Country Park And City The Architecture And Life Of Calvert Vaux:

Country, Park and City Francis R. Kowsky, 2003 After beginning his career as an architect in London Calvert Vaux 1824 1895 came to the Hudson River valley in 1850 at the invitation of Andrew Jackson Downing the reform minded writer on houses and gardens As Downing s partner and after Downing s death in 1852 Vaux designed country and suburban dwellings that were remarkable for their well conceived plans and their sensitive rapport with nature By 1857 the year he published his book *Villas and Cottages* Vaux had moved to New York City There he asked Frederick Law Olmsted to join him in preparing a design for Central Park He spent the next 38 years defending and refining their vision of Central Park as a work of art After the Civil War he and Olmsted led the nascent American park movement with their designs for parks and parkways in Brooklyn Buffalo and many other American cities Apart from undertakings with Olmsted Vaux cultivated a distinguished architectural practice Among his clients were the artist Frederic Church whose dream house Olana he helped create and the reform politician Samuel Tilden whose residence on New York s Gramercy Park remains one of the country s outstanding Victorian buildings A pioneering advocate for apartment houses in American cities Vaux designed buildings that mirrored the advance of urbanization in America including early model housing for the poor He planned the original portions of the Metropolitan Museum of Art and the American Museum of Natural History and conceived a stunning proposal for a vast iron and glass building to house the Centennial Exhibition in Philadelphia Especially notable are the many bridges and other charming structures that he designed for Central Park Vaux considered the Park s Terrace decorated by J W Mould as his greatest achievement An active participant in the cultural and intellectual life of New York Vaux was an idealist who regarded himself as an artist and a professional And while much has been written on Olmsted comparatively little has been published about Vaux The first in depth account of Vaux s career *Country Park and City* should be of great interest to historians of art architecture and urbanism as well as preservationists and other readers interested in New York City s past and America s first parks *Country, Park & City* Francis R. Kowsky, 2023 *Making Mountains* David

Stradling, 2009-11-23 For over two hundred years the Catskill Mountains have been repeatedly and dramatically transformed by New York City In *Making Mountains* David Stradling shows the transformation of the Catskills landscape as a collaborative process one in which local and urban hands capital and ideas have come together to reshape the mountains and the communities therein This collaboration has had environmental economic and cultural consequences Early on the Catskills were an important source of natural resources Later when New York City needed to expand its water supply engineers helped direct the city toward the Catskills claiming that the mountains offered the purest and most cost effective waters By the 1960s New York had created the great reservoir and aqueduct system in the mountains that now supplies the city with 90 percent of its water The Catskills also served as a critical space in which the nation s ideas about nature evolved Stradling describes the great influence writers and artists had upon urban residents especially the painters of the Hudson River School

whose ideal landscapes created expectations about how rural America should appear By the mid 1800s urban residents had turned the Catskills into an important vacation ground and by the late 1800s the Catskills had become one of the premiere resort regions in the nation In the mid twentieth century the older Catskill resort region was in steep decline but the Jewish Borscht Belt in the southern Catskills was thriving The automobile revitalized mountain tourism and residence and increased the threat of suburbanization of the historic landscape Throughout each of these significant incarnations urban and rural residents worked in a rough collaboration though not without conflict to reshape the mountains and American ideas about rural landscapes and nature
