Maffei, Robert F. Tamburro, Neal J. Thomas, 2012-04-10 This is the first comprehensive study guide covering all aspects of pediatric critical care medicine It fills a void that exists in learning resources currently available to pediatric critical care practitioners The major textbooks are excellent references but do not allow concise reading on specific topics and are not intended to act as both text and study guide There are also several handbooks available but these are usually written for general pediatric residents and lack the advanced physiology and pathophysiology required for the higher level pediatric critical care practitioner

Educational Development International ,1974 *Algebraic Identification and Estimation Methods in Feedback*

Control Systems Hebertt Sira-Ramírez, Carlos García Rodríguez, John Cortés Romero, Alberto Luviano Juárez, 2014-03-13

Algebraic Identification and Estimation Methods in Feedback Control Systems presents a model based algebraic approach to online parameter and state estimation in uncertain dynamic feedback control systems This approach evades the mathematical intricacies of the traditional stochastic approach proposing a direct model based scheme with several easy to implement computational advantages The approach can be used with continuous and discrete linear and nonlinear mono variable and multi variable systems The estimators based on this approach are not of asymptotic nature and do not require any statistical knowledge of the corrupting noises to achieve good performance in a noisy environment These estimators are fast robust to structured perturbations and easy to combine with classical or sophisticated control laws This book uses module theory differential algebra and operational calculus in an easy to understand manner and also details how to apply these in the context of feedback control systems A wide variety of examples including mechanical systems power converters electric motors and chaotic systems are also included to illustrate the algebraic methodology Key features Presents a radically new approach to online parameter and state estimation Enables the reader to master the use and understand the consequences of the highly theoretical differential algebraic viewpoint in control systems theory Includes examples in a variety of physical applications with experimental results Covers the latest developments and applications *Algebraic Identification and Estimation Methods in Feedback Control Systems* is a comprehensive reference for researchers and practitioners working in the area of automatic control and is also a useful source of information for graduate and undergraduate students Critical Care Study Guide Gerard J. Criner, Rodger E. Barnette, Gilbert E. D'Alonzo, 2010-06-27

Critical care medicine is a dynamic and exciting arena where complex pathophysiologic states require extensive knowledge and up to date clinical information An extensive knowledge of basic pathophysiology as well as awareness of the appropriate diagnostic tests and treatments that are used to optimize care in the critically ill is essential Since our first edition 7 years ago new information crucial to the care and understanding of the critically ill patient has rapidly accumulated Because this knowledge base crosses many different disciplines a comprehensive multidisciplinary approach presenting the information is essential similar to the multidisciplinary approach that is used to care for the critically ill patient We have strived to provide this content in an easily digestible format that uses a variety of teaching tools to facilitate understanding of the presented concepts and to enhance information retention To meet the demand to provide comprehensive and diverse education in order to understand the pathogenesis and optimum care of a variety of critical illnesses we have substantially revised the prior topics in the first edition with updated information We have also markedly expanded the number of topics covered to include acute lung injury and the acute respiratory distress syndrome an expanded discussion of the physiology and operation of mechanical ventilation obstetrical care in the ICU neurosurgical emergencies acute coronary syndromes cardiac arrhythmias
