

- Be sure to keep all user documentation handy for future reference.
- Your watch may differ somewhat from the one shown in the illustration.

- Do not try to perform stopwatch operations while the crown is pulled out either to the first or second click. If you try to press a button, you might accidentally cause the stop to occur.

- To measure elapsed time**
1. Press to start the stopwatch.
2. Press to stop the stopwatch.
- You can resume the measurement operation by pressing again.

Using the time adjustment procedure described in the previous section, the time shown on the clock can be adjusted. The following procedure is used to check the alignment and to adjust the positions of the hands so they point to 12 o'clock when the stopwatch is reset.

10. **To adjust the positions of the stopwatch hands**
Press **STOP** to reset the stopwatch, and check the alignment of the stopwatch minute hand to the second hand.
Pull out the crown to the second click.
Turn the crown clockwise to move the second hand forward until it points to 12 o'clock.
If the stopwatch minute hand is aligned correctly, proceed to step 5. If the alignment is not correct, turn the crown clockwise until the second hand points to 12 o'clock, so the stopwatch minute hand jumps to 0.
Now that pulling the crown out also stops the Smokeview second hand. After the second hand is stopped, push the crown back in to its normal position.

For a watch with an elapsed time bezel:
Rotate the elapsed time bezel to align the  mark with the minute hand.
After certain amount of time elapsed, read the graduation on the elapsed time bezel, which the minute hand points to.
Elapsed time is indicated.

- Some water resistant models are equipped with a screw lock crown.
- With such models, you must unscrew the crown in the direction noted in the illustration to loosen it before you can push the crown back into the case.
- Also note that such watches are not water resistant while their crowns are loosened. Be sure to screw the crowns back into place and test for water resistance.

Accuracy at normal temperature: ± 20 seconds a month

Display: 3 analog hands (timekeeping hour and minutes, stopwatch seconds),
3-dial stopwatch seconds, stopwatch hour and minutes, day

Stopwatch function: Measuring capacity: 11:59:59/Measuring unit: 1 second

Battery: One silver oxide battery (Type: SR927W)

Approximately 2 years on type 549327W (assumed)

Water Resistance [Up to 30 meters](#) [View details](#)

- The following applies to watches with **WATER RESIST** or **WATER RESISTANT** marked on the back cover.

[illegible]

- [illegible]

Never leave the watch on the dashboard of a car, near a heater, or in any other location that is subject to very high temperatures. Do not leave the watch where it will be exposed to very low temperatures either. Temperatures at extremes can cause the watch to lose or gain time, freeze, or otherwise malfunction.

Impact—Your watch is designed to withstand impact incurred during normal daily use and light exercise. Excessive or repeated impact, such as playing contact sports, or dropping the watch or otherwise subjecting it to strong impact, however, can lead to malfunctions. Note that watches with shock-resistant designs (G-SHOCK® Baby-G, G-mall) can be worn during contact sports.

- The hands of analog and combination (analog-digital) watches are moved by a motor that uses magnetic force. When such a watch is close to a device (audio speakers, magnetic locksets, cell phones, etc.) that emits strong magnetic fields, the magnetism can cause the hands to jump around or stop.

- Exposure to very strong electrostatic charge can cause the watch to display the wrong

- Do not allow the watch to come into contact with thinner, gasoline, solvents, oils, or fats, or with any cleaners, adhesives, paints, medicines, or cosmetics that contain such

ingredients. Doing so can cause discoloration of or damage to the case, resin band, leather band, and other parts.

As you do not plan to use the watch for a long time, why is it thoroughly free of all dirt, sweat, and moisture, and shows it in a clean, polished state?

[illegible]

- Allowing this watch to remain in contact with other items or storing it together with other items while it is wet for long periods can cause the color of the silver items to transfer to the watch case.
- Thoroughly dry the watch and its strap before storing it and make sure it is not in contact with other items.
- Items should be cleaned regularly. Failure to clean the watch and its strap for long periods or failure to clean dirt from a leather band for long periods can cause it to become discolored.

- Subjecting a natural leather or imitation leather band to rubbing or dirt can cause color transfer and discoloration.

- Failure to clean dirt from a metal band can lead to formation of rust, even if the band is stainless steel or plated. If the watch is exposed to sweat or water, wipe it thoroughly with a soft, absorbent cloth and then store it in a well-ventilated location to dry.
- To clean the band, use a soft toothbrush or similar tool to scrub it with a weak solution of mild soap and water. Rinse the band with clean water and dry it thoroughly.

The bacteria and odor resistant band protects against odor generated by the formation of bacteria from sweat, which ensures good comfort and hygiene. In order to ensure the odor resistance of the band, the odor resistant band is made of a special material that can wipe the band clean of dirt, sweat, and moisture. The bacteria and odor resistant band suppresses the colonization of organisms and bacteria. It does not protect against rash due to allergic reaction, etc.

Now that CASIO COMPUTER CO., LTD. assumes no responsibility for any damage or loss suffered by you or any third party arising through the use of this product or its malfunction.

Caring for Your Watch

- A dirty or rusty case or band can soil the dial face of your watch, cause skin irritation, and even corrode the metal parts of the watch. To keep your watch in the best possible condition, follow these tips. Rust tends to form easily after the watch is exposed to saltwater and then left outdoors.
- Soak heavily soiled bands in warm water for 10 minutes. Then scrub with a toothbrush.
 - Soak heavily soiled bands in warm water for 10 minutes. Then scrub with a toothbrush.
 - Keep a leather band clean by wiping it with a dry cloth. Both resin bands and leather bands can become worn and cracked over time when subjected to harsh daily use.
 - Clean your watch with a soft, dry cloth. Do not use harsh chemicals or a repair kit to clean your watch. Request full replacement from your original retailer or an authorized CASIO retailer.
 - If the dial face is scratched, you may want to request a replacement. The warranty for your watch is still covered by its warranty.
- Because of this, you should always keep your watch clean. Use a soft, absorbent cloth to clean your watch. Do not use harsh chemicals or a repair kit to clean your watch.

Although the stainless steel used for the watch is highly rust-resistant, rust can form if the metal is not properly maintained. To prevent this, the watch should be cleaned regularly with a soft cloth and mild soap. The watch should also be stored in a dry place and not worn in water.

- Leaving sweat or water on a resin band or storing it in an area subject to high moisture can cause the band to become brittle and crack.

- Individuals with sensitive skin or in poor physical condition may experience skin irritation when wearing a watch. Such individuals should keep their leather band or resin band particularly clean, or switch to a metal band. Should you ever experience a rash or other skin irritation, immediately remove the watch and contact a skin care professional.

- Have the battery replaced only with the type specified by in this manual. Use of another type of battery can cause malfunction.
- When replacing the battery, also request a check for proper water resistance. Note that

- This type of test battery may go dead quicker than the normally rated battery life as noted above.

- Low battery power is indicated by large timekeeping error, when display contents are dim, or when the display goes blank.
- Operating with low battery power can result in malfunction. Replace the battery as soon as possible.
