan purports that the initiative offers real power and real money to constituents at a local level To critically examine such top down assertions and different than much that has been written about PB this book researches and navigates its events the way a member of the community would see it The study reveals a lack of transparency manipulation by city agencies the favorable treatment of insider proposed projects and a failure to reveal the basis of project costs It also finds that there is no singular participatory budgeting project in New York City Instead there are numerous participatory budget projects as many as there are council members who engage in the practice This book provides a ground level view of these limitations and recommends substantial reform

Is Participatory Democracy the Answer? Molly E. Hamilton, 2014 This dissertation uses the case of Participatory Budgeting PB in Brazilian municipalities from 1989-2008 to evaluate the motivations for and effects of citizen participation in local budgetary decisions Policies permitting citizen participation in local politics are being promoted around the world as a wholesale solution to a variety of problems ranging from corruption to voter apathy to inequality In the Brazilian case the specific purposes of PB are improving public services and increasing citizen involvement in decision making and the policy is generally popular among citizens In light of these dual demands I argue that there are two potential theories derived from literature on voting and

democratic theory more broadly that can explain the widespread popularity of participatory budgeting 1 PB is popular because it provides instrumental material benefits such as improved public services to citizens and 2 PB is popular because it provides intrinsic benefits the act of participating or having the option to participate is itself valuable to citizens I begin by testing these competing theories of intrinsic and instrumental motivation for participation using subjective survey data from Porto Alegre the flagship case of PB both in Brazil and around the world I find that participants are fairly evenly divided between these two motivations however the distribution is dependent on demographics those with high socioeconomic status are much more likely to participate for intrinsic purposes than instrumental ones In the second part of the dissertation I use objective quantitative measures to systematically test the instrumental effects of Participatory Budgeting on spending patterns public service provision and human welfare in all 562 Brazilian municipalities over 50 000 residents 25 percent of which implemented Participatory Budgeting at some point between 1992 and 2008 After correcting for endogeneity I find that while PB does produce a change in spending patterns it does not produce a corresponding change in service provision or welfare Together these findings suggest that while instrumental benefits may be lacking PB should not be summarily dismissed as a result It was adopted to address two related demands from citizens 1 improved public services particularly for poor citizens and 2 opportunities for citizens to be involved in municipal decision making It could be that success in one of these areas is sufficient to justify its popularity

The Transformative Potential of Participatory Budgeting George Robert Bateman, Jr., 2019-12-06 In this book George Robert Bateman Jr presents a philosophical examination of the potential benefits of participatory budgeting PB with recommendations of how they might be realized The work of social philosophers like Thomas Jefferson John Dewey Robert Putnam are studied to better understand the potential benefits and their effect on individuals and communities Using social provisioning and John Fagg Foster s theories of instrumental value and institutional adjustment Bateman demonstrates how participatory budgeting in New York City PBNYC can realize its full potential and transform individual participants into their better selves and also transform their communities This transformation can occur when participants are able to make decisions about things that matter in their lives As more of us become empowered and actively engaged in deliberations concerning local economic political issues the more we will experience public happiness greater understanding of others greater development of our morality and an increased sense of belonging The Transformative Potential of Participatory Budgeting will be of great interest to scholars in the fields of normative political theory political philosophy local politics heterodox economics institutional economics political sociology urban sociology and community sociology
