The Dead Pledge Judge Earl Glock, 2021-04-06 The American government today supports a financial system based on mortgage lending and it often bails out the financial institutions making these mortgages The Dead Pledge reveals the surprising origins of American mortgages and American bailouts in policies dating back to the early twentieth century Judge Glock shows that the federal government began subsidizing mortgages in order to help lagging sectors of the economy such as farming and construction In order to encourage mortgage lending the government also extended unprecedented assistance to banks During the Great Depression the federal government made new mortgage lending and bank bailouts the centerpiece of its recovery program Both the Herbert Hoover and Franklin Roosevelt administrations created semipublic financial institutions such as Fannie Mae to provide cheap tradable mortgages and they extended guarantees to more banks and financiers Ultimately Glock argues the desire to protect the financial system took precedence over the desire to help lagging parts of the economy and the government became ever more tied into the financial world The Dead Pledge recasts twentieth century economic financial and political history and demonstrates why the greatest safety net created in this era was the one supporting finance

Summary of Gary Klein's The Power of Intuition Everest Media, 2022-05-10T22:59:00Z Please note This is a companion version not the original book

Sample Book Insights 1 We shouldn't simply follow our intuitions Our intuitions are not always reliable They can be wrong

and we must be careful not to follow them blindly We must strengthen our intuitions so that they become more accurate and provide us with better insights 2 We all have an intuition which is based on accumulated and compiled experiences We rely on intuition to make all sorts of judgments The magical view of intuition has been debunked and it is now understood that intuition is not a bias that must be suppressed 3 The researchers who are skeptical of intuition explain that they wouldn't want to risk their lives on their intuitive decisions But in a sense they do so every day Their immune systems make decisions every time their white blood cells come into contact with a new entity Is it safe or is it a threat 4 We need intuition but we can't use analysis to substitute for intuition We must therefore improve the quality of our intuitions if we want to make better intuitive decisions **Scientific and Technical Aerospace Reports**, 1987 The Spoken Word Curtis Peebles, 2003
