Election Campaigns and Welfare State Change Staffan Kumlin,Achim Goerres,2022-07-11 For over three decades mature European welfare states have been on their way into an austerity phase marked by greater needs and more insecure revenues A number of reform pressures including population ageing unemployment economic globalization and increased migration call into question the economic sustainability and normative underpinnings of transfer systems and public services And while welfare states long seemed resilient to growing challenges it now seems clear that they are changing Election Campaigns and Welfare State Change examines how political leaders and the public respond to reform pressures at a pivotal moment in a mass democracy the election campaign Do campaigns facilitate debate and attention to welfare state challenges Do political parties present citizens with distinct choices as to how challenges might be met Do leaders prepare citizens for the idea that some solutions may be painful Do their messages have adaptive consequences for how the public perceives the need for reform Do citizens adjust their normative support for welfare policies in the process The answers to these questions affect how we understand welfare state change and representative democracy in an era of mounting challenges

APAIS 1999: Australian public affairs information service , Indian Tribes and the Federal Election Campaign Act United States. Congress. Senate. Committee on Indian Affairs (1993-),2006 Leaders' Personalities and the Outcomes of Democratic Elections Anthony King,2002-03-21

The conventional wisdom purveyed by the press and television and accepted as true by most politicians is that elections throughout the democratic world are personal clashes between individual presidential candidates and party leaders Almost everyone assumes that election outcomes are frequently determined by the major candidates personal characteristics In the United States Al Gore in 2000 came over as aloof and arrogant and failed to win his expected victory In Great Britain Tony Blair in 2001 came across as dynamic and personable and won a second term So personal charisma appears to yield electoral success This study by eminent scholars on both sides of the Atlantic suggests that the conventional wisdom is wrong Survey research conducted in recent decades indicates that relatively few voters are swayed by candidates' personal characteristics Far more important are voters' longstanding party loyalties their views on issues and their judgments of how well or badly presidents and parties have performed or will perform in office The votes of even the few electors who are swayed by candidates' personalities usually cancel each other out As a result election outcomes are seldom decided by individual candidates' personal images Occasionally but not often Ronald Reagan and Bill Clinton owed their election victories more to economics than to charm At the end of World War II the charismatic Winston Churchill lost the 1945 British general election the colorless Clement Attlee won Chancellor Helmut Kohl remained in power in Germany for a generation but was never personally popular Russian voters reckoned that Boris Yeltsin could not hold his drink but nevertheless elected him The implications of the authors' analyses are profound They suggest that modern democratic politics is not nearly as candidate centered and personality oriented as is often supposed They also suggest that parties' policies and their performance in office usually count for far more than the men and women they choose as their leaders Not least the authors suggest that the efforts of political consultants advertising agencies and spin doctors are often misdirected
