CASIO

Getting Acquainted

Congratulations upon your selection of this CASIO watch. To get the most out of your purchase, be sure to read this manual carefully.

Keep the watch exposed to bright light

Bright Light

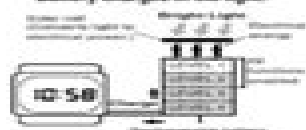

The conductivity generated by the solar cell of this watch is stored by a built-in battery. Leaving or using the watch when it is not exposed to light causes this battery to run down. **Make sure the watch is exposed to light as much as possible.**

- When you are not wearing the watch on your wrist, position the face so it is pointed at a source of bright light.
- You should try to keep the watch outside of your pocket as much as possible. Charging is reduced significantly if the face is only partially obscured.

- The watch continues to operate, even when it is not exposed to light. Leaving the watch in the dark can cause the battery to run down, which will result in some watch functions to be disabled. If the battery gets dead, you will need to reconfigure watch settings after recharging. To ensure normal watch operation, be sure to keep it exposed to light as much as possible.

Battery charges in the light.

Battery discharges in the dark.

General Guide

- Press (D) to change from mode to mode.
- In any mode (except when a setting screen is on the display), press (D) to illuminate the face of the watch.

Radio-controlled Atomic Timekeeping

This watch receives a time calibration signal and updates its time setting automatically.

- Supports time calibration signals: Germany (Munich), England (Paddy), United States (Port Collins), Japan.

Current Time Setting

This watch adjusts its time setting automatically in accordance with a time calibration signal. You can also perform a manual procedure to set the time and date, when necessary.

- The first thing you should do after purchasing this watch is to specify your Home City (the city where you normally will use the watch). For more information, see "To specify your Home City".

- When using the watch outside the areas covered by the time signal transmitters, you will have to adjust the current time setting manually as required. See "Timekeeping".
- For more information about time settings.
- The U.S. time calibration signal can be picked up by the watch when in North America. The time "North America" in this manual refers to the area that consists of Canada, the continental United States, and Alaska.
- The atomic time of this watch is synchronized with the digital time. Because of this, the atomic time setting is automatically adjusted whenever you change the digital setting. (See "Changing Timekeeping" for more information.)

To specify your Home City

- In the Timekeeping Mode, hold down (D) till city code screen is shown. This is the setting screen.
 - Press (D) to select the city code you want to use as your Home City.
- Time calibration signal reception is supported when any one of the city codes shown in the table below is selected as your Home City.

- Approximately 30 minutes exposure to indoor fluorescent lighting.
- Be sure to read "Power Supply" for important information you need to know when recharging the watch for bright light.

If the display of the watch is blank...

- See "Power Saving Function" for more information.

- You can disable time signal reception. If you want, see "To turn auto-receive on and off" for more information.
- Read the chapter under "Reception Ranges" for information about the reception ranges of the watch.
- If you are in an area that does not use Daylight Saving Time (summer time), turn off the DST setting.

Time Calibration Signal Reception

There are two different methods you can use to receive the time calibration signal: auto-receive and manual receive.

Auto-Receive

With auto-receive, the watch receives the time calibration signal automatically up to six times a day when any auto-receive is successful, the following auto-receive operations are not performed. For more information, see "About Auto-Receive".

Manual Receive

Manual receive means you start a time calibration receive operation with the press of a button. For more information, see "To perform manual receive".

Important!

- When getting ready to receive the time calibration signal, position the watch as shown in the nearby illustration, with the LCD window side facing towards a window. Make sure there are no metal objects nearby.
