Paola Antonelli, Senior Curator, Architecture and Design, The Museum of Modern Art. Labour, Mobility and Informal Practices in Russia, Central Asia and Eastern Europe. Rano Turaeva, Rustamjon Urinboyev, 2021-05-26. This book explores the daily survival strategies of people within the context of failed states, flourishing informal economies, legal uncertainty, increased mobility and globalization, where many people who are forced by the circumstances to be innovative and transnational have found their niches outside formal processes and structures. The book provides a thorough theoretical introduction to the link between labour mobility and informality and comprises convincing case studies from a wide range of post-socialist countries. Overall, it highlights the importance of trust, transnational networks and digital technologies in settings where the rules governing economic and social activities of mobile workers are often unclear and flexible. **Diario oficial** Mexico, 2010. **The Car Design Yearbook**, 2005. **Energy and Transport in Green Transition**. Atle Midttun, Nina Witoszek, 2015-06-26. This book breaks new ground in the studies of green transition. It frames the ongoing transformation in terms of a battle of modernities with the emerging vision of ecomodernity as the final destination. It also offers a systematic exploration of the potential for extensive transformation of carbon-intensive sectors with a focus on energy and transport towards a low or post-carbon economy. The book does so in a comparative perspective by pointing to a diversity of techno-economic and institutional solutions in the mature Western economies and in the rapidly growing East and developing South. The contributors highlight a broad spectrum of available alternatives as well as illuminate conflicting interests involved. They also demonstrate how solutions to the climate challenge require parallel technological and governance innovation. The book advocates a new overarching vision and agenda of ecomodernity based on a synergistic paradigm shift in industry, politics and culture to trigger and sustain the ecological innovation necessary to tip development in a green direction. This vision cannot be monolithic; rather, it should reflect the diverse interests and conditions of the global population. This book is aimed

at researchers and postgraduate students of energy transport environmental and climate policies as well as development environment innovation and sustainability      **Giant Days Vol. 11** John Allison,2019-10-16 The third and final year of university is finally here and BFFs Daisy Esther and Susan are in for some surprising upsets in their first semester Between Halloween run ins with Daisy s dreaded dreadful ex part time gigs at a shady pop up Christmas market Esther dating a tech bro and Susan attempting to be romantic there s still plenty to learn and more than enough misadventure to squeeze in before it s time to don caps and gowns Written by John Allison Scary Go Round By Night and illustrated by the incredible Max Sarin Giant Days volume 11 kicks off third year with a bang collecting issues 41 44 of the Eisner Award winning series
