Elliott, 2002-11-27 The later Colonial era saw a need to replace the buildings hurriedly assembled by earlier colonists but competent builders were difficult to find Capable housewrights were usually well paid and many became respected and prosperous members of their communities but craft apprenticeships and a gentlemanly taste were two of the primary requirements for becoming an architect As the profession developed architects in the Northeast initiated efforts to distinguish between their work and that of housewrights and builders This work is a history of the development of architecture as a profession in the United States It is divided into four chronological sections Section One covers the beginnings in Colonial times before 1800 when there were no identifiable professionals Section Two examines architecture from 1800 to the Civil War a period during which the first architects appeared Section Three considers the profession from the time of the Civil War to World War I and the strengthening of the profession's status Section Four covers architecture since World War I up to the present Each section discusses the training of architects standards of practice general management methods information sources minority participation and other aspects of professional operation with special attention given to the relationship between the profession's development and the social history of the periods The American Builder's Companion Asher Benjamin, 2012-12-13 The most widely used early 19th century architectural style and source book this work ranges from the Colonial up into Greek Revival periods Benjamin covers the extensive development of carpentry and construction techniques Over 375 figures American Architecture Leland M. New England and is hugely responsible for what we today consider the architectural charm of the region In the early 1800s he published books for local carpenters to use as guides to imbue their own construction with a new elegance part architectural primer part do it yourself manual these works were as the evidence of New England's continuing allure itself demonstrates wildly popular The Country Builder's Assistant originally published in 1797 is an early version of those later manuals and was Benjamin's first book The simplicity of its presentation belies the sophistication of its lessons here are unfussy directions complete with full illustrations for building all manner of classical columns creating beautiful cornices even constructing staircases that are as pleasing to the eye as they are safe and sturdy Less complete than Benjamin's later manuals this was nevertheless hugely significant in spreading neoclassical design throughout New England and it remains an essential resource for anyone interested in American architecture

Building by the Book Robert P. Guter, Janet W. Foster, 1992 Books and popular periodicals shaped New Jersey's built landscape from the colonial era to the advent of World War II Although it presents a wealth of Gothic cottages Italianate villas Craftsman bungalows and Sears ready cuts Building by the Book is far more than a catalog of architectural styles By relating the work of architects and pattern book authors to the experiences of ordinary people who hungered for beautiful surroundings Guter and Foster assess the *America's Favorite Homes* Robert Schweitzer, Michael W. R. Davis, 1990 During the first four decades of the twentieth century prefabricated and catalogue homes grew in popularity and number Built and occupied by farmers merchants the new armies of factory workers and other lower and middle class families these are the modest homes that today line American streets Using mail order house catalogues from the time Robert Schweitzer and Michael W R Davis chart the development of catalogue houses and their variations and include floor plans for many models Students of architecture whether amateur or professional preservationists and academics will find in America's Favorite Homes a handy reference to those homes that soon will be eligible for historic designation

Building a Timeless House in an Instant Age Brent Hull, 2014-08-01 The author of Traditional American Rooms examines the evolution of home construction making a case against mass produced homes HISTORY's Lone Star Restoration star Brent Hull is a master craftsman and hands on preservationist Hull a Foreword Reviews Book of the Year Finalist for architectural non fiction challenges us to consider the impact our decisions will have when building a house What do our homes say about us What stories are they telling Are they declarations of integrity beauty and heritage Or do they suggest we have lost our sense of value craft and harmony Nationally recognized as an authority on historic design architecturally correct moldings and millwork Hull is uniquely qualified to speak to the craft of building and art of design In an age of instant homes how do we build something timeless that weaves a tale of character values history and heart The decisions we make for our homes are not inconsequential What we build defines us In fact the contrast between the way we build today and how structures used to be built has become only more vivid What happened to craft What happened to the art of building Our values and what we believe about life have changed as well We have come to see

houses as a tradable commodity We live in a time that is obsessed with what's next We need to be careful of fooling ourselves into thinking that a bottom line mentality is the best way to approach building a home Now is the time to examine ourselves our motives and our hearts Praise for Building a Timeless House in an Instant Age Part call to action part exploration of technique the result is a persuasive and enjoyable reminder that our homes are reflections of ourselves A pleasing educational look at traditional home construction Kirkus Reviews

American Architects and the Mechanics of Fame Roxanne Kuter Williamson, 2011-03-01 Why does one talented individual win lasting recognition in a particular field while another equally talented person does not While there are many possible reasons one obvious answer is that something more than talent is requisite to produce fame The something more in the field of architecture asserts Roxanne Williamson is the association with a famous architect at the moment he or she first receives major publicity or designs the building for which he or she will eventually be celebrated In this study of more than six hundred American architects who have achieved a place in architectural histories Williamson finds that only a small minority do not fit the right person right time pattern She traces the apprenticeship connection in case studies of Louis Sullivan Frank Lloyd Wright Henry Hobson Richardson the firm of McKim Mead White Latrobe and his descendants the Bulfinch and Renwick Lines the European immigrant masters and Louis Kahn Although she acknowledges and discusses the importance of family connections the right schools self promotion scholarships design competition awards and promotion by important journals Williamson maintains that the apprenticeship connection is the single most important predictor of architectural fame She offers the intriguing hypothesis that what is transferred in the relationship is not a particular style or approach but rather the courage and self confidence to be true to one's own vision Perhaps she says this is the case in all the arts American Architects and the Mechanics of Fame is sure to provoke thought and comment in architecture and other creative fields
