European Union Law After Maastricht: Practical Guide for Lawyers Outside the Common Market Ralph Folsom, Ralph B. Lake, Ved P. Nanda, 1996-06-27

The emergence of Europe as a unified trading block has profound implications for those who do business with European countries. European Union Law is written for lawyers and business professionals who require information about the changes that are taking place as a result of the unification process in the member states of the European Union. Unlike other materials on Europe, this book is written primarily for lawyers outside the EU. The book serves three important functions. It provides a comprehensive introduction to European law, law-making institutions, and dispute settlement mechanisms. It presents European legal regimes for the general areas which are relevant to foreign lawyers, including corporate law, environmental regulation, securities regulation, antitrust law, mergers and acquisitions, licensing, product liability, and dumping. It examines the European regulations of some important specific industries such as broadcasting and telecommunications. The editors and authors of this work are among the most prominent academic and professional authorities in the area of European Law. This book is the single most useful reference tool for those in need of current European Union information. **The**

**European Court's Political Power** Karen Alter, 2010-06-17 Karen Alter's work on the European Court of Justice heralded a new level of sophistication in the political analysis of the controversial institution through its combination of legal understanding and active engagement with theoretical questions. *The European Court's Political Power* assembles the most important of Alter's articles written over a fourteen-year span, adding an original new introduction and a conclusion that takes an overview of the Court's development and current concerns. Together, the articles provide insight into the historical and political contours of the ECJ's influence on European politics, explaining how and why the impact of an institution can vary so greatly over time and across different issues. The book starts with the European Coal and Steel Community, where the ECJ was largely unable to facilitate greater member-state respect for ECSC rules. Alter then shows how legal actors orchestrated an activist transformation of the European legal system with the critical aid of jurist advocacy movements and via the co-optation of national courts. The transformation of the European legal system wrested control from member states over the meaning of European law, but the ECJ continues to have varying influence across different issues. Alter explains that the differing influence of the ECJ comes from the varied extent to which sub- and supra-national actors turn to it to achieve political objectives. Looking beyond the European experience, the book includes four chapters that put the ECJ into a comparative perspective, examining the extent to which the ECJ experience is a unique harbinger of the future role international courts may play in international and comparative politics. **The Development of International Investment Law**

Yusuf Caliskan, 2008 This dissertation analyses developments in the international regulation of foreign direct investment (FDI). The international legal framework of investment encompasses numerous binding or non-binding legal instruments, including customary international law, bilateral investment treaties, and international organizations' decisions and resolutions. The rules established by the international legal framework become effective and significant when they are able to be adapted by appropriate and compatible domestic law frameworks. Through analyzing the Turkish foreign investment regulations and

policies this study concludes that there is a successful and complex interaction between international rules and domestic rules on FDI Like many developing countries since the 1980s Turkey has revamped its FDI regulations in response to changes and developments in international investment law This interaction will reach its culmination if there is a comprehensive multilateral agreement on investment This dissertation examines failures of the OECD MAI draft treaty since there are lessons to be learned from the MAI negotiations Thus it makes some recommendations both in relation to the substance and the procedure for a possible future negotiation of multilateral investment agreement

**Oxford Principles of European Union Law** Robert Schütze,Takis Tridimas,2018-02-23 Since the 1957 Rome Treaty the European Union has changed dramatically in terms of its composition scope and depth Originally established by six Western European States the EU today has 28 Members and covers almost the entire European continent and while initially confined to establishing a common market the EU has come to influence all areas of political economic and social life In parallel with this enormous geographic and thematic expansion the constitutional and legislative principles underpinning the European Union have constantly evolved This three volume study aims to provide an authoritative academic treatment of European Union law Written by leading scholars and practitioners each chapter offers a comprehensive and critical assessment of the state of the law Doctrinal in presentation each volume nonetheless tries to present a broader historical and comparative perspective Volume I provides an analysis of the constitutional principles governing the European Union It covers the history of the EU the constitutional foundations the institutional framework legislative and executive governance judicial protection and external relations Volume II explores the structure of the internal market while Volume III finally analyses the internal and external substantive policies of the EU

*Sovereign (In) Equality in International Organizations* Athena Debbie Efraim,2021-10-25 This book challenges the dominant intellectual assumptions of mainstream international law scholarship regarding the principle of Sovereign Equality The animus and scope of this challenge is situated in the context of the decision making processes in International Governmental Organizations IGOs which employ the one state one vote and or the weighted voting rule Using the theories of Functionalism and Legitimacy to analyze the legal implications and complications of the principal voting mechanisms and voting practices of certain key IGOs vis vis the doctrine of Sovereign Equality the author establishes that this doctrine has remained far too orthodox for contemporary realities In this context she emphasizes the importance of the necessity for functional legitimate decision making processes in global governance and accordingly advocates the elimination of the anachronistic and non viable principle of Sovereign Equality from international institutional law The author also rejects the introduction of any new principle in IGOs e g democratic governance which will render decision making even less functional
