*Evaluation in Social Work* Yvonne A. Unrau, Peter A. Gabor, Richard M. Grinnell Jr., 2006-09-14 Social work practice is built upon the linkage between the objectives and goals of clients programs and agencies and the evaluation process is critical for making sure those links are strong Building on its earlier editions with seven new chapters and complete revisions of the others as well as a strong online companion website presence this text is more relevant and user friendly than ever It provides a straightforward introduction to program evaluation couched within the quantitative and qualitative traditions the approaches most commonly used to gain social work knowledge The result gives students a sound conceptual understanding of how evaluation can be used in the delivery of day to day services they will be offering your clients as well as the knowledge and skills necessary to demonstrate accountability The book builds upon the knowledge and skills of foundational social work research methods courses and assumes mastery of that material However the authors have created a uniquely accessible scheme that runs throughout the book in the form of a tree whose components trunk twigs leaves guide students through the book They focus on a series of goals from the basic preparedness for participation in evaluation activities and more advanced courses to the ability to actively produce and consume evaluative literature With its clear direct language focus on real life situations and many visual elements this new edition is poised to be the text of choice for students and instructors looking for the best way to learn and teach evaluation skills

6 editions the goals of the book have remained the same to prepare students to participate in evaluative activities within their organizations to prepare students to become critical producers and consumers of professional evaluative literature and to prepare students for more advanced evaluation courses and texts Grinnell Gabor and Unrau aim to meet these objectives by presenting a unique approach that is realistic practical applied and user friendly While a majority of textbooks focus on program level evaluation some recent books present case level evaluation methods but rely on inferentially powerful but difficult to implement experimental baseline designs This text assumes that neither of these approaches adequately reflects the realities of the field or the needs of students and beginning practitioners Instead Program Evaluation for Social Workers offers a blend of the two that demonstrates how they can complement one another The integration of case level and program level approaches provides an accessible adaptable and realistic framework for students to more easily grasp and implement in the real world
