CASIO

Getting Acquainted

Congratulations upon your selection of this CASIO watch. To get the most out of your purchase, be sure to carefully read this manual and keep it on hand for future reference when necessary.

• This watch does not have a time zone that corresponds to the Greenwich Mean Time differential of +3.5 hours. Because of this, the radio-controlled timekeeping and World Time functions will not display the correct time for Newfoundland, Canada.

General Guide

- Press **(C)** to change from mode to mode.
- In any mode, press **(L)** to illuminate the face of the watch.

Radio-controlled Atomic Timekeeping

Current Time Setting

This watch automatically adjusts its time setting in accordance with a time calibration signal. You can also perform a manual procedure to set the time and date, when necessary.

- The first thing you should do after purchasing this watch is to set your Home City, which is the city where you will normally use the watch. For more information, see "To set your Home City" below.
- When using the watch outside the range of the U.S. time signal transmitter, you have to adjust the current time setting manually as required. See "Timekeeping" for more information about manual time setting.
- The analog time of this watch is synchronized with the digital time. Because of this, the analog time setting is automatically adjusted whenever you change the digital setting. See "Analog Timekeeping" for more information.

To set your Home City

1. In the Timekeeping Mode, hold down **(C)** until the city code starts to flash, which indicates the setting screen.
2. Use **(L)** (left) and **(R)** (right) to scroll through the city codes until the one you want to use as your Home City is displayed.
- The following are the city codes for major cities in North America:
 NYC: New York, DET: Detroit, BOS: Boston, MONT: Montreal
 LAX: Los Angeles, SFO: San Francisco, LAS: Las Vegas,
 SEA: Seattle/Tacoma, DEN: Denver, MSP: Minneapolis,
 ORD: Chicago, HOU: Houston, DAL: Dallas/Fort Worth, FTX:
 Fort Lauderdale, MIA: Miami, WDC: Washington
- Press **(C)** to exit the setting screen.
- Normally, your watch should show the correct time as soon as you select your Home City Code. If it does not, it should adjust automatically after the next auto receive (in the middle of the night). You can also perform manual receive or you can set the time manually.
- If you are in an area that does not use Daylight Saving Time (summer time), turn off the DST setting.

About This Manual

- Button operations are indicated using the letters shown in the illustrations.
- Most of the display examples in this manual show only the digital display, without the analog hands.
- Each section of this manual provides you with the information you need to perform operations in each mode. Further details and technical information can be found in the "Reference" section.

Stopwatch Mode

Countdown Timer Mode

To display the digital time and last signal screen

- In the Timekeeping Mode, press **(C)** to cycle through the digital time screens as shown below.
- In the Timekeeping Mode, press **(L)** to display the last signal screen. The last signal screen shows the time and date of the last successful time calibration signal reception.

Time Calibration Signal Reception

There are two different methods you can use to receive the time calibration signal: auto receive and manual receive.

- **Auto Receive**
 With auto receive, the watch automatically picks up the time calibration signal four times a day at 6:00 a.m., 1:00 a.m., 2:00 a.m., 3:00 a.m., and 4:00 a.m. For more information, see "About Auto Receive".
- **Manual Receive**
 Manual receive lets you start a time calibration signal reception with the press of a button. For more information, see "To perform manual receive".

Important

- When getting ready to receive the time calibration signal, position the watch as shown in the nearby illustration, with its 12 o'clock side facing towards a window. Make sure there are no metal objects nearby.

- The watch should not be on its side or facing the wrong way.
- Proper signal reception can be difficult or even impossible under the conditions listed below.
