Optimizing Play Christopher A. Paul, 2024-05-14 An unexpected take on how games work what the stakes are for them and how game designers can avoid the traps of optimization The process of optimization in games seems like a good thing who wouldn't want to find the most efficient way to play and win As Christopher Paul argues in *Optimizing Play* however optimization can sometimes risk a tragedy of the commons where actions that are good for individuals jeopardize the overall state of the game for everyone else As he explains players inadvertently limit play as they theorycraft seeking optimal choices The process of developing a meta or the most effective tactic available structures decision making causing play to stagnate A stale meta then creates a perception that a game is solved and may lead players to turn away from the game Drawing on insights from game studies rhetoric the history of science ecology and game theory literature Paul explores the problem of optimization in a range of video games including Overwatch FIFA EA Sports FC NBA 2K Clash Royale World of Warcraft and League of Legends He also pulls extensively from data analytics in sports where the problem has progressed further and is even more intractable than it is in video games given the money sports teams invest to find an edge Finally Paul offers concrete and specific suggestions for how games can be developed to avoid the trap set by optimization run amok

Billions at Play NJ Ayuk, 2020-12-15 Wall Street Journal Best Selling Book Two decades of negotiating African oil and gas deals have given NJ Ayuk a grasp of the continent's energy landscape that few can match The American educated African energy lawyer serves up generous doses of that insight in his second book *Billions at Play* The Future of Africa Energy and

Doing Deals Serving as a road map for the continent to do a better job of using its vast energy resources to improve its peoples lives Ayuk addresses how African countries can use their energy industries as springboards for diversifying and growing their overall economies In addition Ayuk shows how African governments and local companies can negotiate better deals with international energy companies and how the continent s countries can use marginal oil and gas fields to develop domestic energy industries that once strong will compete globally Questions posed and answered Why Africa s fledgling natural gas resources can allow the continent to emerge as a key global player in the industry What changes African countries can make in order to become attractive investment destinations The role that access to reliable sustainable and affordable power can play in the acceleration of economic growth Why and how American energy companies should stop curtailing their investments in Africa And why the continent s energy industry needs more women The book s underlying theme is that too often natural resources create wealth for foreign investors and a select group of African elites while everyday people and in turn African economies fail to benefit While it is easy to see that there is a lack of local participation in African projects and an ongoing challenge in securing necessary investment we also need to understand our role in this We have to understand the importance of creating enabling environments with attractive fiscal terms for local and foreign investors the role of stronger local content policies in ensuring more local participation in the sector and the weight government and political uncertainty carries in moving projects forward It s up to Africans to fix Africa writes Ayuk This statement can be considered a living theme throughout the book as he encourages that local companies and governments have to enter into collaborative agreements rather than passive engagements with IOCs and majors We need investors who show that they want to fully participate with us by coming in and building long term sustainable businesses that last and make a profit create jobs and further development If you re ready to dive headfirst into accessing a frank analysis and examination of the African energy landscape and how Africans can begin to fix Africa jump into the pages of Billions at Play I agree with the points made and with Ayuk s case for the critical role that OPEC will play in helping African oil products achieve a much deserved voice in the petroleum industry OPEC Secretary General H E Mohammad Sanusi Barkindo
