Handbook of Business Groups Asli M. Colpan,Takashi Hikino,James R. Lincoln,2010-08-06 Business groups large diversified often family controlled organizations with pyramidal ownership structure such as the Japanese zaibatsu the Korean chaebol and the grupos economicos in Latin America have played a significant role in national economic growth especially in emerging economies Earlier variants can also be found in the trading companies often set up in Britain which operated in Asia Africa and Latin America Business groups are often criticized as premodern forms of economic organization and occasionally as symptomatic of corrupt crony capitalism but many have shown remarkable resilience navigating and adjusting to economic and political turbulence international competition and technological change This Handbook provides a comprehensive analysis of business groups around the world It examines the adaptive and competitive capabilities of business groups and their evolutionary dynamics 16 individual country chapters deal with business groups from Asia to Africa the Middle East to Latin America while overarching chapters consider the historical and theoretical context of business groups With contributions from leading experts The Oxford Handbook of business groups provides a comprehensive empirically and theoretically rich guide for scholars and policy makers The New Domestic Automakers in the United

States and Canada A.J. Jacobs,2015-12-16 Over the past forty years state provincial and local governments in the United States and Canada have provided foreign automakers with approximately 4 80 billion in incentives in order to lure light vehicles assembly plants to their areas This has included tax abatements infrastructure construction land giveaways job training programs and other subsidies As of early 2015 ten foreign vehicle makers operated 20 light vehicles in developed North America Despite the fact that all ten of these automakers have pursued a similar pattern first exporting vehicles into the United States and Canada before launching vehicle plants in developed North America each has followed its own specific historical development path and has created its own unique growth trajectory This book provides a unique historical and qualitative review of these ten vehicle makers from their early beginnings to their export entry into the United States and or Canada through early 2015 In addition it chronicles the histories of more than a dozen former automakers and potential future foreign light motor vehicle assembly plants in the United States and Canada This includes the first foreign automaker to build its cars in the United States De Dion Bouton of France in July 1900 the early 20th Century endeavors of Fiat Mercedes and Rolls Royce and the present day hopes of Chinese and Indian automakers In the process the text also provides

an assessment of the top competing states and sites for any future plants the possible incentives packages governments may offer to attract such facilities and an estimated incentive value for each automaker Overall the goal of this book is to expand the knowledge of policymakers at all tiers of government in the United States and Canada and to help them take a more holistic look at the pros and cons of attracting Automobile Manufacturing FDI It is hoped that this will enable them to make more informed decisions when pursuing a new foreign motor vehicle assembly plant Its findings should also prove informative to urban and regional planning political science sociology economics labor and international development scholars and students in North America and worldwide

Lithium-Ion Cells Yury Koshtyal ,Alexander Rumyantsev,2024-12-24 A large

quantity of articles and books have been published on the designated topics However most of the literary sources describe the results of scientific articles on the synthesis and study of perspective materials reveal circuit and design solutions for constructing control systems and manufacturing batteries and are educational materials At the same time a small part of the published sources includes the following descriptions of materials produced industrially and used in the LIC manufacturing process demonstrations of the industrially produced LIC energy and power parameters analysis of the characteristics of manufactured miniature lithium ion cells solid state LICs lithium metal cells and all solid state cells as well as others Considering the popularity of the discussed topics one can hope to find detailed information on the Internet Indeed modern search engines make it possible to locate a sufficiently large number of relevant documents However while conducting such research we encountered the following challenges the data are somewhat fragmented and their systematization and structuring are required search results do not always meet search queries For instance data that were relevant to the topic were found but they did not match the query as accumulated data grow the search time for new information extends the

choice of search engine and location different countries affects search results the data are not indexed in search engines although the correct keywords and website were requested the information disappears due to website updates and the found data require additional processing For example many presentations show changes in the shape of the discharge curves depending on the discharge current strength In addition however Ragone plots are necessary for a correct comparison and therefore the mathematical processing of presented results is required Thus this book was written to systematize and structure information on industrially produced materials for LIC manufacturing and industrially produced and promising LICs and lithium metal rechargeable cells for various applications *Business World* ,2010 *Energy and Transport in Green Transition* Atle Midttun,Nina Witoszek,2015-06-26 This book breaks new ground in the studies of green transition It frames the ongoing transformation in terms of a battle of modernities with the emerging vision of ecomodernity as the final destination It also offers a systematic exploration of the potential for extensive transformation of carbon intensive sectors with a focus on energy and transport towards a low or post carbon economy The book does so in a comparative perspective by pointing to a diversity of techno economic and institutional solutions in the mature Western economies and in the rapidly growing East and developing South The contributors highlight a broad spectrum of available alternatives as well as illuminate conflicting interests involved They also demonstrate how solutions to the climate challenge require parallel technological and governance innovation The book advocates a new overarching vision and agenda of ecomodernity based on a synergistic paradigm shift in industry politics and culture to trigger and sustain the ecological innovation necessary to tip development in a green direction This vision cannot be monolithic rather it should reflect the diverse interests and conditions of the global population This book is aimed at researchers and postgraduate students of energy transport environmental and climate policies as well as development environment innovation and sustainability **Managing Smart Cities** Anna Visvizi,Orlando Troisi,2022-02-01 This book adopts the managerial perspective to the study of smart cities As such this book is a necessary addition to the existing body of literature on smart cities The chapters included in this book prove the case that transformation of cities to smart cities is a function of effective and efficient management practices implemented at diverse levels of smart cities While advances in information and communication technology ICT are crucial it is the ability to apply ICT consciously and efficiently that drives the transformation of cities to smart cities in a manner conducive to cities sustainability and resilience The book covers three sets of interconnected topics Management and decision making for urban design and infrastructure development Management and decision making in context of smart cities development Ways of promoting and ensuring participation representation and co creation in smart cities These three groups of topics offer a great opportunity to acquire a clear direct and practice driven knowledge and understanding of how effective management allows ICT enhanced tools and applications to change smart cities possibly making them smarter Alternative Energy Systems and Applications B. K. Hodge,2017-05-08 The comprehensive guide to engineering alternative and renewable energy

systems and applications updated for the latest trends and technologies This book was designed to help engineers develop new solutions for the current energy economy To that end it provides technical discussions along with numerous real world examples of virtually all existing alternative energy sources applications systems and system components All chapters focus on first order engineering calculations and consider alternative uses of existing and renewable energy resources Just as important the author describes how to apply these concepts to the development of new energy solutions Since the publication of the critically acclaimed first edition of this book the alternative renewable and sustainable energy industries have witnessed significant evolution and growth Hydraulic fracturing fossil fuel reserve increases the increasing popularity of hybrid and all electric vehicles and the decreasing cost of solar power already have had a significant impact on energy usage patterns worldwide Updated and revised to reflect those and other key developments this new edition features expanded coverage of topics covered in the first edition as well as entirely new chapters on hydraulic fracturing and fossil fuels hybrid and all electric vehicles and more Begins with a fascinating look at the changing face of global energy economy Features chapters devoted to virtually all sources of alternative energy and energy systems Offers technical discussions of hydropower wind passive solar and solar thermal photovoltaics fuel cells CHP systems geothermal ocean energy biomass and nuclear Contains updated chapter review questions homework problems and a thoroughly revised solutions manual available on the companion website While Alternative Energy Systems and Applications Second Edition is an ideal textbook reference for advanced undergraduate and graduate level engineering courses in energy related subjects it is also an indispensable professional resource for engineers and technicians working in areas related to the development of alternative renewable energy systems
