European Intellectual History From Rousseau To Nietzsche

Sara Brill, Catherine McKeen

European Intellectual History From Rousseau To Nietzsche:

European Intellectual History from Rousseau to Nietzsche Frank Miller Turner, 2014-01-01 Turner's lectures distilled modern European history from the Enlightenment to the dawn of twentieth century and conveyed the turbulence of a rapidly changing era in European history through its ideas and leading figures Dust jacket [European Intellectual History from Rousseau to Nietzsche](#) Frank M. Turner, 2015-02-12 One of the most distinguished cultural and intellectual historians of our time Frank Turner taught a landmark Yale University lecture course on European intellectual history that drew scores of students over many years His lectures lucid accessible beautifully written and delivered with a notable lack of jargon distilled modern European history from the Enlightenment to the dawn of the twentieth century and conveyed the turbulence of a rapidly changing era in European history through its ideas and leading figures Richard A Lofthouse one of Turner's former students has now edited the lectures into a single volume that outlines the thoughts of a great historian on the forging of modern European ideas Moreover it offers a fine example of how intellectual history should be taught rooted firmly in historical and biographical evidence [European Thought and Culture, 1350-1992](#) Michael J. Sauter, 2021-06-06 This book explores the main currents of European thought between 1350 and 1992 which it approaches in two principal ways culture as produced by place and the progressive unmooring of thought from previously set religious and philosophical boundaries The book reads the period against spatial thought's history spatial sciences such as geography or Euclidean geometry to argue that Europe cannot be understood as a continent in intellectual terms or its history organized with respect to traditional spatial geographic categories Instead we need to understand European intellectual history in terms of a culture that defined its own place as opposed to a place that produced a given culture It then builds on this idea to argue that Europe's overweening drive to know more about humanity and the cosmos continually breached the boundaries set by venerable religious and philosophical traditions In this respect spatial thought foregrounded the human at the unchanging's expense with European thought slowly becoming unmoored as it doggedly produced knowledge at wisdom's expense Michael J Sauter illustrates this by pursuing historical themes across different chapters including European thought's exit from the medieval period the Renaissance the Reformation the Scientific Revolution the Enlightenment and Romanticism the Industrial Revolution and war and culture offering a thorough overview of European thought during this period The book concludes by explaining how contemporary culture has forgotten what early modern thinkers such as Michel de Montaigne still knew namely that too little skepticism toward one's own certainties makes one a danger to others Offering a comprehensive introduction to European thought that stretches from the late fourteenth to the late twentieth century this is the perfect one volume study for students of European intellectual history [Cytherica](#) Josef Chytrý, 2005 *Cytherica* boldly introduces a new faculty of thought called cytherics to contemporary academic discursivities It defines cytherics as the sighting and siting of an aesthetic erotic or aphrodisian environment Building on the furthest extensions of aesthetics since the eighteenth century

cytherics develops both the aesthetic political and aesthetic erotic dimensions of the aesthetic tradition to formulate exciting new responses to the pressing issues of contemporary societies While drawing richly on the background of German and European Hellenism this book provides valuable new insights for those working in the areas of the aesthetic political critical theory postmodernist discursivities and dialectical speculation The Routledge Handbook of Women and Ancient Greek Philosophy Sara Brill, Catherine McKeen, 2024-03-29 The Routledge Handbook of Women and Ancient Greek Philosophy is an essential reference source for cutting edge scholarship on women gender and philosophy in Greek antiquity The volume features original research that crosses disciplines offering readers an accessible guide to new methods new sources and new questions in the study of ancient Greek philosophy and its multiple afterlives Comprising 40 chapters from a diverse international group of experts the Handbook considers questions about women and gender in sources from Greek antiquity spanning the period from 7th c BCE to 2nd c BCE and in receptions of Greek antiquity from the Roman Imperial period through the European Renaissance to the current day Chapters are organized into five major sections I Early Greek antiquity including Sappho Presocratic philosophy Sophists and Greek tragedy 700s 400s BCE II Classical Greek antiquity including Aeschines Plato and Xenophon 400s 300s BCE III Late Classical Greek to Hellenistic antiquity including Cyrenaics Cynics the Hippocratic corpus and Aristotle 300s 200s BCE IV Late Greek antiquity to Roman Imperial period including Pythagorean women Stoics Pyrrhonian Skeptics and late Platonists 200s BCE to 700s CE V Later receptions including Shakespeare the European Renaissance Anna Julia Cooper W E B DuBois Jane Harrison Sarah Kofman and Toni Morrison The Routledge Handbook of Women and Ancient Greek Philosophy is a vital resource for students and scholars in philosophy Classics and gender studies who want to gain a deeper understanding of philosophy s rich past and explore sources and questions beyond the traditional canon The volume is a valuable resource as well for students and scholars from history humanities literature political science religious studies rhetorical studies theatre and LGBTQ and sexuality studies **Rethinking Modern European Intellectual History** Darrin M. McMahon, Samuel Moyn, 2014-03 Modern European intellectual history is thriving as never before It has recovered from an era in which other trends like social and cultural history threatened to marginalize it But in spite of enjoying a contemporary renaissance the field has lost touch with the tradition of debating why and how to study ideas and thus lacks both a well articulated set of purposes and a range of arguments for exactly what it means to pursue those purposes This volume revives that tradition Recalling past attempts to showcase the diversity and differentiation of modern European intellectual history this volume also documents how much has changed in recent decades Some authors are much readier to defend a history of ideas practiced over the long term once the defining sin of the field Others go so far as to insist on how ideas are always open to reappropriation and reevaluation beyond their original contexts suggesting that it is an error to reduce the ideas to those contexts Others still argue that under threat from trends like social history intellectual historians have forsaken any attempt to resolve for themselves how ideas are socially embodied The

volume also registers old and new trends in history that have affected the study of ideas including the history of science the history of academic disciplines the history of psychology and self international and global history and women s and gender history

Edinburgh Critical History of Nineteenth-Century Christian Theology Daniel Whistler, 2017-10-23 Bridges the gap between Plutarch Studies and Achaemenid Studies through analysis of key texts

The Consolations of History: Themes of Progress and Potential in Richard Wagner's *Götterdämmerung* Alexander Shapiro, 2019-10-16 In this book on Richard Wagner s compelling but enigmatic masterpiece *Götterdämmerung* the final opera of his monumental Ring tetralogy Alexander H Shapiro advances an ambitious new interpretation which uncovers intriguing new facets to the work s profound insights into the human condition By taking a fresh look at the philosophical and historical influences on Wagner and critically reevaluating the composer s intellectual worldview as revealed in his own prose works letters and diary entries the book challenges a number of conventional views that continue to impede a clear understanding of this work s meaning The book argues that *Götterdämmerung* and hence the Ring as a whole achieves coherence when interpreted in terms of contemporary nineteenth century theories of progress and in particular G W F Hegel s philosophies of mind and history A central target of the book is the article of faith that has come to dominate Wagner scholarship over the years that Wagner s encounter in 1854 with Arthur Schopenhauer s philosophy conclusively altered the final message of the Ring from one of historical optimism to existential pessimism The author contends that Schopenhauer s uncompromising denigration of the will and denial of the possibility for human progress find no place in the written text of the Ring or in a plausible reading of the final musical setting In its place the author discovers in the famous Immolation Scene a celebration of mankind s inexhaustible capacity for self improvement and progress The author makes the further compelling case that this message of progress is communicated not through Siegfried the traditional male hero of the drama but through Brunnhilde the warrior goddess who becomes a mortal woman In her role as a battle tested world historical prophet she is the true revolutionary change agent of Wagner s opera who has the strength and vision to comprehend and thereby shape human history This highly lucid and accessible study is aimed not only at scholars and researchers in the fields of opera studies music and philosophy and music history but also Wagner enthusiasts and readers and students interested in the history and philosophy of the nineteenth century

The Perils of Human Exceptionalism Dennis L. Durst, 2022-07-18 Over the course of the nineteenth century transatlantic intellectuals slowly revised theological anthropology or the doctrine of humanity seen in light of the divine Gradually elite discourse deposed humanity from its lofty estate and centering it within a naturalistic account wherein likeness to animal fauna became the central evaluative lens Durst argues that theological anthropologies across the disciplines increasingly shifted focus away from classic confessional themes such as the soul and the image of God and toward the methods of natural theology and intuitionism This occurred in the form of challenges to theology in biology phrenology transcendentalism anti theology Christian socialism intuitionism and religious experience The human soul and

human sinfulness also found a revised articulation in terms increasingly shaped by the cultural authority of science An ascendant subjective approach to human nature emerged whereby religious experiences not theological claims to truth assumed prominence as the central measures of religious life *Working to Make a Difference* Samuel Totten, 2003-01-01 This work is comprised of personal essays by some of the most noted Holocaust educators working in or with Holocaust museums resource centers or educational organizations across the globe These distinguished contributors from the United States Great Britain Israel Canada South Africa Germany and Poland each delineate the genesis and evolution of their own thought and work in the field of Holocaust education Their personal narratives discuss those individuals and or scholarly works that have most influenced them their aspirations the frustrations they have faced their perception of the field their major contributions their current endeavors and the legacy they hope to leave upon the completion of their careers

Modern European Intellectual History David Galaty, 2022-01-27 This non technical introduction to modern European intellectual history traces the evolution of ideas in Europe from the turn of the 19th century to the modern day Placing particular emphasis on the huge technological and scientific change that has taken place over the last two centuries David Galaty shows how intellectual life has been driven by the conditions and problems posed by this world of technology In everything from theories of beauty to studies in metaphysics the technologically based modern world has stimulated a host of competing theories and intellectual systems often built around the opposing notions of the power of the individual versus collectivist ideals like community nation tradition and transcendent experience In an accessible jargon free style *Modern European Intellectual History* unpicks these debates and historically analyses how thought has developed in Europe since the time of the French Revolution Among other topics the book explores The Kantian Revolution Feminism and the Suffrage Movement Socialism and Marxism Nationalism Structuralism Quantum theory Developments in the Arts Postmodernism Big Data and the Cyber Century Highly illustrated with 80 images and 10 tables and further supported by an online Instructor's Guidet this is the most important student resource on modern European intellectual history available today **Revelation and Reconciliation**, 2021-02-25 This substantially revised second edition of *Revelation and Reconciliation* first published by Cambridge University Press in 1995 gives a fresh account of the intellectual breakdown of Christianity in the West In contrast to the familiar focus on epistemological questions and the collision between reason and revelation Stephen Williams argues that underlying this collision is a deeper conflict between belief in human moral self sufficiency and Christian belief in reconciliation in history Taking issue with thinkers including the philosopher of science Michael Polanyi and the theologian Colin Gunton the argument proceeds by examining the contributions of Descartes Locke Barth and Nietzsche before coming to conclusions on the theological reading of intellectual history and the prospects of revitalising a contemporary Christian belief in reconciliation in history Students of both theology and the history of modern thought will find in Williams analysis an alternative interpretation of the balance of forces in post Reformation Western thought with implications for how they should

be addressed *European Intellectual History Since 1789* Roland N. Stromberg,1990 *Intellectual History and Culture Wars in Central and Eastern Europe in the Light of Modern Theories of Religion* LIT Verlag,2024-07-01 The book addresses events in the Slovenian lands and the broader Central European context from the second half of the 19th century to the beginning of the Second World War It focuses on phenomena and personalities in the field of religion which cannot be fully understood without considering other aspects processes and events in the areas of culture art politics and more which the book s authors thoroughly explore This makes the book an interdisciplinary work that integrates approaches from theology religious studies philosophy historiography cultural studies and related fields into a coherent whole This comprehensive approach offers an understanding that transcends these individual disciplines shedding new light on the events discussed

Primitivist Modernism Sieglinde Lemke,1998 Insisting on modernism s two way cultural flow Lemke demonstrates not only that white modernism owes much of its symbolic capital to the black Other but that black modernism built itself in part on white Euro American models Through readings of individual texts and images fifteen examples of which are reproduced in this volume Lemke reforms our understanding of modernism She shows us that transatlantic modernism in both its high and popular modes was significantly more diverse than commonly supposed Students and scholars of modernism African American studies and cultural studies and those with interests in twentieth century art dance music or literature will find this book rewarding *The Descent of Ideas* Donald R. Kelley,2017-09-29 The history of ideas better known these days as intellectual history is a flourishing field of study which has been the object of much controversy but hardly any historical exploration This major new work from Donald R Kelley is the first comprehensive history of intellectual history tracing the study of the history of thought from ancient medieval and early modern times its emergence as the history of ideas in the 18th century and its subsequent expansion The point of departure for this study is the perspective opened up by Victor Cousin in the early 19th century on Eclecticism and its association with the history of philosophy established by Renaissance scholars Kelley considers a broad range of topics including the rivalry between ideas and language the rise of cultural history the contributions of certain 19th and 20th century practitioners of the history of ideas in interdisciplinary areas of philosophy literature and the sciences and finally the current state of intellectual history The central theme of the book is the interplay between the canon of philosophical thought and the tradition of language and textual study the divergence of the latter marking the descent of ideas into the realm of cultural history **A Companion to Intellectual History** Richard

Whatmore,Brian Young,2015-10-27 *A Companion to Intellectual History* provides an in depth survey of the practice of intellectual history as a discipline Forty newly commissioned chapters showcase leading global research with broad coverage of every aspect of intellectual history as it is currently practiced Presents an in depth survey of recent research and practice of intellectual history Written in a clear and accessible manner designed for an international audience Surveys the various methodologies that have arisen and the main historiographical debates that concern intellectual historians Pays special

attention to contemporary controversies providing readers with the most current overview of the field Demonstrates the ways in which intellectual historians have contributed to the history of science and medicine literary studies art history and the history of political thought Named Outstanding Academic Title of 2016 by Choice Magazine a publication of the American Library Association

European Intellectual History Since Darwin and Marx W. Warren Wagar, 1967 For the European intellectual historian the period since 1870 falls into four phases the positivist generation of the Seventies and Eighties when the work of Darwin and Marx had reached full fruition the anti intellectualist generation of 1890 1914 in which Dilthey and Freud are representative figures the age of the World Wars which shattered faith in progress and the contemporary period since 1945 a kind of ice age of the spirit when even iconoclasm is d mod and fresh departures are rare Without exhausting the rich variety of thought during the past hundred years each of the essays presented here takes a broad synoptic view of a major trend in the history of ideas seen in the context of the times Author

Heidegger's Black Notebooks Andrew J. Mitchell, Peter Trawny, 2017-09-05 From the 1930s through the 1970s the philosopher Martin Heidegger kept a running series of private writings the so called Black Notebooks The recent publication of the Black Notebooks volumes from the war years have sparked international controversy While Heidegger s engagement with National Socialism was well known the Black Notebooks showed for the first time that this anti Semitism was not merely a personal resentment They contain not just anti Semitic remarks they show Heidegger incorporating basic tropes of anti Semitism into his philosophical thinking In them Heidegger tried to assign a philosophical significance to anti Semitism with the Jew or world Judaism cast as antagonist in his project How then are we to engage with a philosophy that no matter how significant seems contaminated by anti Semitism This book brings together an international group of scholars from a variety of disciplines to discuss the ramifications of the Black Notebooks for philosophy and the humanities at large Bettina Bergo Robert Bernasconi Martin Gessmann Sander Gilman Peter E Gordon Hans Ulrich Gumbrecht Michael Marder Eduardo Mendieta Richard Polt Tom Rockmore Peter Trawny and Slavoj i ek discuss issues including anti Semitism in the Black Notebooks and Heidegger s thought more broadly such as German conceptions of Jews and Judaism Heidegger s notions of metaphysics and anti Semitism s entanglement with Heidegger s views on modernity and technology grappling with material as provocative as it is deplorable In contrast to both those who seek to exonerate Heidegger and those who simply condemn him and rather than an all or nothing view of Heidegger s anti Semitism they urge careful reading and rereading of his work to turn Heideggerian thought against itself These measured and thoughtful responses to one of the major scandals in the history of philosophy unflinchingly take up the tangled and contested legacy of Heideggerian thought
