Chevrolet Optra User Manual 2015:

On a Global Mission: The Automobiles of General Motors International Volume 3 Louis F. Fourie, 2016-12-27
Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

Fundamentals of Driving Patterns and Driving Cycles José I. Huertas, 2025-03-03. A driving cycles DC is a speed profile that represents the driving pattern of a given region or country. It is used to evaluate the vehicle's energy consumption and emissions as well as a tool to design vehicle powertrains and to evaluate strategies related to energy management and logistics in several applications that involve the use of motorized vehicles. This book provides a comprehensive and general methodology to construct and assess DCs for motorized vehicles in a given region. Different techniques and methodologies for data collection and processing are presented as well as new technologies and tendencies related to DCs are included and discussed. As an example, different case studies performed in Latin America are presented and discussed.
