Mysteries of the Sacred Universe Richard L. Thompson, 2000-02-04 From the flat earth to the sun's chariot traditional spiritual texts seem wedded to outmoded cosmologies that show at best the scientific limitations of their authors The Bhagavata Purana one of the classical scriptures of Hinduism seems at first glance to be no exception However a closer examination of this text reveals unexpected depths of knowledge in ancient cosmology **Mysteries of the Sacred Universe** shows that the cosmology of the Bhagavata Purana is a sophisticated system with multiple levels of meaning that encode at least four different astronomical geographical and spiritual world models By viewing the text in the light of modern astronomy Richard Thompson shows how ancient scientists expressed exact knowledge in apparently mythological terms Comparison with the ancient traditions of Egypt and the Near East shows early cultural connections between India and these regions including a surprisingly advanced science However quantitative science is only part of the picture **Mysteries of the Sacred Universe** also offers a clear understanding of how the spiritual dimension was integrated into ancient Indian cosmology

Mysteries of the Sacred Universe Richard L. Thompson, 2000-11-20 From the flat earth to the sun's chariot traditional spiritual texts seem wedded to outmoded cosmologies that show at best the scientific limitations of their authors The Bhagavata Purana one of the classical scriptures of Hinduism seems at first glance to be no exception However a closer examination of this text reveals unexpected depths of knowledge in ancient cosmology **Mysteries of the Sacred Universe** shows that the cosmology of the Bhagavata Purana is a sophisticated system with multiple levels of meaning that encode at least four different astronomical geographical and spiritual world models By viewing the text in the light of modern astronomy Richard Thompson shows how

ancient scientists expressed exact knowledge in apparently mythological terms Comparison with the ancient traditions of Egypt and the Near East shows early cultural connections between India and these regions including a surprisingly advanced science However quantitative science is only part of the picture **Mysteries of the Sacred Universe** also offers a clear understanding of how the spiritual dimension was integrated into ancient Indian cosmology **Mysteries of the Sacred Universe Interactive CD** Richard L. Thompson,2000-11-01 **The Emerald Modem** Richard Leviton,2004-05-04 Twenty years ago in England author Richard Leviton discovered the planet Following quite specific guidance he began a long process that amounted to an apprenticeship My mentors dispatched me to various specific locations in the Somerset landscape and at all hours of the night and day I sat on hills and valleys and rocks under sunlight moonlight rain snow and fog and had visions I started to see another landscape behind the apparent landscape It was an apparitional landscape with stars planets galaxies angels spirits of Nature mythic deities divinity As time went on he found himself talking with angels visiting celestial cities and following gnomes He came to understand that at one level we are the planet and that both we and it have an intimate relationship with our galaxy I found myself living inside the myths of the world as if they were expert scripts for real life inner adventures I never once thought I was crazy Why should I Quite the opposite I believed I was finally getting grounded in something real But it would take me twenty years to make sense of it That sense is embodied in **The Emerald Modem** The **Emerald Modem** includes direct correspondences between human chakras and the Earth's energy features and the galactic originalstables listing locations of sacred sites around the planet where you may experience this relationshipexplanations of world myths which provide clues to this unsuspected visionary world around us This is the first book to synthesize all the fragments of geomantic perception sacred sites energy points vertexes etc into a global interactive model that ties human consciousness directly to it Leviton describes 85 subtle features in the planetary landscape places you can go for mystical experiences They are features of the Earth's energy body almost all invisible to conventional sight But psychic cognition can be trained and you can usefully interact with any of these types of sites today without seeing what you're doing Your intent to interact for the benefit of yourself and the planet is all that's required Just as modems dial us into the Internet so the features of the Earth's energy body described in **The Emerald Modem** help us get online with the galaxy You can learn to visit Grail Castles experience a Mount Olympus or walk through the stars in a landscape zodiac and you can learn enough to become confident that you're not traveling alone Uprooting Geographic Thoughts in India Rana Singh,David Sopher,Oskar Spate,2009-03-26 Under the cultural turn and transformation the new intellectual discourses started in the 21st century to search the roots have cross cultural comparison and to see how the old traditions be used in the contemporary worldviews This book is the first attempt dealing with roots of Indian geographical thoughts since its beginning in 1920 It emphasises identity of India and Indianness and consciousness among dweller geographers in India development and status of geography and its recent trends Gaia theory and Indian context in search of cosmic integrity ecospirituality and global message towards

interrelatedness Hindu pilgrimages and its contemporary importance Mahatma Gandhi and his contribution to sustainable environmental development for global peace and humanism and new vision to see meeting grounds of the East and the West on the line of reconstruction and reconciliation in the globalising world These essays are selective and thematic therefore overall view of comprehensiveness is lacking But this book is not the end obviously it is a beginning as already other volumes in sequence and continuity are in progress At the end the lead essays representative of the three eras by Spate 1956 Sopher 1973 and Mukerji 1992 are reprinted with a view to assessing the relevance of their challenging message even today

Fractal Time Braden Gregg, 2010-03-01 In this compelling exploration of life Gregg Braden merges the modern discoveries of nature s patterns fractals with the ancient view of a cyclic universe The result is a powerful model of time fractal time and a realistic window into what we can expect for the mysterious year 2012 and beyond Applying fractal time to the history of the world and life he proposes that everything from the war and peace between nations to the patterns of human relationships mirror the returning cycles of our past As each cycle repeats it carries a more powerful amplified version of itself The key If you know where to look in the past you know what to expect when the same conditions return in the present and future For the first time in print the Time Code Calculator gives you the tool to do just that Through easy to understand science and step by step instructions discover for yourself How the conditions for 2012 have occurred in the past and what we can expect when they repeat The hot dates that hold the greatest threats of war and greatest opportunities for peace as well as economic cycles such as the stockmarket collapse of 2008 How Earth s location in space triggers cycles of

spiritual growth for humans Your personal Time Codes for the key events of business relationships and change in your life How each cycle carries a window of opportunity a choice point that allows us to select a new outcome for the returning pattern What the 1999 ice cores from Antarctica reveal about past cycles of climate global warming Earth s protective magnetic fields and what these things mean for us today **The Culture of Astronomy** Thomas Karl Dietrich,2011-09 This book explores astronomy s impact on the world today delving into the histories of many civilizations to explain the world as we know it and to raise new questions about what the future holds from back cover *Stars on the Earth* Richard Leviton,2006-08-18 Discover the wonderful secret the Earth holds for us that the stars of the galaxy live on our planet Holograms of high magnitude stars over holy mountains Physical travel to other planets through stargates on the Earth s surface Near instantaneous transportation across the planet through quick way portals Outrageous science fiction or sober geomantic fact Earth Mysteries researcher Richard Leviton takes you on a wild tour of three geomantic features of our planet and reveals that what science fiction has dreamed the Earth in fact offers us Stars on the Earth combines scholarship clairvoyance and field experience with the latest discoveries of geology and astrophysics and the timeless insights of the world s myths to open the planetary door to the stars It s all part of the Earth s unsuspected but staggeringly rich endowment as a designer planet Our planet was precisely designed and implemented for us and it s equipped with a visionary geography that mirrors features of the galaxy and Heavens Why are so many of the Earth s mountains said to be holy producing visions and encounters with the gods They all have canopies of light called domes each transmitting the presence of a galactic star What is the geomantic origin of the Bermuda Triangle Two dysfunctional stargates If working properly they and the Earth s other two million stargates could transport us rapidly to other planets Is there a way to travel quickly across the planet without using cars airplanes boats or trains Yes and it s called a traversable wormhole and the Earth has thousands of them awaiting our discovery and use Come join the tour of a planet you ve never seen before our own star infused Earth Welcome to Your Designer Planet! Richard Leviton,2007-09-05 We now live in the time of the Gaian hierophant This is the one who reveals and shows us how to relate to the sacred aspects of Gaia our planet Who is this hierophant Each of us when we join the campaign with Gaia against the desecration of our natural environment But first we have to discover what the Earth really is The Earth s thousands of sacred sites hold a secret they are functional parts of the planet s geomantic body consciousness nodes in the Earth s subtle body Each veils a Light temple each once known widely and remembered in myth and Welcome to Your Designer Planet documents 165 different kinds The Earth is not an accident of the cosmos but was designed specifically for humans as an extended Mystery temple primed to support and enhance our greater awareness And the designers intended that humans help maintain it Want to help the ecosystem and modulate global warming and climate change Plug yourself into the Earth s Light grid through your nearest sacred site and start helping Earth Mysteries researcher Richard Leviton presents a working model of the Earth s geomantic reality based on 24 years of

research The world's myths are the doorway into this fantastic domain of the Earth's visionary geography showing us where to go and what to do and even what kinds of spiritual beings to expect to see The future of the Earth is in our hands Here are some pages from its design manual showing us how to fine tune our wonderful host planet Universe Before the Big Bang

Prof. (Dr.) Jai Paul Dudeja, 2024-03-18 One of the most discussed topics among physicists astronomers and cosmologists is the origin of our universe A number of theories have been put forward to explain the origin of the universe Based on the evidence the theory of Big Bang is widely accepted today What is the Big Bang Around 13.8 billion years ago all the energy and the matter was compressed into a miniscule point There was nothing else no space or sky outside it Everything was contained in that point All at once this point which could not bear that high density and very high temperature started expanding at an incredibly fast rate In a split second it was the size of a grape an instant later a km wide Within a minute it was billions of km wide and so on Since then the universe is not only expanding it is expanding with faster speed as the time is passing It's a mind boggling question that has intrigued the scientists and the commoners alike for centuries is What was there before the Big Bang Was there a universe or many more universes before our own universe Will there be more universes after this universe Are there parallel universes or cyclic universes Was there just one big bang that we know for this universe or were there two or more big bangs What are the theories which attempt to explain the phenomenon of the Universe before the Big Bang The Vedanta Kesari, 2008 **The Yugas** Joseph Selbie, David Steinmetz, 2011-08-16

Millions are wondering what the future holds for mankind and if we are soon due for a world changing global shift Paramhansa Yogananda author of the classic Autobiography of a Yogi and his teacher Sri Yukteswar offered key insights into this subject They presented a fascinating explanation of the rising and falling eras that our planet cycles through every 24 000 years According to their teachings we have recently passed through the low ebb in that cycle and are moving to a higher age an Energy Age that will revolutionize the world Over one hundred years ago Yukteswar predicted that we would live in a time of extraordinary change and that much that we believe to be fixed and true our entire way of looking at the world would be transformed and uplifted In The Yugas authors Joseph Selbie and David Steinmetz present substantial and intriguing evidence from the findings of historians and scientists that demonstrate the truth of Yukteswar's and Yogananda's revelations
