

Making Predictions From Results

Question 1: The experiment that used a prediction leads to the result in a table.

Adding cells will make bulbs glow more brightly even if the wire length is long.
We are going to test the wire length of wire in an investigation.
We are going to test a combination of wire with different numbers of batteries.

Here is the result in the result:

The results showed the length of wire had less an effect on the brightness of the bulb.

We are going to test if the number of batteries can change the effect of the bulb.
We are going to test the wire in a long or if it makes no difference.

We are looking to see if there are other components that make sense of a difference in the situation. It is important to test the effect of the wire length.
