

Track belt alignment

Your Quadtrac tractor is equipped with a positive drive track system. Periodic inspections should be performed to ensure the track drive lugs are centered from side to side through the drive wheel and the front and rear idler wheels to prevent accelerated scuffing of the drive lugs.

1. On a flat level surface, drive the tractor 15 - 30 m (50 - 100 ft) in a straight line. Take your hands off the steering wheel and depress the inching pedal, allowing the tractor to coast to a stop. Turn the key switch off and remove the key from the switch.

SCHNITTANSICHT 1

2. The track drive lugs should be centered between the inside and outside idler wheels. Check the distance from the tractor drive lug to the inside and outside idler wheel. The distance from the lug to the idler wheel must not be less than 6.35 mm (0.25 in). If the distance is less than 6.35 mm (0.25 in) between the drive lug and the inside or outside idler wheel, proceed to step 3 for the adjustment procedure. If the distance between the drive lug and the inside idler wheel is less than 6.35 mm (0.25 in) proceed to step 4.

SCHNITTANSICHT 2

3. Loosen the three front and three rear yoke adjusting plate bolts (1) until you can move the washers.

Turn the adjusting bolt (2) according to the following:

To move the track inward (toward the tractor), adjust the yoke plate rearward (toward the rear of the tractor).

To move the track outward (away from the tractor), adjust the yoke plate forward (toward the front of the tractor).

SCHNITTANSICHT 3

Case Ih Steiger 600 Quadtrac Operators Manual
