Resources in Education ,1999-10 The Second Commandment Joey R. Peyton,2024-02-07 In an increasingly broken world filled with hate and violence God s plan from the beginning was to save and restore the world to the glory for which he had created it This simple plan has not changed with the evolution of sin time or man s rejection of his creator Rather God s simple twofold plan of redemption included both a commandment to love the creator with all one s heart mind soul and strength and a commandment to love one s neighbor as one s self Neither commandment stands in isolation for one cannot fully love others without a consuming love for God and neither can one completely love God without a love for the neighbor created by God The answer to hate is love the answer to war is love the answer to violence is love and the answer to all of societal disfunction is love The answer is not a commandment to like God and others because one only likes others because of likeness Rather love is a choice A choice to love what you don t like A choice to love what you don t understand A choice to love until the God you love sets everything right in eternity Pastoral Counseling in Africa and the West Ibidun B.

Michael R. Privett, 2012-08-21 After years of observation I have concluded that so many local churches function without regard to their God given biblical mission and objectives because of their unclear mission their unbiblical targets or their unbalanced objectives The Lord God has already given His church a clearly defined mission for the present age Yet so many local churches seem to function without understanding their biblical missiontheir God directed reason for existencewhile other local churches and their leaders have revised or even compromised their God given mission thinking that they know better than God Some churches disband Sunday school dismantle the choir and disassemble pews only to replace them with other programs and ideas that will become traditional soon enough Traditions customs and worship styles vary from culture to culture and from generation to generation Ive been in the gospel ministry long enough to have seen the pendulum swing back and forth a time or two So many ministries programs concepts and styles are not new but just repackaged Todays new fresh blended methods will become traditional to the next generation after a short period of time Too often we are more involved in following the latest fad than we are in striving to do all to the glory of God What really matters is whether you have presented a true and accurate opinion and view of the nature and character of God so that others will praise and exalt Him to His worthy place of honor esteem and excellence Counseling and Psychotherapy Theories in Context and Practice John Sommers-Flanagan, Rita Sommers-Flanagan, 2015-05-27 Apply the major psychotherapy theories into practice with this comprehensive text Counseling and Psychotherapy Theories in Context and Practice Skills Strategies and Techniques 2nd Edition is an in depth guide that provides useful learning aids instructions for ongoing assessment and valuable case studies More than just a reference this approachable resource highlights practical applications of theoretical concepts covering both theory and technique with one text Easy to read and with engaging information that has been recently revised to align with the latest in industry best practices this book is the perfect resource for graduate level counseling theory courses in counselor education marriage and family therapy counseling psychology and clinical psychology Included with each copy of the text is an access code to the online Video Resource Center VRC The VRC features eleven videos each one covering a different therapeutic

Cultural Conceptions of Mental Health and Therapy Anthony J. Marsella,G. White,2012-12-06 Within the past two decades there has been an increased interest in the study of culture and mental health relationships This interest has extended across many academic and professional disciplines including anthropology psychology sociology psychiatry public health and social work and has resulted in many books and scientific papers emphasizing the role of sociocultural factors in the etiology epidemiology manifestation and treatment of mental disorders It is now evident that sociocultural variables are inextricably linked to all aspects of both normal and abnormal human behavior But in spite of the massive accumulation of data regarding culture and mental health relationships sociocultural factors have still not been incorporated into existing biological and psychological perspectives on mental disorder and therapy Psychiatry the Western medical specialty concerned with mental disorders has for the most part continued to ignore socio cultural factors in its theoretical and applied approaches to the problem The major reason for this is psychiatry s continued commitment to a disease conception of mental disorder which assumes that mental disorders are largely biologically caused illnesses which are universally represented in etiology and manifestation Within this perspective mental disorders are regarded as caused by universal processes which lead to discrete and recognizable symptoms regardless of the culture in which they occur However this perspective is now the subject of growing criticism and debate
