Die Castings, 1961 Die Casting Metallurgy Alan David Kaye, Arthur Street, 2016-01-22 Die Casting Metallurgy focuses on developments in the metallurgy of die casting Ore distribution smelting methods and energy requirements for the major non ferrous metals that are die cast are considered This text has 29 chapters the first of which provides an overview of early developments in die casting After explaining how metals and alloys are die cast the book turns to the production of aluminum and its alloys aluminum alloy die castings and melting equipment for aluminum alloys The chapters that follow explore the metallurgy of zinc and magnesium alloys brass and ferrous die casting automatic metal transfer systems metal melting treatments and the metallurgy of die casting machines Developments in lubrication die casting and finishing processes are also considered This book also describes pressure die casting dies thermal fatigue of die casting dies heat treatment of die steels and surface treatment of steels Some comparative alloy specifications are summarized and an attempt is made to correlate units of hardness strength and other properties This book will be of interest to materials scientists and industrial materials engineers *The Engineer*, 1921 **COMPUTER AIDED DESIGN OF GATING SYSTEM FOR A DIE-CASTING DIE** Dr. Chandan Deep Singh, Dr. Jatinder Madan, Amrik Singh, 2018-02-15 Design of a die casting die is a

critical activity for its manufacturing and further downstream activities Further in design of a die casting die activities like cavity design cavity layout and design of gating system are essential components Design of gating system for a die casting die is dependent upon a number of parameters which are influenced by part design and die casting alloy Gating system design takes much time of the die casting expert since it requires lot of manual input and a number of iterations to finalize the design This requires a good knowledge of die casting process making this activity completely dependent on the user In modern day industry lot of CAD CAM tools are being applied for design development and manufacturing of a die casting die However dependency on a die casting expert throughout design and manufacturing of die casting die makes it a quite lengthy process Gating system design being one of the major activities in die design also takes much time Therefore it would be quite beneficial to automate the activity of the gating system design This work is about computer aided design of gating system for die casting die Proposed system takes CAD file of the die casting part as input and uses die casting process knowledge to determine different parameters for the gating system Designs of the components of the gating system like runner gate and overflow have been attempted A feature library has been proposed as a part of this work which together with parametric design of the gating system generates CAD model of the components of the gating system The system has been tested on a number of industrial parts and results found are quite encouraging The system would go a long way in bridging the gap between designing and manufacturing of die casting [Die Cast Engineering](#) William Andresen,2004-11-29
