Michael Dominic Taylor, 2020-12-24 Will the ecological crises of our time be resolved using the same form of thought that has

brought them about Are technological prowess and political power the proper tools to address them Is there not a deeper connection between our ecological crises and our human social political economic and ethical crises This book argues that the popular approaches to ecological bioethical and other human crises are not working because they fail to examine the problem in its full depth This depth escapes us because we have abandoned true metaphysical reflection on the whole and substituted it unknowingly for a series of inadequate alternatives Both the technocratic paradigm that views all of nature mechanistically and its antagonists the eco philosophies that argue for the realities of intrinsic value relationality and beauty carry partial truths but are insufficient This book presents a more radical alternative rooted in the classical tradition yet fresh and vibrant The metaphysics of gift based in the giftedness of existence shared by all offers a deeper and more satisfying vision of all things that can transform our relationship with nature and touches every aspect of human life social political economic technical and ethical

Metaphysics and the Philosophy of Science Matthew Slater,Zanja Yudell,2017-02-01 The question of the proper role of metaphysics in philosophy of science is both significant and contentious The last few decades have seen considerable engagement with philosophical projects aptly described as the metaphysics of science inquiries into natural laws and properties natural kinds causal relations and dispositions At the same time many metaphysicians have begun moving in the direction of more scientifically informed scientific or naturalistic metaphysics And yet many philosophers of science retain a deep suspicion about the significance of metaphysical investigations into science This volume of new essays explores a broadly methodological question what role should metaphysics play in our philosophizing about science These new essays written by leading philosophers of science address this question both through ground level investigations of particular issues in the metaphysics of science and by more general methodological inquiry

An Introduction to Metametaphysics Tuomas E. Tahko,2015-11-12 This is the first systematic student introduction to metametaphysics examining the nature foundations and methodology of metaphysical inquiry Talking Seriously About God Asle Eikrem,Atle O. Søvik,2016 Talk about God is often the source of controversy Theists and atheists are equally passionate when making their stand for or against belief in God In this book a wide range of philosophers of religion have come together to discuss how serious talk about God ought to be conducted for theists and atheists alike in what should be their common pursuit for truth The essays both address methodological questions and provide a range of concrete samples of serious God talk spanning from political religion and classical proofs of God s existence to the problem of evil Series Nordic Studies in Theology Nordische Studien zur Atheism Vol 4 Subject Religious Studies

Unknowable Minds Mark Bailey,2025-02-04 Imagine that in the cold heart of a secret military facility a new form of intelligence awakens It is a synthetic mind born from intricate algorithms and complex computations operating in ways unfathomable to its human creators Charged with safeguarding national security this intelligence orchestrates strategies that defy human ethics and laws of war leaving its creators both awed and unnerved Unknowable Minds delves into the unsettling reality of entrusting

our safety to an intelligence that lacks human essence As we navigate the Age of Artificial Intelligence these systems powering everything from our smartphones to military defenses remain inherently opaque and unpredictable The book explores how AI differs from any technology we've ever developed its inherent complexities and the profound risks it poses to our future Drawing on philosophy AI theory and national security insights this book offers a thought provoking examination of AI's potential and peril From the complexities of neural networks to the unpredictable nature of emergent behaviors *Unknowable Minds* challenges us to rethink our relationship with AI and its role in the theater of global security Can we control an unknowable intellect or will it redefine human existence As we stand on the precipice of unprecedented technological advancement understanding and navigating the unknowable minds of artificial intelligences become a quest fraught with extraordinary challenges and existential questions

Philosophy in Reality Joseph E. Brenner, Abir U.

Igamberdiev, 2020-11-30 *Philosophy in Reality* offers a new vision of the relation between science and philosophy in the framework of a non propositional logic of real processes grounded in the physics of the real world This logical system is based on the work of the Franco Romanian thinker Stéphane Lupasco 1900-1988 previously presented by Joseph Brenner in the book *Logic in Reality* Springer 2008 The present book was inspired in part by the ancient Chinese Book of Changes *I Ching* and its scientific philosophical discussion of change The emphasis in *Philosophy in Reality* is on the recovery of dialectics and semantics from reductionist applications and their incorporation into a new synthetic paradigm for knowledge Through an original re interpretation of both classical and modern Western thought this book addresses philosophical issues in scientific fields as well as long standing conceptual problems such as the origin nature and role of meaning the unity of knowledge and the origin of morality In a rigorous transdisciplinary manner it discusses foundational and current issues in the physical sciences mathematics information communication and systems theory and their implications for philosophy The same framework is applied to problems of the origins of society the transformation of reality by human subjects and the emergence of a global sustainable information society In summary *Philosophy in Reality* provides a wealth of new perspectives and references supporting research by both philosophers and physical and social scientists concerned with the many facets of reality

The British National Bibliography Arthur James Wells, 2007

'The Trail of the Human Serpent Is Over Everything' Sami Pihlström, 2008 This book takes a fresh look at how William James 1842 1910 conceptions of the human mind death mortality and immortality and religion provide us with a viable alternative to many contemporary philosophical approaches The distinctive Jamesian perspective is illuminated through critical discussions of several different theories and conjectures The overall argument of this volume is that pragmatist metaphysics philosophy of mind and philosophy of religion must be subordinated to ethics To provide an historical and philosophical context for this revolutionary conception of the pragmatic method an introductory discussion of James views on pragmatism realism and truth is also included Instead of focusing on the general issues of realism and pragmatism however the volume examines the applications of these issues to topics such as death evil and other minds The book is vital reading not only for James scholars and pragmatists but for anyone thinking seriously about human mortality and the endless ethical challenges our life with other human beings that confront us
