CLINICAL INTERNSHIP 1
CLINICAL CHEMISTRY

OVERVIEW OF AUTOMATED CLINICAL CHEMISTRY TESTS

Machines used in sequence:

- For routine chemistry tests:
  - Siemens Dimension
  - Pentra C400
- For blood gas and electrolyte tests:
  - OPTI-CCA TS

Clinical chemistry evaluates the biochemical components of the liquid portion of the blood which is plasma/ serum. Most commonly used specimen is **serum**.

"What are the different tests in clinical chemistry?

- **Kidney Function Test** which include creatinine, blood urea nitrogen (BUN) and uric acid.
  - ❖ Creatinine and BUN measures kidney function.
  - ❖ Creatinine is the more specific test and is done using either enzymatic or colorimetric methods. Enzymatic is said to be the better method for the determination of any laboratory tests.
  - ❖ Uric acid is not really a kidney function test but it can also attest kidney function, while it's also an indicator of joint diseases especially rheumatoid, gouty arthritis and other types of arthritis.

- **Liver or Hepatic Panel** this includes ALT (SGPT), AST (SGOT), total protein, albumin, globulin, alkaline phosphatase, direct and indirect bilirubin and GGT (an indicator of alcoholic cirrhosis) while all other test will test liver function.
  - ❖ **Prothrombin time** is also part of the hepatic panel, it can assess several clotting factors and also vitamin K dependent this includes factors 2, 7, 9 and 10.
  - ❖ *Clotting factors: 2, 7, 9, and 10 – independent on prothrombin time because they are vitamin K dependent.*

- **Thyroid Panel** this includes TSH, Free T3, Free T4, T3 and T4.
  - ❖ All of this test will attest hyperthyroidism, hypothyroidism and euthyroidism.

- **Executive Panel #3/ Cardiac Panel** it will assess cardiac enzymes like the CKMB (creatinine-kinase-MB) and AST.
  - ❖ The most accurate cardiac enzyme is called the **CKMB** because it is more secretedly from the cardiac muscle and it is not so concentrated in the skeletal muscle.
  - ❖ The most specific protein and the most specific cardiac muscle is **Troponin**.
    - ■ It has two types: Troponin T and Troponin I
      - Both are specific except the troponin I lacks periodicity compared to troponin T. **Troponin I** is more specific. Other tests in cardiac function although it is not done in the hospital includes myoglobin and AST (not anymore part of the cardiac panel).

Sheppard,William R. Simpson,2012-12-06 System level testing is becoming increasingly important It is driven by the incessant march of complexity which is forcing us to renew our thinking on the processes and procedures that we apply to test and diagnosis of systems In fact the complexity defines the system itself which for our purposes is any aggregation of related elements that together form an entity of sufficient complexity for which it is impractical to treat all of the elements at the lowest level of detail System approaches embody the partitioning of problems into smaller inter related subsystems that will be solved together Thus words like hierarchical dependence inference model and partitioning are frequent throughout this text Each of the authors deals with the complexity issue in a similar fashion but the real value in a collected work such as this is in the subtle differences that may lead to synthesized approaches that allow even more progress The works included in this volume are an outgrowth of the 2nd International Workshop on System Test and Diagnosis held in Alexandria Virginia in April 1998 The first such workshop was held in Freiburg Germany six years earlier In the current workshop nearly 50 experts from around the world struggled over issues

concerning the subject In this volume a select group of workshop participants was invited to provide a chapter that expanded their workshop presentations and incorporated their workshop interactions While we have attempted to present the work as one volume and requested some revision to the work the content of the individual chapters was not edited significantly Consequently you will see different approaches to solving the same problems and occasional disagreement between authors as to definitions or the importance of factors The works collected in this volume represent the state of the art in system test and diagnosis and the authors are at the leading edge ofthat science From the Preface **Model-Based Testing Essentials - Guide to the ISTQB Certified Model-Based Tester** Anne Kramer,Bruno Legeard,2016-03-29 Provides a practical and comprehensive introduction to the key aspects of model based testing as taught in the ISTQB Model Based Tester Foundation Level Certification Syllabus This book covers the essentials of Model Based Testing MBT needed to pass the ISTQB Foundation Level Model Based Tester Certification The text begins with an introduction to MBT covering both the benefits and the limitations of MBT The authors review the various approaches to model based testing explaining the fundamental processes in MBT the different modeling languages used common good modeling practices and the typical mistakes and pitfalls The book explains the specifics of MBT test implementation the dependencies on modeling and test generation activities and the steps required to automate the generated test cases The text discusses the introduction of MBT in a company presenting metrics to measure success and good practices to apply Provides case studies illustrating different approaches to Model Based Testing Includes in text exercises to encourage readers to practice modeling and test generation activities Contains appendices with solutions to the in text exercises a short quiz to test readers along with additional information Model Based Testing Essentials Guide to the ISTQB Certified Model Based Tester Foundation Level is written primarily for participants of the ISTQB Certification software engineers test engineers software developers and anybody else involved in software quality assurance This book can also be used for anyone who wants a deeper understanding of software testing and of the use of models for test generation **Exercise Testing and Prescription Lab Manual** Edmund O.
