and performance artists have included careful examination of the cognitive processes mediating outstanding performance in very diverse areas of expertise. These analyses have shown that expert performance is primarily a reflection of acquired skill resulting from the accumulation of domain specific knowledge and methods during many years of training practice. The importance of domain specific knowledge has led researchers on expertise to focus on characteristics of expertise in specific domains. In *Toward a General Theory of Expertise* many of the world's foremost scientists review the state of the art knowledge about expertise in different domains with the goal of identifying characteristics of expert performance that are generalizable across many different areas of expertise. These essays provide a comprehensive summary of general methods for studying expertise and of current knowledge about expertise in chess, physics, medicine, sports and performance arts, music, writing and decision making. Most important, the essays reveal the existence of many general characteristics of expertise.

Chess Life, 2006 Advances in Computer Games H. Jaap van den Herik, Hiroyuki Iida, Ernst A. Heinz, 2013-06-05

I feel privileged that the 11th Advances in Computer Games Conference ACG 10 takes place in Graz, Styria, Austria. It is the first time that Austria acts as host country for this major event. The series of conferences started in Edinburgh, Scotland in 1975 and was then held four times in England, three times in The Netherlands and once in Germany. The ACG 10 conference in Graz is special in that it is organised together with the 11th World Computer Chess Championship WCCC, the 5th Computer Olympiad CO and the European Union Youth Chess Championship. The 11th WCCC and ACG 10 take place in the Dom im Berg Dome in the Mountain, a high tech space with multimedia equipment located in the Schlossberg in the centre of the city. The help of many sponsors, large and small, is gratefully acknowledged. They will make the organisation of this conference a success. In particular, I would like to thank the European Union for designating Graz as the Cultural Capital of Europe 2003. There are 24 accepted contributions by participants from all over the world: Europe, Japan, USA and Canada. The specific research results of the ACG 10 are expected to find their way to general applications. The results are described in the pages that follow. The international stature together with the technical importance of this conference reaffirms the mandate of the International Computer Games Association (ICGA) to represent the computer games community.

How does one determine the best chess games? What one may see as brilliant, another may see as simply necessary. Like some art lovers, chess fans claim that they know a good game when they see it and that they know better from good. But best? How is this articulated? This book itself, a work of art, is brought together by the use of five criteria: the overall aesthetics, clever and relentless, are insufficient qualities; the originality, e.g. not yet another white knight sacrifice in a Sicilian, the level of opposition, the loser played very well, the soundness, i.e. are the moves refutable with perfect play, accuracy, few of the moves are second best, and difficulty, the winner overcame major obstacles of the game, and finally the overall breadth and
