Cosmopolitan Government In Europe Citizens And Entrepreneurs In Postnational Politics:

Cosmopolitan Government in Europe Owen Parker, 2013-04-26 The invocation of the market has been omnipresent in media discussions of crisis Europe On the one hand the market is presented as that to which EU member states must collectively respond It is the very purpose of a post national government and that which dictates individual and collective identities The expansion of market is that which guarantees and constitutes peace in Europe On the other hand the market is that which government must seek to tame It is the servant of government and ought not be permitted to undermine collective identities and solidarities associated with the juridical imaginary of social contract and sovereign nation state It is from this perspective the expansion of the social institutions of nation state into the post national arena that will constitute a lasting peace in Europe *Cosmopolitan Government in Europe* uses a Foucauldian lens to consider the ethics of the scholarly and institutional discourses associated with these apparently divergent market and legal cosmopolitan visions of Europe It reflects on attempts to reconcile or move beyond these discourses particularly through the invocation of more pluralist modes of governance but claims that such moves have been largely unsuccessful in both practice and theory It argues that the very ambiguity in the relationship between the ideal subjects that these market and legal visions promote respectively post national entrepreneur and citizen is that which permits a space for resistance and politics Thus the book argues for a pragmatic politics which is cognizant of the violent potential inherent in any cosmopolitan attempt to govern Europe while recognising the contemporary dangers associated with the dominance of a market cosmopolitan Europe This work is an important and timely intervention in contemporary debates about democratic Europe and its shortcomings and will be of great interest to scholars of international political theory European studies and international political economy *Politics in the European Union* Ian Bache, Simon Bulmer, Stephen George, Owen Parker, 2015 This is an account of the main developments in the process of European integration It provides coverage of theory history member states institutions and policies drawing on academic debates including issues of legitimacy and globalisation Politics in the European Union Simon Bulmer, Owen Parker, Ian Bache, Stephen George, Charlotte Burns, 2020 This is an account of the main developments in the process of European integration It provides coverage of theory history member states institutions and policies drawing on academic debates including issues of legitimacy and globalisation The Politics of Evasion Robert Latham, 2016-03-31 Burgeoning national security programs thickening borders Wikileaks and Anonymous immigrant rights rallies Occupy movements student protests neoliberal austerity global financial crises these developments underscore that the fable of a hope filled post cold war globalization has faded away In its place looms the prospect of states and corporations transforming a permanent war on terror into a permanent war on society How at the critical juncture of a post globalization era will policymakers and power holders in leading states and corporations of the Global North choose to pursue power and control What possibilities and limits do activists and communities face for progressive political action to counter this power inside

and outside the state This book is a sustained dialogue between author and political theorist Robert Latham and Mr V a policy analyst from a state in the Global North Mr V is sympathetic to the pursuit of justice rights and freedom by activists and movements but also mindful of the challenges of states in pursuing security and order in the current social and political moment He seeks a return to the progressive welfare oriented state associated with the twentieth century The dialogue offers an in depth consideration of whether this is possible and how a progressive politics might require a different approach to social organization power and collective life Exploring key ideas such as sovereignty activism neoliberalism anarchism migration intervention citizenship security political resistance and transformation and justice this book will be of interest to academics and students of Political Science Sociology Anthropology Law Geography Media and Communication and Cultural Studies

Politics and Suicide Nicholas Michelsen, 2015-10-08 Politics and Suicide argues that whilst the historical lineage of suicidal politics is recognised the fundamental significance of autodestruction to the political remains under examined It contends that practices like suicide bombing do not simply embody a strange or abnormal suicidal articulation of the political but rather that the existence of suicidal politics tells us something fundamental about the political as such and thinking about political violence more broadly Recent world events have emphatically shown our need for tools with which to develop better understandings of the politics of suicide Through the exploration of several arresting case studies including the Kamikaze bombers of World War Two Jan Palach's self immolation in 1969 Cold War nuclear deterrence and the suicide terrorist attacks of 9 11 Michelsen asks how we might talk of a political suicide in any of these contexts The book charts how political processes go suicidal and asks how we might still consider them to be political in such a case It investigates how suicide can function as politics A strong contribution to the fields of philosophy and international relations theory this work will also be of interest to students and scholars of political theory and terrorism political violence

Politics in Emotion Himadeep Muppidi, 2014-09-25 The work focuses on a subaltern local sovereignty movement called Telangana in India Over the last ten years this movement has engaged in a massive political mobilization including strikes rallies work stoppages occupation of public spaces electoral contests 200 and more political suicides and media battles But interestingly enough notwithstanding a political mobilization that has brought day to day life to a halt on a number of occasions it has remained largely invisible in international media and global politics Fascinated by the social movement's international invisibility as well as the causes and conditions of its eruption around a city region that has become a showcase of new capitalist development Muppidi seeks to unpack this issue showing that this invisibility is not just intrinsically puzzling but also represents the operation of power on a global scale Investigating the conditions of invisibility in this instance can therefore tell us something important about the way global power works to produce visibility and invisibility in the 21st century world This book provides a unique resource for students of Postcolonialism International relations and South East Asian studies

Lacan, Deleuze and World Politics Andreja Zevnik, 2016-02-26 This book aims to re think the way in which the subject

is inscribed in the modern political and does so by exploring the potentiality of Lacano Deleuzian theoretical framework It concerns a different ontology and a non dualist understanding of political and legal existence by focusing on questions such as how to think alternative notions of political existence and what kind of political social and legal order do these come to create This investigation into political appearance of subjects through concepts of law body and life is led and influenced by the thought of Gilles Deleuze and Jacques Lacan as well as Alain Badiou Antonio Negri and Slavoj i ek The book takes on various conceptualisations of life explores the relationship between law and life and develops an alternative notion of legal and political existence in particular in the context of rights On the back of Guantamo s legal and political discourses this work aims to show why and how the problems of world politics or the limitations of human rights discourse require an engagement with questions such as what it means to exist as a human being what forms of life are politically recognised which are not and why this distinction By pointing to a different ontology for thinking and understanding global politics and demonstrating how a trans disciplinary and philosophical approaches can foster the debates in world politics this book will be of interest to postgraduates and scholars working on critical normative ideas in international politics critical security studies and critical legal studies

European-East Asian Borders in Translation Joyce C.H. Liu,Nick

Vaughan-Williams,2014-08-21 European East Asian Borders is an international trans disciplinary volume that breaks new ground in the study of borders and bordering practices in global politics It explores the insights and limitations of border theory developed primarily in the European context to a range of historical and contemporary border related issues and phenomena in East Asia The essays presented here question rather than assume the various borders between inclusion exclusion here there us them that condition the im possibility of translating between histories cultures and identities Contributors suggest that the act of translation offers new ways of thinking about how border logics operate taking on the concept of translation itself as border problematic and therefore raising questions of power and authority such as who gets to act as a translator or who benefits from the outcome The book will appeal not only to upper level students and scholars with a geopolitical historical interest in East Asia but also to those who work in the inter disciplinary field of border studies and others with an interest more generally in translation and the extent to which theory travels across time and space

Political Aesthetics Arundhati Virmani,2015-09-07 Political Aesthetics highlights the complex and ambiguous connections of aesthetics with social cultural and political experiences in contemporary societies If today aesthetics seems a rather overused term mixing a variety of historical realities and complex personal states of being its relevance as a connecting agent between individual state and society is stronger than ever The actual context of political and economic crisis generates new relations between official imposed aesthetics and the resistance and critiques they trigger Considered beyond the poles of power and protest the book examines how traditional or innovative artistic practices may acquire unexpected capacities of subversion It nourishes the current debate around the new political stakes of aesthetics as an inviolable right of ordinary

citizens an essential element of empowerment and agency in a democratic every day It will be of interest to students and scholars of international relations political culture and political aesthetics as well as critical sociology and history It will also be useful for some broad courses in media studies cultural studies and sociology

Ontology and World Politics Sergei Prozorov, 2013-10-23 Together these two companion volumes develop an innovative theory of world politics grounded in the reinterpretation of the concepts of world and politics from an ontological perspective Ontology and World Politics presents a new approach to political universalism grounded in the reinterpretation of world politics from an ontological perspective In the discipline of International Relations the concept of world politics remains ambivalent functioning both as a synonym of international relations and their antonym denoting the aspirations for the overcoming of interstate pluralism in favour of a universalist politics of the global community or the world state Rather than distinguish world politics from international politics by its site level or issues Prozorov interprets it as another kind of politics Drawing on Martin Heidegger's account of world disclosure and Alain Badiou's phenomenology of worlds this book posits world politics as a practice of the affirmation of universal axioms across an infinite plurality of limited and particular situations or worlds Prozorov reinterprets the familiar principles of community equality and freedom in ontological terms as attributes of pure being subtracted from all positive determinations and presents them as axioms of universalist politics valid in any world whatsoever This approach to world politics serves as the groundwork for a comprehensive reconsideration of the central themes of political and international relations theory Systematic and accessible these works will be key reading for all students and scholars of political science and international relations

Emotions, Politics and War Linda Åhäll, Thomas Gregory, 2015-07-03 A growing number of scholars have sought to re-centre emotions in our study of international politics however an overarching book on how emotions matter to the study of politics and war is yet to be published This volume is aimed at filling that gap proceeding from the assumption that a nuanced understanding of emotions can only enhance our engagement with contemporary conflict and war Providing a range of perspectives from a diversity of methodological approaches on the conditions maintenance and interpretation of emotions the contributors interrogate the multiple ways in which emotions function and matter to the study of global politics Accordingly the innovative contribution of this volume is its specific engagement with the role of emotions and constitution of emotional subjects in a range of different contexts of politics and war including the gendered nature of war and security war traumas post conflict reconstruction and counterinsurgency operations Looking at how we analyse emotions in war why it matters and what emotions do in global politics this volume will be of interest to students and scholars of critical security studies and international relations alike

Ling, 2014-02-03 This book offers a non Western feminist perspective on world politics and international relations Creative innovative and challenging it seeks completely to transform contemporary Eurocentric and masculinist IR by re-presenting it in non Western non masculinist and non academic terms Drawing on Daoist dialectics the stories of Sihar and Shenya aim to

redress such hegemonic imbalance by completing the IR story To the yang of power politics this book offers a yin of fairy tale Both are equally fantastical but to different purposes To the yang of binary categories like Self vs Other West vs Rest hypermasculinity vs hyperfemininity Sihar and Shenya show their yin complementarities and complicities inside and out top and bottom center and periphery And to the yang of intransigent hegemony Sihar Shenya explores the yin of emancipation through porous water like thought and behavior through venues like aesthetics and emotions From this basis we begin to see another world with another kind of politics Written with students of IR and world politics in mind this book offers a postcolonial bridge for IR WP Following an academic introduction to assist the reader Ling moves away from traditional scholarship and into three interlocking fables Book I shows what an alternative world could look and feel like Book II makes the implications for IR WP more explicit It draws on the traditional Chinese notion of the five movements wu xing fire metal earth wood and water to illustrate iconic elements of IR WP power wealth security love and knowledge and how they could change according to circumstance and context Epilogue Introduction The Return brings the reader back into the Western world and focuses on modern day PhD student Wanda who is troubled by what she is learning and searches for a different perspective Engaging with the substantive problematiques at the heart of international relations studies this work is a unique and innovative resource for all students and scholars of international relations and world politics

Sexualities in World Politics Manuela Lavinás Picq, Markus Thiel, 2015-05-15 As LGBTQ claims acquire global relevance how do sexual politics impact the study of International Relations This book argues that LGBTQ perspectives are not only an inherent part of world politics but can also influence IR theory making LGBTQ politics have simultaneously gained international prominence in the past decade achieving significant policy change and provoked cultural resistance and policy pushbacks Sexuality politics more so than gender based theories arrived late on the theoretical scene in part because sexuality and gender studies initially highlighted post structuralist thinking which was hardly accepted in mainstream political science This book responds to a call for a more empirically motivated but also critical scholarship on this subject It offers comparative case studies from regional cultural and theoretical peripheries to identify ways of rethinking IR Further it aims to add to critical theory broadening the knowledge about previously unrecognized perspectives in an accessible manner Being aware of preoccupations with the de queering disciplining nature of theory establishment in the social sciences we critically reconsider IR concepts from a particular LGBTQ vantage point and infuse them with queer thinking Considering the relative dearth of contemporary mainstream IR theorizing authors ask what contribution LGBTQ politics can provide for conceiving the political subject as well as the international structure in which activism is embedded This book will be of interest to students and scholars of gender politics cultural studies and international relations theory

Theory of the Political Subject Sergei Prozorov, 2013-11-07 Together these two companion volumes develop an innovative theory of world politics grounded in the reinterpretation of the concepts of world and politics from an ontological perspective Theory of the Political Subject

continues the project of reconstruction of political universalism begun in *Ontology of World Politics* Having redefined world politics in terms of the affirmation of the universal ontological axioms of freedom equality and community in an infinite multiplicity of particular situations or worlds in this book Prozorov focuses on the way this affirmation is actually practiced analysing the conditions for the emergence within a world of the subject of its radical transformation Drawing on the contemporary reassessment of the notion of the subject in continental political thought particularly the work of Alain Badiou Prozorov defines the political subject in terms of one's subtraction from the positive order of one's world the weakening of one's particular identity that makes possible one's participation in the affirmation of the universal The book proceeds with outlining the path of the political subject within its world from the point of its inception to its confrontation with ethical epistemic and other limits to its activity This account of the subjective aspect of world politics also offers new and stimulating perspectives on such key issues of political theory as the relation of politics to human nature the role of violence in politics and the conditioning of politics by philosophical or scientific knowledge Systematic and accessible these works will be key reading for all students and scholars of political science and international relations

Globalization, Difference, and Human Security Mustapha Kamal Pasha, 2013-10-23 *Globalization Difference and Human Security* seeks to advance critical human security studies by re framing the concept of human security in terms of the thematic of difference Drawing together a wide range of contributors the volume is framed among others around the following key questions What are the silences and erasures of advancing a critical human security alternative without making recognition of difference its central plank How do we rethink the complex interplay of human security and difference in distinct and varied spatial and cultural settings produced by global forces What is the nexus between human security and the broader field of global development What new challenges to Human Security and International Relations are produced with the rise of the post liberal or post secular subject In what ways releasing human security from identification with the territorial state helps reconceptualize culture How does Human Security serve as a subspecies of modern humanitarian thought or the latter reinforce imperial imaginaries and the structures of order and morality Is the pursuit of indigenous rights fundamentally counterpoised to the pursuit of human security What difference it might make to take the doings and beings of communities of subsistence rather than basic needs wealth seeking individuals as a point of departure in critical human security studies How does reconstruction bind post war and post disaster states and societies into the global capitalist democratic political structure

Interpretive Approaches to Global Climate Governance Chris Methmann, Delf Rothe, Benjamin Stephan, 2013-06-03 Global climate change is perceived to be one of the biggest challenges for international politics in the 21st century This work seeks to fuse a global governance perspective together with different interpretive approaches offering a novel way of looking at international climate politics Equipped with a common interpretive tool kit the authors examine different issue areas and excavate the contours of an overall pattern the depoliticisation of climate governance It is this concept which represents the overarching theme connecting the different contributions addressing issues such as how the securitization of climate change conceals its socio economic roots how highly political decisions and value judgements are couched in the terms of science how the reframing of climate change as a matter of economic calculation and investment narrows the scope of political action and how the prevailing concentration on technological solutions to climate change turns it into a mere administrative issue to be tackled by experts Highlighting the depoliticisation of highly political issues provides a means to bring the political back into one of the most important issue areas of 21st century world politics The editors have assembled a series of 14 interpretive inquiries into discourses of global climate governance which aim to flesh out an interpretive methodology demonstrating the value it offers to those seeking to achieve a better understanding of global climate governance This work will be of great interest to students and scholars of environmental politics political theory and climate change

More Than Just War Charles Jones, 2013-03-12 This book raises questions about the just war tradition through a critical examination of its revival and by juxtaposing it with a literary phenomenology of war Recent public debate about war has leaned heavily on a just war tradition dating back many centuries This book examines the recent revival of that tradition in the United States and Britain arguing that it is less coherent and comprehensive as an approach to the ethical issues arising from war than is generally supposed and that it is inconsistent in important ways with the theology on which it was originally based A second line of criticism is mounted through close readings of modern texts in English from Britain Australia and the USA that together constitute a more subjective bottom up understanding of the moral dilemmas of military life In this second tradition the task of representing war is seen as more problematic and its rationality more questionable than in just war discourse Works by William Shakespeare Sir Walter Scott James Fennimore Cooper Stephen Crane John Buchan Robert Louis Stevenson Joseph Conrad Tim O'Brien and Kurt Vonnegut are featured The book will be of great interest to students and scholars of security

The Biopolitics of Lifestyle Christopher Mayes, 2015-12-22

A growing sense of urgency over obesity at the national and international level has led to a proliferation of medical and non medical interventions into the daily lives of individuals and populations This work focuses on the biopolitical use of lifestyle to govern individual choice and secure population health from the threat of obesity The characterization of obesity as a threat to society caused by the cumulative effect of individual lifestyles has led to the politicization of daily choices habits and practices as potential threats This book critically examines these unquestioned assumptions about obesity and lifestyle and their relation to wider debates surrounding neoliberal governmentality biopolitical regulation of populations discipline of bodies and the possibility of community resistance The rationale for this book follows Michel Foucault's approach of problematization addressing the way lifestyle is problematized as a biopolitical domain in neoliberal societies Mayes argues that in response to the threat of obesity lifestyle has emerged as a network of disparate knowledges relations and practices through which individuals are governed toward the security of the population's health Although a central focus is government health campaigns this volume demonstrates that the network of lifestyle emanates from a variety of overlapping domains and disciplines including public health clinical medicine media entertainment school programs advertising sociology and ethics This book offers a timely critique of the continued interventions into the lives of individuals and communities by government agencies private industries medical and non medical experts in the name of health and population security and will be of interests to students and scholars of critical international relations theory health and bioethics and governmentality studies

Deleuze & Fascism Brad Evans, Julian Reid, 2013-05-29 This edited volume deploys Deleuzian thinking to re theorize fascism as a mutable problem in changing orders of power relations dependent on hitherto misunderstood social and political conditions of formation The book provides a theoretically distinct approach to the problem of fascism and its relations with liberalism and modernity in both historical and contemporary contexts It serves as a seminal intervention into the debate over the causes and consequences of contemporary wars and global political conflicts as well as functioning as an accessible guide to the theoretical utilities of Deleuzian thought for International Relations IR in a manner that is very much lacking in current debates about IR Covering a wide array of topics this volume will provide a set of original contributions focussed in particular upon the contemporary nature of war the increased priorities afforded to the security imperative the changing designs of bio political regimes fascist aesthetics nihilistic tendencies and the modernist logic of finitude the politics of suicide the specific desires upon which fascism draws and of course the recurring pursuit of power An important contribution to the field this work will be of great interest to students and scholars of international relations fascism and international relations theory
