recognition of customers who may use discount cards, and empowerment as customers may receive services for free if they are dissatisfied for any reason.

Since TAS has 32 stores, it is important to standardize its performance processes. In particular, employee reviews, a reward system, vehicle diagnostics, inventory management, and marketing processes may be listed. The importance of the first two processes refers to a fair system of checks and rewards for performance. The process of vehicle diagnostics should be standardized to ensure that employees properly follow all the milestones of the work. The last two processes are essential for attracting and keeping customers loyal to the company.

The survey data analysis shows that there is an issue of communication between customers and mechanics (Collier & Evans, 2017). It is recommended to improve the hiring process to choose customer-friendly employees, while current mechanics should be trained on how to interact with customers. Also, one more improvement opportunity that should be noted is a reward system based on remuneration and non-financial incentives that should be developed to stimulate employees to work better.

Conclusion

TAS is an auto service company that has a lot of benefits compared to its competitors. A wide range of services and products, the speed of work, and the waiting area are the main advantages, while the interaction with customers is a problem. Therefore, the company's CEO should pay attention to training employees on proper interaction skills and hiring customer-friendly employees, which should be accompanied by a specific reward system with a focus on communication.
