**Nineteenth Century Perspectives on Private International Law** Roxana Banu,2018-07-19 Private International Law is often criticized for failing to curb private power in the transnational realm The field appears disinterested or powerless in addressing global economic and social inequality Scholars have frequently blamed this failure on the separation between private and public international law at the end of the nineteenth century and on private international law s increasing alignment with private law Through a contextual historical analysis Roxana Banu questions these premises By reviewing a broad range of scholarship from six jurisdictions the United States France Germany the United Kingdom Italy and the Netherlands she shows that far from injecting an impetus for social justice the alignment between private and public international law introduced much of private international law s formalism and neutrality She also uncovers various nineteenth century private law theories that portrayed a social relationally constituted image of the transnational agent thus contesting both individualistic and state centric premises for regulating cross border inter personal relations Overall this study argues that the inherited shortcomings of contemporary private international law stem more from the incorporation of nineteenth century theories of sovereignty and state rights than from theoretical premises of private law In turn by

reconsidering the relational premises of the nineteenth century private law perspectives discussed in this book Banu contends that private international law could take centre stage in efforts to increase social and economic equality by fostering individual agency and social responsibility in the transnational realm Rethinking Border Control for a Globalizing World Leanne Weber, 2015-02-11 This book provides a new point of departure for thinking critically and creatively about international borders and the perceived need to defend them adopting an innovative preferred future methodology The authors critically examine a range of border domains including law citizenship governance morality security economy culture and civil society which provide the means and justification for contemporary border controls and identify early signs that the dynamics of sovereignty and borders are being fundamentally transformed under conditions of neoliberal globalization The goal is to locate potential pathways towards the preferred future of relaxed borders and provide a foundation for a progressive politics dedicated to moving beyond mere critique of the harm and inequity of border controls and capable of envisaging a differently bordered world This book will be of considerable interest to students of border studies migration criminology peacemaking critical security studies and IR in general **We the Cosmopolitans** Lisette Josephides, Alexandra Hall, 2014-03-01 The provocative title of this book is deliberately and challengingly universalist matching the theoretically experimental essays where contributors try different ideas to answer distinct concerns regarding cosmopolitanism Leading anthropologists explore what cosmopolitanism means in the context of everyday life variously viewing it as an aspect of kindness and empathy as tolerance hospitality and openness and as a defining feature of pan human individuality The chapters thus advance an existential critique of abstract globalization discourse The book enriches interdisciplinary debates about hitherto neglected aspects of contemporary cosmopolitanism as a political and moral project examining the form of its lived effects and offering new ideas and case studies to work with *Sanders and Young's Criminal Justice* Lucy Welsh, Andrew Sanders, Layla Skinns, Alpa Parmar, Ed Cape, 2021 Sanders and Young's Criminal Justice is an engaging account and a rigorous critique of the criminal justice system drawing on a wide breadth of research in the field *The Power of Energy Justice & the Social Contract* Raphael J. Heffron, Louis de Fontenelle, 2023-12-01 This open access book focuses on the energy sector and will make a significant contribution to its continued evolution For many years the energy sector has been missing a *raison d'être* and now finally there are increased calls for that to be justice Hence this book will develop the concept of energy justice and how it needs to be formalised in a new social contract with all stakeholders in society The focus will be on improving legal systems at local national and international levels while ensuring that justice is a core issue within energy law the legal system and more broadly in society Transformations in Criminal Jurisdiction Mícheál Ó Floinn, Lindsay Farmer, Julia Hörnle, David Ormerod KC, 2023-08-24 Can traditional approaches to criminal jurisdiction adapt to the new global reality of the digital era In this innovative book leading experts in criminal international and internet law unite to address this fundamental question They consider how jurisdictional regimes are

orientated around concepts of territoriality and extraterritoriality how these categories are increasingly blurred in the digital era and how a range of jurisdictional transformations are occurring in the process Part I presents novel doctrinal empirical and theoretical perspectives on criminal jurisdiction exploring how states are shaping and reimagining jurisdictional concepts in the crafting and interpretation of criminal offences and the ramifications of increasing jurisdictional concurrency in state practice Part II focuses on the investigative and enforcement powers of the state to assess how these issues are transforming traditional understandings of jurisdictional rules and boundaries the challenges and opportunities that these present for law enforcement authorities and the sorts of constraints and safeguards that may be necessary as a result The picture that emerges is a world of jurisdictional rules in a state of flux which demands the diversity of legal perspectives presented in this book for documenting rationalising and moving beyond the transformations that are taking shape in modern statecraft

*The Borders of Punishment* Katja Franko Aas, Mary

Bosworth, 2013-07-11 The Borders of Punishment Migration Citizenship and Social Exclusion critically assesses the relationship between immigration control citizenship and criminal justice It reflects on the theoretical and methodological challenges posed by mass mobility and its control and for the first time sets out a particular sub field within criminology the

criminology of mobility Drawing together leading international scholars with newer researchers the book systematically outlines why criminology and criminal justice should pay more attention to issues of immigration and border control Contributors consider how traditional criminal justice institutions such as the criminal law police and prisons are being shaped and altered by immigration as well as examining novel forms of penalty such as deportation and detention facilities which have until now seldom featured in criminological studies and textbooks In so doing the book demonstrates that mobility and its control are matters that ought to be central to any understanding of the criminal justice system Phenomena such as the controversial use of immigration law for the purposes of the war on terror closed detention centres deportation and border policing raise in new ways some of the fundamental and enduring questions of criminal justice and criminology What is punishment What is crime What should be the normative and legal foundation for criminalization for police suspicion for the exclusion from the community and for the deprivation of freedom And who is the subject of rights within a society and what is the relevance of citizenship to criminal justice
