**Psyche's Veil** Terry Marks-Tarlow, 2013-12-16 Historically the language and concepts within clinical theory have been steeped in linear assumptions and reductionist thinking Because the essence of psychotherapy involves change Psyche s Veil suggests that clinical practice is inherently a nonlinear affair In this book Terry Marks Tarlow provides therapists with new language models and metaphors to narrow the divide between theory and practice while bridging the gap between psychology and the sciences By applying contemporary perspectives of chaos theory complexity theory and fractal geometry to clinical practice the author discards traditional conceptions of health based on ideals of regularity set points and normative statistics in favour of models that emphasize unique moments variability and irregularity Psyche s Veil further explores philosophical and spiritual implications of contemporary science for psychotherapy Written at the interface between artistic scientific and spiritual aspects of therapy Psyche s Veil is a case based book that aspires to a paradigm shift in how practitioners conceptualize critical ingredients for internal healing Novel treatment of sophisticated psychoanalytical issues and tie ins to interpersonal neurobiology make this book appeal to both the specialist practitioner as well as the generalist reader

Memory and Healing Soren R. Ekstrom, 2018-05-01 This book addresses the current demand to apply findings in neuroscience to a broad spectrum of psychotherapy practices It offers clear formulations for what has long been missing in how psychotherapists present their work research based descriptions of specific memory functions and attention to the role that synaptic plasticity and neural integration play in making lasting psychological change possible The book provides a detailed perspective on how patients integrate into their own narratives what transpires in their treatment and how the clinician s memory guides the different phases of the process of healing Long neglected in psychotherapeutic formulations findings about memory in particular episodic and autobiographical memory have a direct bearing on what happens in treatments Whether the information is about the recent past such as what happened between sessions or about traumatic childhood experiences the patient s disclosures are in the service of a more complete narrative

about self At the same time the therapist s ways of remembering what occurs in each therapeutic relationship will guide much of the healing process for the patient

**European Thought and Culture, 1350-1992** Michael J. Sauter, 2021-06-06

This book explores the main currents of European thought between 1350 and 1992 which it approaches in two principal ways culture as produced by place and the progressive unmooring of thought from previously set religious and philosophical boundaries The book reads the period against spatial thought s history spatial sciences such as geography or Euclidean geometry to argue that Europe cannot be understood as a continent in intellectual terms or its history organized with respect to traditional spatial geographic categories Instead we need to understand European intellectual history in terms of a culture that defined its own place as opposed to a place that produced a given culture It then builds on this idea to argue that Europe s overweening drive to know more about humanity and the cosmos continually breached the boundaries set by venerable religious and philosophical traditions In this respect spatial thought foregrounded the human at the unchanging s expense with European thought slowly becoming unmoored as it doggedly produced knowledge at wisdom s expense Michael J Sauter illustrates this by pursuing historical themes across different chapters including European thought s exit from the medieval period the Renaissance the Reformation the Scientific Revolution the Enlightenment and Romanticism the Industrial Revolution and war and culture offering a thorough overview of European thought during this period The book concludes by explaining how contemporary culture has forgotten what early modern thinkers such as Michel de Montaigne still knew namely that too little skepticism toward one s own certainties makes one a danger to others Offering a comprehensive introduction to European thought that stretches from the late fourteenth to the late twentieth century this is the perfect one volume study for students of European intellectual history

**Black Skin, White Coats** Matthew M. Heaton, 2013-10-15

Black Skin White Coats is a history of psychiatry in Nigeria from the 1950s to the 1980s Working in the contexts of decolonization and anticolonial nationalism Nigerian psychiatrists sought to replace racist colonial psychiatric theories about the psychological inferiority of Africans with a universal and egalitarian model focusing on broad psychological similarities across cultural and racial boundaries Particular emphasis is placed on Dr T Adeoye Lambo the first indigenous Nigerian to earn a specialty degree in psychiatry in the United Kingdom in 1954 Lambo returned to Nigeria to become the medical superintendent of the newly founded Aro Mental Hospital in Abeokuta Nigeria s first modern mental hospital At Aro Lambo began to revolutionize psychiatric research and clinical practice in Nigeria working to integrate modern western medical theory and technologies with traditional cultural understandings of mental illness Lambo s research focused on deracializing psychiatric thinking and redefining mental illness in terms of a model of universal human similarities that crossed racial and cultural divides Black Skin White Coats is the first work to focus primarily on black Africans as producers of psychiatric knowledge and as definers of mental illness in their own right By examining the ways that Nigerian psychiatrists worked to integrate their psychiatric training with their indigenous backgrounds and cultural and civic nationalisms Black Skin White

Coats provides a foil to Frantz Fanon's widely publicized reactionary articulations of the relationship between colonialism and psychiatry. *Black Skin White Coats* is also on the cutting edge of histories of psychiatry that are increasingly drawing connections between local and national developments in late colonial and postcolonial settings and international scientific networks. Heaton argues that Nigerian psychiatrists were intimately aware of the need to engage in international discourses as part and parcel of the transformation of psychiatry at home.
