Gothic Arches, Latin Crosses Ryan K. Smith, 2011-01-20 Crosses candles choir vestments sanctuary flowers and stained glass are common church features found in nearly all mainline denominations of American Christianity today Most Protestant churchgoers would be surprised to learn however that at one time these elements were viewed with suspicion as foreign implements associated strictly with the Roman Catholic Church Blending history with the study of material culture Ryan K Smith sheds light on the ironic convergence of anti Catholicism and the Gothic Revival movement in nineteenth century America Smith finds the source for both movements in the sudden rise of Roman Catholicism after 1820 when it began to grow from a tiny minority into the country s largest single religious body Its growth triggered a corresponding rise in anti Catholic activities as activists representing every major Protestant denomination attacked popery through the pulpit the press and politics At the same time Catholic worship increasingly attracted young genteel observers around the country Its art and its tangible access to the sacred meshed well with the era s romanticism and market based materialism Smith argues that these tensions led Protestant churches to break with tradition and adopt recognizably Latin art He shows how architectural and artistic features became tools through which Protestants adapted to America s new commercialization while simultaneously defusing the potent Catholic threat The results presented a colorful new religious landscape but they also illustrated the durability of traditional religious boundaries

Spaces of Enslavement Andrea C. Mosterman, 2021-10-15 In *Spaces of Enslavement* Andrea C Mosterman addresses the persistent myth that the colonial Dutch system of slavery was more humane Investigating practices of enslavement in New Netherland and then in New York Mosterman shows that these ways of racialized spatial control held much in common with the southern plantation societies In the 1620s Dutch colonial settlers brought slavery to the banks of the Hudson River and founded communities from New Amsterdam in the south to Beverwijck near the terminus of the navigable river When Dutch power in North America collapsed and the colony came under English

control in 1664 Dutch descendants continued to rely on enslaved labor Until 1827 when slavery was abolished in New York State slavery expanded in the region with all free New Yorkers benefitting from that servitude Mosterman describes how the movements of enslaved persons were controlled in homes and in public spaces such as workshops courts and churches She addresses how enslaved people responded to regimes of control by escaping from or modifying these spaces so as to expand their activities within them Through a close analysis of homes churches and public spaces Mosterman shows that over the course of the seventeenth and eighteenth centuries the region's Dutch communities were engaged in a daily struggle with Black New Yorkers who found ways to claim freedom and resist oppression Spaces of Enslavement writes a critical and overdue chapter on the place of slavery and resistance in the colony and young state of New York

stimulate this trend both by supplying local markets and by creating an incentive for farmers to visually distinguish their landscapes from those of the coal patch towns Illustrated with over 100 photographs maps drawings and diagrams From Sugar Camps to Star Barns demonstrates how much we can learn about the economy and culture of a particular place simply by being attentive to the built landscape
