Evaluative Morphology From A Cross Linguistic Perspective:

Evaluative Morphology from a Cross-Linguistic Perspective Livia Körtvélyessy, 2015-01-12 This book presents the results of the first interdisciplinary approach to evaluative morphology based on the intersection of evaluative morphology and areal typology and provides the first large scale typological research based on a sample of 200 languages Furthermore it also represents the first work dealing with evaluative morphology as a feature of Standard Average European by comparing the SAE and world samples Methodologically it introduces the parameter of Evaluative Morphology Saturation which identifies the richness of evaluative morphology in individual languages by reflecting the semantic word class and word formation aspects of evaluative morphology As such this book provides a new and innovative approach to studying the semantics of evaluative morphology and evaluative formation represented by two cognitively founded models a radial model of EM semantics and a model of evaluative formation It is also the first contrastive psycholinguistic work that studies phonetic iconicity in evaluative morphology by way of experimental research into five different age groups of informants speaking three different languages

Edinburgh Handbook of Evaluative Morphology Nicola Grandi, 2015-06-03 With examples drawn from over 200 world languages this ground breaking volume presents a state of the art overview of evaluative morphology

A Crosslinguistic Perspective on Clear and Approximate Categorization Hélène Vassiliadou, Marie Lammert, 2022-11-07 In recent decades research on clear and approximate categorizations and their manifestations in language has been generating a number of studies on syntax semantics pragmatics psycholinguistics philosophy and logic This is particularly interesting because these two operations have formally similar realizations even in languages belonging to different groups The existence of a large number of type nouns testifies to their productivity If these nouns serve to both categorize and approximate the fundamental question is that of identifying the processes of interpretation concerned since there is not always a consensus on interpretation This book makes it clear that there are different ways to reach the category associated with a word by putting into perspective the issues surrounding the categorization and approximation and by comparing the ways of expression in languages belonging to different language groups All in all by investigating syntactic morphological and semantic correlations between type noun binominals and other constructions in various languages this volume will provide an overview of the current state of research on the subject in order to help scholars and students to grasp the meaning and the cognitive foundations of approximation and categorization The functioning of each language might clarify the links between categorization and approximation two often opposed yet essentially indissociable operations

Complex Words Livia Körtvélyessy, Pavol Štekauer, 2020-10-08 A state of the art survey of complex words this volume brings together a team of leading international morphologists to demonstrate the wealth and breadth of the study of word formation Encompassing methodological empirical and theoretical approaches each chapter presents the results of cutting edge research into linguistic complexity including lexico semantic aspects of complex

words the structure of complex words and corpus based case studies Drawing on examples from a wide range of languages it covers both general aspects of word formation and aspects specific to particular languages such as English French Greek Basque Spanish German and Slovak Theoretical considerations are supported by a number of in depth case studies focusing on the role of affixes as well as word formation processes such as compounding affixation and conversion Attention is also devoted to typological issues in word formation The book will be an invaluable resource for academic researchers and graduate students interested in morphology linguistic typology and corpus linguistics

Derivational Networks Across Languages Lívia Körtvélyessy,Alexandra Bagasheva,Pavol Štekauer,2020-06-08 This pioneering research brings a new insight into derivational processes in terms of theory method and typology Theoretically it conceives of derivation as a three dimensional system Methodologically it introduces a range of parameters for the evaluation of derivational networks including the derivational role combinability and blocking effects of semantic categories the maximum derivational potential and its actualization in relation to simple underived words and the maximum and average number of orders of derivation Each language specific chapter has a unified structure which made it possible to identify in the final typologically oriented chapter the systematicity and regularity in developing derivational networks in a sample of forty European languages and in a few language genera and families This is supported by considerations about the role of word classes morphological types and the differences and similarities between word formation processes of the languages belonging to the same genus family

Classification from Antiquity to Modern Times Tanja Pommerening,Walter Bisang,2017-09-11 The volume presents phenomena of classification and categorisation in ancient and modern cultures and provides an overview of how cultural practices and cognitive systems interact when individuals or larger groups conceptually organize their world Scientists of antiquity studies anthropologists linguists etc will find methods to reconstruct early concepts of men and nature from a synchronic and diachronic comparative perspective

Word-Formation - Semantics and Pragmatics Peter O. Müller,Susan Olsen,Franz Rainer,2025-08-04 This reader is part of a five volume edition and comprises an in depth presentation of the state of the art in word formation Volume 3 places its emphasis on the semantic models and pragmatic features of complex words

Word-Formation Peter O. Müller,Ingeborg Ohnheiser,Susan Olsen,Franz Rainer,2015-07-01 This handbook comprises an in depth presentation of the state of the art in word formation The five volumes contain 207 articles written by leading international scholars The XVI chapters of the handbook provide the reader in both general articles and individual studies with a wide variety of perspectives word formation as a linguistic discipline history of science theoretical concepts units and processes in word formation rules and restrictions semantics and pragmatics foreign word formation language planning and purism historical word formation word formation in language acquisition and aphasia word formation and language use tools in word formation research The final chapter comprises 74 portraits of word formation in the individual languages of Europe and offers an innovative perspective These portraits afford the first overview of this kind

and will prove useful for future typological research This handbook will provide an essential reference for both advanced students and researchers in word formation and related fields within linguistics

Diminutives across Languages, Theoretical Frameworks and Linguistic Domains Stela Manova, Laura Grestenberger, Katharina Korecky-Kröll, 2023-12-18 This volume addresses a number of issues in current morphological theory from the point of view of diminutive formation such as the role of phonology in diminutives and hypocoristics and consequently its place in the overall architecture of grammar i e phonology first versus syntax morphology first theoretical analyses diminutives in the L1 acquisition of typologically diverse languages and the borrowing of non diminutive morphology for the expression of diminutive meanings among others Among the peculiarities of diminutive morphology discussed are the relation between diminutives and mass nouns the avoidance of diminutives in plural contexts in some languages and the relatively frequent semantic bleaching and reanalysis of diminutive forms cross linguistically Special attention is paid to the debate on the head versus modifier status of diminutive affixes corresponding to high versus low diminutives in alternative analyses with data from spoken and sign languages Overall the volume addresses a number of topics that will be of interest to scholars of almost all linguistic subfields and persuasions

Competition in Word-Formation Alexandra Bagasheva, Akiko Nagano, Vincent Renner, 2024-05-15 This volume focuses on a number of interrelated issues in the theorizing and interpretation of morphological rivalry including the differences between a semasiological and an onomasiological approach to competition phenomena in word formation the scope of such phenomena micro level rivalry between individual affixes as well as macro level competition between different processes the different sources of competition and the possible resolutions of competitive situations An overview of existing research in the field is provided as well as new cutting edge findings and proposals for analytical innovation Linguistic data are drawn from European and Asian languages and morphologists semanticists and anyone interested in the dynamics of language will be stimulated by the analytical models and explanations offered in the 11 chapters

Word-Formation in the World's Languages Pavol Štekauer, Salvador Valera, Livia Kórtvélyessy, 2012-04-23 Fills a gap in cross linguistic research by being the first systematic survey of the word formation of the world s languages Data from fifty five world languages reveals associations between word formation processes in genetically and geographically distinct languages

Competition in Inflection and Word-Formation Franz Rainer, Francesco Gardani, Wolfgang U. Dressler, Hans Christian Luschützky, 2019-09-17 This is the first volume specifically dedicated to competition in inflection and word formation a topic that has increasingly attracted attention Semantic categories such as concepts classes and feature bundles can be expressed by more than one form or formal pattern This departure from the ideal principle one form one meaning is particularly frequent in morphology where it has been treated under diverse headings such as blocking Elsewhere Condition Pini s Principle rivalry synonymy doublets overabundance suppletion and other terms Since these research traditions despite the heterogeneous terminology essentially refer to the same underlying problems this volume unites the phenomena studied

in this field of linguistic morphology under the more general heading of competition The volume features an extensive state of the art report on the subject and 11 research papers which represent various theoretical approaches to morphology and address a wide range of aspects of competition including morphophonology lexicology diachrony language contact psycholinguistics sociolinguistics and language acquisition

The Oxford Guide to the Transeurasian Languages

Martine Robbeets,Alexander Savelyev,2020-06-26 The Oxford Guide to the Transeurasian Languages provides a comprehensive account of the Transeurasian languages and is the first major reference work in the field since 1965 The term Transeurasian refers to a large group of geographically adjacent languages that includes five uncontroversial linguistic families Japonic Koreanic Tungusic Mongolic and Turkic The historical connection between these languages however constitutes one of the most debated issues in historical comparative linguistics In the present book a team of leading international scholars in the field take a balanced approach to this controversy integrating different theoretical frameworks combining both functional and formal linguistics and showing that genealogical and areal approaches are in fact compatible with one another The volume is divided into five parts Part I deals with the historical sources and periodization of the Transeurasian languages and their classification and typology In Part II chapters provide individual structural overviews of the Transeurasian languages and the linguistic subgroups that they belong to while Part III explores Transeurasian phonology morphology syntax lexis and semantics from a comparative perspective Part IV offers a range of areal and genealogical explanations for the correlations observed in the preceding parts Finally Part V combines archaeological genetic and anthropological perspectives on the identity of speakers of Transeurasian languages The Oxford Guide to the Transeurasian Languages will be an indispensable resource for specialists in Japonic Koreanic Tungusic Mongolic and Turkic languages and for anyone with an interest in Transeurasian and comparative linguistics more broadly

The Acquisition of Diminutives Ineta Savickienė,Wolfgang U. Dressler,2007-01-01 This cross linguistic volume innovates research of the acquisition of diminutives in the inflecting fusional languages Lithuanian Russian Croatian Greek Italian Spanish German and Dutch the agglutinating languages Turkish Hungarian and Finnish and in the introflecting Hebrew These languages differ in various aspects relevant for the acquisition of diminutives and the development of pragmatics in early child language Diminutive formation often tends to be the first pattern of word formation to emerge The main reason for this seems to lie in the pragmatic functions of endearment empathy and sympathy which make diminutives particularly appropriate for child centred communication A main topic of this book is the relation of emergence and early development between diminutives and other categories of word formation and inflection The greater degree of morphological productivity and transparency as well as phonological saliency favors the use of diminutives In this case diminutives may facilitate the acquisition of inflection

Contemporary Approaches to Baltic Linguistics Peter Arkadijev,Axel Holvoet,Björn Wiemer,2015-08-17 This book is a collection of articles dealing with various aspects of the Baltic languages Lithuanian Latvian and Latgalian which have only

marginally featured in the discourse of theoretical linguistics and linguistic typology The aim of the book is to bridge the gap between the study of the Baltic languages on the one hand and the current agenda of the theoretical and typological approaches to language on the other The book comprises 13 articles dealing with various aspects of phonology morphology syntax semantics lexicon and their interactions plus a lengthy introduction whose aim is to outline the state of the art in the research on the Baltic languages The contributions are data driven being based on field work corpus research and data published in the sources not accessible to the general linguistic audience On the other hand all contributions are informed in the relevant contemporary linguistic theories and in the advances of linguistic typology Some of the contributions aim at a more detailed accurate and theoretically informed description of the data others look at the Baltic material from a more theoretical point of view still others assume an areal typological or contact perspective **Language and Emotion.**
